

CATALOGUE
OF THE
CABINET OF COINS

BELONGING TO
YALE COLLEGE,

DEPOSITED IN THE COLLEGE LIBRARY.

[New England Threepence, 1652.]

NEW HAVEN :
TUTTLE, MOREHOUSE & TAYLOR, PRINTERS.

—
1863.

P R E F A C E.

For many years previous to 1860 there were a few coins belonging to Yale College, which were deposited in Trumbull Gallery, in glass cases, with little attempt at order or arrangement. It is from this nucleus that our present collection has arisen, by the aid of a few purchases and of donations from persons interested in the subject. This original collection, marked "Yale Coll." in the Catalogue, was a curious one, consisting mainly of old pieces, generally rather rare, and a few of the commonest modern coins. As there was no catalogue of it, most of the pieces have been credited from recollection, and hence there may be a few mistakes.

The gem of that cabinet, as well as of the present, is the NEW ENGLAND THREE-PENCE, the existence of which numismatists have doubted. The piece needs no description, as an engraving of it is given on the title page. For a long time supposed unique, its value is not lessened by the recent discovery of a similar piece by W. S. Appleton, Esq. of Boston, which puts the genuineness of the issue beyond a doubt.

In 1854 Mr. Thomas H. Johns, of Canandaigua, N. Y., left by will a sum of money to Yale College, and in part payment thereof the Corporation consented to take a collection of between seven and eight hundred miscellaneous coins. These are marked "Johns" in the catalogue. Upon receiving them, some better location seemed desirable, and a cabinet was made capable of holding about six thousand coins, and placed in the College Library. The cabinet consists of a case of forty drawers, with three pasteboard trays in each. These trays have a separate cavity for each coin, thus at the same time insuring them against disarrangement and rendering them easy of access.

In 1860 the collection was arranged nearly in the present order by Mr. F. P. Brewer and at first increased quite rapidly from contributions. Mrs. A. R. Street gave a very large collection of foreign coins. C. W. Bradley, Esq., of New Haven, late U. S. Consul at Ning-po, China, also increased this department, giving many large silver pieces. Many others made contributions, but as it has been impossible to place the name of the donor against the proper coin in every case, some of them are marked "Unknown." If contributors are aware of any mistakes or omissions in this respect, they will confer a favor by giving information of them.

The collection having increased to nearly 3000 pieces, including some duplicates, it has been thought desirable for some time to publish a catalogue of them. Three objects have been aimed at in issuing it.

1st. We have attempted to give such a description of each coin as to distinguish it from others of a similar character, and also to help collectors in the arrangement and study of their own coins. This can be only partially gained, owing to the limited space at command, and to the experimental nature of the undertaking; which is also the cause of some want of uniformity in the catalogue.

2d. We have taken this as the most practicable way of expressing our thanks to the donors, and assuring them that their gifts are appreciated and preserved.

3d. We have desired to bring the collection more generally to the notice of numismatists and others, in order that they may know wherein it is wanting, and that those so disposed may have an opportunity of adding to its usefulness. The study of coins as aids and illustrations of History and the Arts is daily better appreciated, and there can be no place better fitted for the preservation of a collection for that purpose than a college Library. Already its use has been manifest here, and were the collection more complete it would be of greater service. Doubtless many of our friends have small collections of

coins which they would be glad to see deposited in some safe and permanent place, but which are now in danger of being lost. We shall be glad to receive any donations, and each piece will be recorded with the name of the donor. Any one desirous of helping us can bring or send donations to the College Library, where they will be taken care of. Lately a few dollars each year have been expended, by vote of the Corporation, when a good opportunity has offered, principally upon ancient coins, but the College must depend mainly on free-will offerings, as there is no fund for the purpose.

It remains to say a few words about the arrangement of the catalogue. There are four general heads—Greek, Roman, Oriental and Modern.

THE GREEK COINS are arranged according to Eckhel's system, and references are made in parenthesis to the volumes and pages of his work. The obverse and reverse are separated by a dash, and as much of the inscription given as is necessary for identification.

THE ROMAN COINS are arranged in the usual way. Denarii and Quinarii are contracted to Den. and Qui., and I, II and III are used for the 1st. 2d and 3d Bronze. Both sides of the Early and Family coins are given—inscriptions in *italics* and **SMALL CAPS**. Generally, only the reverse is given in Imperial and Byzantine Series—the inscriptions in **CAPITALS**. At first, reference is made to the date of coin. (A. D. unless otherwise mentioned,) which will serve to locate it in the larger works. As it becomes next to impossible to date accurately after the time of Postumus, all references are omitted, and the date of reign is placed with the Emperor's name.

THE ORIENTAL COINS include only the ancient dynasties, the more modern being placed among modern coins. The references in brackets are to "Marsden's Numismata Orientalia," where the inscriptions can be seen in full. The date, which precedes the reference, is the year of the Hegira; the date A. D. being given with the reign. The inscriptions are in *italics*, the obverse and reverse being separated by a dash.

THE MODERN COINS are arranged geographically. Under each state the coins are placed under the Sovereign by whom they were struck, and the date of the reign has generally been given, for convenience of reference. Cities, &c. formerly independent, have been placed under the countries to which they are now subject, and the date during which they coined money has been often given. The sides of the coins are separated by a dash—the inscriptions being in *italics*.

In United States coins we are sadly deficient; and it surely seems that an American College should be better supplied with specimens of the country's progress in this art. References have been made in the case of Connecticut and Vermont cents to Dickeson's Manual—the number of the variety being given in parenthesis.

Our Foreign Coins present a fair variety, but still many countries are entirely unrepresented. Of Mediæval coins we are almost entirely destitute, and specimens of this class and of the Saxon Heptarchy are very much needed. The geographical order has been departed from in Germany, where the states are taken according to rank, in five classes: 1. The Empire of Austria. 2. Kingdoms. 3. Duchies. 4. Principalities. 5. Cities. Modern Oriental Coins include both Turkish and Asiatic. Any other deviation from the general system will be understood without further allusion.

We have about 125 Medals, (not catalogued.) Many of the American ones are electro-types, and there are but few rare ones. There are also some few specimens of Continental Currency, but too few to make it worth while to publish a list of them. Both of these departments we hope to increase in the future.

We would take this opportunity to express our thanks to those gentlemen who have assisted us with valuable hints and suggestions, and with aid in translating many pieces, as well as to those through whose liberality the catalogue is published. Our fullest thanks are due to Messrs. Tuttle, Morehouse & Taylor for their patience over a tedious job and frequent alterations, as well as for the excellent style in which they have completed it.

Hoping that all mistakes will be pardoned, and desiring to be informed of any that are discovered, we send it out to our fellow numismatists.

Yale College, July 29, 1863.
