## THE HART HISTORICAL COLLECTION.

MR. GERALD E. HART has been so well known as a Numismatist and Historical Scholar that it seems almost superfluous to extol the Collection formed at his hands, yet one cannot help being struck with its singular appropriateness to the purpose for which it was gathered, viz: historical study. Hardly a piece in the series of Ancient Coins can be cast aside as uninteresting or irrelevant to some event of the distant past, while the modern pieces are particularly suggestive of a select Cabinet of valuable and rare specimens of historical importance and interest.

Reverting to the Catalogue, the attention of Collectors is called to the number of Gold Coins of value scattered throughout its pages. Greek Staters, gold Darics, Roman Aurei and Byzantine Solidi, Mediaeval and Modern Coins of England, Scotland, France and other countries, are there in number, and in a condition which can scarcely be surpassed. These must prove one of the chief attractions of the sale, for fine Ancient and Modern Gold Coins have lately very much increased in the esteem of collectors, and specimens of this quality are always in great demand.

Nearly all the Greek Silver are choice specimens, generally purchased at the best New York Coin Sales, at which Mr. Hart has for many years been a generous bidder, for anything really meritorious; the Decadrachm of Syracuse, signed by the great Greek Master Evaenetos, and many of the Coins of these series are worthy to figure in the best Cabinets; the Oxford Crown is one of the great rarities of the English Coinage, and no specimen has ever before been offered on this side of the water.

The Judæan series have never been approached for completeness on this Continent, and only important European Museums could duplicate the majority of the pieces. This Collection should be acquired, as a whole, by some public institution, for educational purposes.

The Collection of Canada Coins, Business and Church Tokens and Medals, will, no doubt, attract the undivided attention of our Northern fellow-numismatists, for it is by far the most complete and finest ever offered at public or private sale, and contains a number of rarities wanting in every other Collection. The Silver Jetons of Louis XV, bee-hive reverse, are of the utmost rarity; indeed it is but a few years ago, that a prominent U. S. Collector had a standing offer of \$150 for a specimen, and he never obtained it; the Hudson Bay Company's Tokens are so rare as to be unknown to the present officers themselves, and Canada collectors have for several years endeavored in vain to find duplicates at home or abroad — Mr. Hart acquired the Buchanan and Moccock pieces when he purchased the choicest specimens of the former and the entire collection of the latter: the Indian Wampum money, once legal tender in the Colonies, the Owen Ropery, the Lauzon, the (5) Side View Penny and Half Penny Tokens, the Un Sous series, the Indian and Confederation Medals, and the Communion Tokens are among the best known rarities, while several previously unknown pieces make their appearance in this Catalogue. The weakness of the U. S. Issues is explained by the fact that all the coins of this series were taken from actual circulation in Canada; nevertheless the Connecticut Cent, struck on a planchet of the Penny size, is a rarity of the first magnitude, and the large lots of Colonials, etc., will no doubt prove attractive to our local collectors.

The compiler has taken unusual care to make his work correct, detailed and attractive. The many notes scattered throughout the Catalogue are from Mr. Hart's own private and original observations; in short it is sincerely hoped that Coin Buyers, Coin Dealers, and all into whose hands this Catalogue may fall, will consider the dispersion of this magnificent Collection worthy of their special attention, and that they will be represented at the sale, either in person or through the agency of the several well known New York, Philadelphia, and other firms, who make it a part of their regular business to represent distant buyers at Auction Sales.

Churchill, 1844," devotes a chapter to describing the process of curing various diseases adopted by the kings, and gives a fac-simile plate of four of these tokens, the two above included. He says the practice in England began with Edward the Confessor,

and descended only to potentates who could show an alliance with the royal family of England. The French kings adopted it and kept up the custom till 1776. Louis XIV touched 1600 persons on Easter Sunday, 1686, saying to each "le roy te touche, Dieu te guérisse;" every Frenchman touched received a gratuity of 15 sous, foreigners 30. Pepys' Diary refers to the practice, June 23, 1660, and April 13, 1661. Evelyn describes the process and the bestowing of the golden token attached to a white ribbon, under entry of July 6, 1660. The English kings' audiences to receive the royal touch were limited to 200 persons.

