FIRST DAY'S SALE.

CITIES OF SPAIN, IN COPPER.

LOT

1 Spain; see Mionnet, vol. i. page 1, No. 4. size 5.

"*" These coins, although inscribed hispanorvm, are now considered to have been struck by a Spanish colony at Panormus in Sicily. Sestini (Medaglie Ispane, pp. 1 and 2) acutely remarks, that Florez gives none of these coins, except those which he copied from Paruta, and infers from this fact, and the inscription panormos. sic. on some, that they were struck in Sicily, where they are found.

Carteia, in Baetica; Mt. page 9, No. 54 size 5.
[PO]NT., very rare, and in good condition: size 11. 3

CITIES OF SPAIN, IN SILVER.

2 Emporiae, Tarraconensis; Mt. Supp. vol. i, p. 82, No. 471; but no dolphin under the winged horse; fine condition, and fine work: size 4½. weight 73.8 grs. 1

"*" It will be perceived, on minute examination of the head of the winged horse, that there is a small naked genius clinging to it, and nearly covering it. The ear of the horse might appear to be so adjusted as to form a wing to the genius. For a more detailed account of this unique representation in antiquity, see an interesting paper by the Duke De Luynes, in the Revue Numismatique for 1840, p. 85, noticed in the Numismatic Chronicle, vol. 3, p. 62. On this coin, however,
which is of fine work, the eye and the nostril of the horse are visible between the limbs of the genius, proving that the genius is clinging to the head, rather than forming, or constituting, the head of the animal. On the other hand, it must be admitted, that on the generality of these coins the little genius does certainly appear to form, or constitute, the horse's head, especially on all those of copper. The fact therefore seems to be, that the style of work of the bulk of these coins being that which is technically called barbarous, or approaching to that style, the opportunity of seeing a coin of fine work is so rare, that the latter opinion seems to prevail among numismatists.

3 Another; having a Dolphin under the winged horse, and also the little naked genius on the head of the animal; in good condition: size \(4\frac{1}{2}\).

Two uncertain coins of Spain: sizes \(3\frac{1}{2}\) and 2.

CITIES OF ITALY, IN SILVER.

5 Populonia, in Etruria; Mt. p. 101, No. 46; in fine condition, and very rare; not in the French collection:
size 4. wt. \(66\frac{1}{10}\) grs.

Cales, in Campania; Mt. p. 111, No. 108; but with a Branch, instead of the point of a spear, and no letter; rare, and in very fair preservation:
size \(5\frac{1}{2}\), wt. \(106\frac{8}{10}\) grs.

6 Cumæ, in Campania; Mt. p. 114, No. 141, very fair condition:
size 5.

Cumæ; Mt. Supp. p. 293, No. 268, and Combe Num. Vet. in Mus. Brit. tab. 3, fig. 1; of extreme rarity and in fine condition:
size 2.

Neapolis; Mt. p. 117, No. 162; fine: size 5. wt. \(116\) grs.
7 Neapolis; with APTE. under the neck; Mt. page 116, No. 154; very rare, and extremely fine: size 4½. wt. 111 grs.

8 Neapolis; obv. Female Head to the left, a vase with one handle behind; rev. Bull with a human face, walking to the right, underneath BI, above is a winged Victory, with a wreath; extremely fine: size 5. weight 114 5/16 grs.

size 4½.

Neapolis; with Head to the left, and parazonium behind; rev. A under the bull:
size 4 ½.

10 Nola, in Campania; Mt. p. 122, No. 239, but with the legend correct, ΝΩΑΛΙΩΝ; rare, and in perfect preservation:
size 5 ½. wt. 113 grs.

11 Nuceria-Alfaterna, in Campania; Mt. p. 123, No. 242; see Millingen’s Recueil, §c. pl. 1, fig. 7; very rare, and well preserved:
size 5. wt. 110 9/16 grs.

