INTRODUCTION

THE STUDY OF NUMISMATICS is at the basis of many branches of human knowledge, such as Chronology, Iconography, History, the Science of Religion, Architecture, Costumes, Language, the Arts of the Ancients, etc.

Hirtius called Numismatics the Light of Archaeological science; Friedrick Creuzer a mirror in which is reflected the whole life of the ancient world, and a great many other learned men encouraged this very useful study.

The constantly recurring difficulty of identifying ancient coins has always been a stumbling-block to the numismatist, varying in accordance with his experience and knowledge and with the rarity of the coin in question.

The classification of coins under the headings of countries, towns, kings, etc., though useful, and in some cases adequate, at times involves much search, at the end of which the enquirer may still be in a state of uncertainty. Sometimes, too, the country or town of issue is unnamed or obliterated, in which case the collector has only the slenderest clues to guide him.

The present work, which has been achieved after the labour of many years and the expenditure of a large sum of money, was undertaken with the view of removing the difficulties which tend to make the collection of coins laborious and unsatisfactory to all except the expert.

For convenience's sake I have divided the work in two Sections, the first comprising all coin-types representing inanimate objects, plants, etc., which occur either alone or as symbols in conjunction with figures, animals, etc., the second all coin-types representing animate objects, such as figures of deities, heroes, dynasts, animals, etc.

Section I is subdivided into eight categories forming six Parts as under :

- Part I. **Industry.** Vases, Recipients, Tables, Tripods, etc.
- II. **War.** Arms, Weapons, Armour, Standards, etc.
- III. **Agriculture.** Plants and Trees, Fruits, Flowers, etc.
- IV. **Religion.** Altars, Attributes of Deities, Sacrifice, etc.
- V. **Architecture.** Buildings, Edifices, Monuments, Temples, etc.
Naval and Marine. Galley, Shells, etc.
- VI. **Science and the Arts.** Astronomy, Sculpture, Music, Comedy, etc.
Various.

Every known Greek and Graeco-Roman coin the type of which represents an inanimate object or a plant has been classified under the heading of the type and also of the symbol, or symbols represented upon it, and thus identification becomes the work of a few moments.

The number of coins contained under these classifications is 7743, progressively recorded in the six Parts, but this number approaches in reality 8000 by the additions made under the same number with different letters.

Each Section is accompanied by a full Catalogue of all the coins represented or referred to on the Plates and a general guide-Index, which is a summary of the contents. Every object is classified alphabetically. The various types and symbols are referred to each other as in Dictionaries.

The Catalogue describes each coin in a tabular form, indicating place of issue, mint, name of dynast, etc., type and symbols (if any) of obverse and reverse, metal, size in English inches and French millimeters, weight in grains and in grammes, whenever possible, denomination, date, reference to the Plates, and sources of reference, such as the British Museum Catalogue of greek coins, the Catalogue of the Hunterian Collection, the standard treatises of Mionnet, Babellon, Head, Imhoof-Blumer, etc., and every authoritative paper and important catalogue, British and Foreign, comprising all the available material till 1909.

To this descriptive Catalogue, the arrangement of which, does not need any further explanation, is appended a list of prices of greek coins from records of the leading auction-rooms, a Polyglot Dictionary giving in five of the principal European languages the equivalent technical and descriptive term used in the work, with a list of the abbreviations.

The Plates, which are the main part of the work and enable any one to rapidly identifying any coins, have been prepared with the utmost care, either from the originals, or from illustrations in Catalogues, etc.

I sincerely wish that my work will prove a help to the numerous students of greek numismatics and that the labour expended on this self-imposed task has not been entirely wasted.