## COINS OF JUDAEA.

The special attention of Curators of Public Museums, Theologians, Numismatists, and Bible Students generally is called to the following important series not only of the "Coins of the Jews" during the short period they were permitted to coin money; but also of those issued by the Procurators and Roman Consuls during the period of Roman supremacy over Judaea, as well as of all coins and medals relating to Judaea recognized by Madden and other authorities on the subject. The difficulties of procuring coins referring to the "Chosen People" and Bible History are well known to numismatists, especially in such fine condition as these, and the series is one of the most complete yet dispersed. The references are chiefly to "Madden's Jewish Coinage," 1864 edition.

Greek Imperial silver Tetradrachm, circulated in Judaea, and used as Temple tribute tax. Fine, pierced near head. Rare and interesting. Wellenheim, 6742, Madden, p. 239.

The Temple tribute tax is that alluded to in St. Matthew xvii: 24-27, and as shown in Madden, p. 237-239, this coin is of the same value as that found by St. Peter in the mouth of the fish. Mr. Poole, the well known English authority, says: "In confirmation of the minute accuracy of the Evangelist, . . . at this period the silver currency in Palestine consisted of Greek imperial tetradrachms, or staters, . . . didrachms having fallen into disuse." Mr. Poole further shows the great probability that the "thirty pieces of silver" paid to Judas were also of the same class to which this piece belongs.

## EARLY HISTORICAL MEDALS OF AMERICA.

Under this head are found Medals and Jetons, struck principally in France and England, to commemorate events, battles, treaties, etc., relating directly or indirectly to America and the American Colonies;

also Medals granted to Indian Chiefs and others for faithful services or valorous deeds. Quite a number are excessively rare, several have never previously been offered, and taken altogether they form one of the most interesting parts of this truly Historical Collection.

This remarkable medal is the earliest instance of the regal recognition of the New World upon a medal; its existence has hitherto escaped observation at the hands of Numismatists. The Peace alluded to is that of Chateau Cambrisis, concluded on the 2d of April, 1559, between Spain, England and France, and from the inscription on the medal, America must have been in part, at least, the subject of the deliberations, which culminated in this treaty, forming a striking instance of the value of Numismatics to History.

#### LOWER CANADA.

1143 Satirical Token. Bust r. (*Vexator*) CANADEN. SIS. Rev. Female seated, NVN ILLOS V *his capere* 1811). The one star variety; as good as found. 17. L. 500, rarity 5.

On a perfect coin in the Government Collection at Ottawa the legend reads, "Vexator M. I. Canadensis"; this piece so far as known unique, furnishes the missing link in the explanation of this remarkable political, satirical and local token, which has proved so much of a puzzle to numismatists. The Governor General, Sir James Henry Craig had made himself very unpopular with the French Canadians, and had imprisoned a few of their prominent politicians and Members of Parliament for ultra radical opinions expressed by them in their organ "Le Canadien" newspaper, but could not hold them for the offence committed. The legend has reference to this and may be translated:—"Oh, Canadian persecutor! (Rev.) Don't you wish you could catch them?"

In 1808 a bridge connected the Island of Montreal with the mainland, upon which these passes were used. The charge was one shilling for a Calèche, or old French two-wheeled cab, in present use in Quebec and some country parts of French Canada, ninepence for a Charrette, or cart, sixpence for a Cheval or horse, and threepence for a Personne or foot passenger. The clipped ones were to distinguish those to be accounted for by the toll keeper at De Lachesnaye. The complete set comprises twelve pieces, of which eleven are here offered; they are all eagerly sought, on account of their interest and rarity, but two complete sets being known.

#### BOUQUET OR SOUS SERIES.

The formation of this set of the renowned SOUS SERIES, which actually comprises every known variety but two (L. 534 and 535), besides several unpublished ones, necessitated the handling and classification of thousands of specimens, and cost Mr. Hart a considerable outlay of money. To

preserve the collection entire, and give the curator of some Museum or private collector the opportunity of securing it, the cataloguer reserves the right of selling Nos. 1207 to 1259 inclusive, numbering 70 different varieties in die or metal, together, as one lot, and they will be so sold if a satisfactory bid is made at the time of the sale.