* * * The opinion of the learned Avellino, that this remarkable head with the ram’s horn, represents the hero Epidius Nuncionus, does not appear tenable. It is probably that of the river Sarno personified.

12 Another; from the same die, equally well preserved, but the legend not so entire:
size 5. wt. 111 9/16 grs.

Suessa, in Campania; Mt. p. 124, No. 252, but with an ear of wheat behind the head; rare, and in very fine condition:
size 6. wt. 113 9/16 grs.

13 Teanum, in Campania; Mt. p. 125, No. 262, but the Oscan legend is not as given in Mt. pl. 19, No. 13; it is clearly on this coin TIANVR. in Oscan letters, retrograde; see Dumersan Coll. Allier, pl. 1, fig. 8; of extreme rarity, and in very good condition:
size 5½. wt. 111 9/16 grs.

* * * The reverse of this coin appears to give an unquestionable example of a car drawn by three horses, or triga; a very rare representation on ancient monuments.

14 Another; but dubious
Campania, (uncertain town); ROMA., Mt. p. 128, No. 292
size 4½.

Campania, (uncertain town); ROMANO, Mt. p. 127, No. 281;
well preserved, and rare: size 5. wt. 103 3/16 grs.

Hyrium, in Apulia; usual type, three different: size 5. 6
15 Campania, (uncertain town); obv. ROMANO, laurel'd Head of Apollo, to the left; rev. Horse galloping to the right, above is a star of 16 points: size 5.

Campania, (uncertain town); ROMANO, Mionnet, p. 127, No. 278, but, a Bunch of Grapes behind the head: size 4.

Hyrium, in Apulia; Mt. p. 132, No. 320, very rare type: size 5.

Hyrium, in Apulia; usual type: size 5. 4

16 Hyrium, in Apulia; Mt. p. 132, No. 516; rare, and well preserved: size 6. wt. 97½ grs.

* The lightness of this coin is probably occasioned by its being an ancient forgery. Its specific gravity would prove this.

Campania, (uncertain town); obv. laurel'd Head of Apollo, to the right; rev. ROMA, Horse galloping to the left; fine: size 5. wt. 101½ grs. 2

17 Campania; obv. Female Head to the right, with diadem, earrings, and necklace; under the neck is APTEMI, behind is a small Ceres, seen in front, with a torch in each hand; rev. Head and neck of a Horse to the right, with bridle and peculiar head trappings, on a base, on which are the letters ROMANO; behind, is an ear of wheat; false: size 6. wt. 155½ grs.

* It is painful to see a false coin so well executed as this, and contrived with so much numismatic knowledge. It not only presents us with the type of a new Campanian town (Neapolis) in conjunction with the inscription ROMANO, as might be expected, but also is of a size, and carefully adjusted to a weight, which, though not hitherto known, might very fairly be presumed to exist. Compare the obverse with Mionnet, vol. i. p. 116, No. 153, and the reverse with p. 127, No. 282.

Campania; Uncertain gold coin, purporting to be of this neighbourhood; obv. Head of Bacchus to the right, with wreath of ivy, and berries in front of the head; rev. a Cista, partly covered with a goatskin, against which is placed a thyrsus with tænia; in the exergue, a Samnite inscription; false:

size 5. wt. 131½ grs. 2

* This is the identical coin published by Dominicis, Repertorio Numismatico, vol. 2, p. 417; and was formerly in the collection of the late Dr. Nott. The falsifier seems to have, in part, copied the type of a silver denarius of the Vibius family, see Morell.

18 Campania, (uncertain town); obv. helmeted Head of Mars, to the right; rev. Head and neck of a Horse, to the right, with bridle and head trappings; underneath. ROMA., and behind, a strigil or falx; very good condition: size 3½. wt. 50½ grs.
Another; *Mionnet*, p. 128, No. 291; very fine:

*size 4½*. weight 101 grains.

Another; *Mt.* p. 128, 291: 

*size 4½*.

Hyrium, in Apulia; *Mt.* p. 131, No. 314: *size 5½*. 4

* * * This reverse affords an example of the type being made to have a secondary meaning, as it is evidently indicative of the value of the coin. It will be observed that this coin is half the weight of lot 24; and that it has only half the type on the reverse—namely, half the winged sea horse. See a paper in the Numismatic Journal, vol. 1. p. 116, Note 70.

120 Thurium; Tetradrachm, and Didrachm, usual type, but on the rev. of the Didrachm is ΣΩ. above the Bull tossing, and a Dolphin, to the right, in the exergue; rare: size 6, and size 5. 2

121 Thurium; Tetradrachm, and Didrachm, usual type, but the Head of Minerva on the Tetradrachm is to the left, and under the Bull tossing are six pellets placed in a line; fair condition, and fine work. On the reverse of the Didrachm, the Bull tossing has a K. on the hinder part; fine work: size 6, and size 5. 2

On the Didrachm, the Head of Minerva is to the right, and the helmet ornamented with a wreath of olive; above the shoulder of the Bull tossing is E.; fine old work, and very good preservation: size 4 1/2. weight 122 6/10 grs. 2

Another; but the helmet ornamented with a wreath of olive, and on the _rev._ E. under the tossing bull; _very good work and condition:_ size 5. _weight 123 \(\frac{8}{10}\) grs. 2

**••** It is very rare to find a coin which like this unites the older type of the obverse, with _the bull in the attitude of tossing_ on the reverse. It is usual, with this obverse, to find the bull walking, with the head merely inclined downwards, butting, seen in profile, and in an older style of work. This coin seems to indicate the period of transition from the older style to the more recent.

126. Another; _same type as lot 125_, and _very well preserved:_ size 5. _weight 123 \(\frac{7}{10}\) grs.

Another; the helmet having a wreath of olive, with Φ in front of it; but the reverse having the Bull, to the left, walking and butting, in old style, as usual; under the bull, a very minute and beautiful representation of a dove; _well preserved, and fine old work:_ size 5.

Another; but the Bull to the left, standing and butting:

* * *
The gradual change in the attitude of the bull (the well known symbol of a river on coins) from the quiet position of the animal, with his head turned back, on the primitive coins of Sybaris, down to its violent attitude on the latest coins of Thurium, is very remarkable; and presents an interesting subject of inquiry.

128 Velia, in Lucania; obv. Female Head with necklase, in old style, to the right, the hair turned up behind and tied; rev. YEΑΗΤΕΩΝ (sic.) in the exergue; a Lion running to the right; above is an owl flying; compare Mionnet, Supp. page 325, No. 880; extremely rare type, and very well preserved:

size 3½, weight 65½ₐ grs. 1

136 Bruttii; Mt. page 179, No. 757; very rare, in perfect preservation, and very fine work: size 2. weight 32½ₐ grs. 1

* * * A similar coin is published by Millingen, Ancient Coins of Greek Cities, pl. 1, fig. 24.

139 Bruttii; Mt. p. 150, No. 762; rare, and as fine as it came from the die: size 4½. weight 71 grs. 1

140 Bruttii; like Mt. pl. 65, No. 4; but a vase instead of a bee on the obverse; and a crab instead of a bird on the reverse; a very beautiful coin, in the highest condition:

size 4. weight 74½ₐ grs. 1

141 Another; with a cup behind the head of Juno, on the obverse; and an eagle with wings extended, standing on a thunderbolt, in front of Neptune, on the reverse; as fine as it came from the die:

size 4. weight 74½ₐ grs. 1

142 Another; like Mionnet, pl. 65, fig 4; and very nearly as it came from the die:

size 4. weight 70 grs. 1

143 Bruttii: like Mt. pl. 65, fig. 2; of extreme rarity and beauty, and in very fine condition: size 3. weight 38½ₐ grs. 1
Bruttii; like Mionnet, pl. 65, fig. 3; but with a rudder instead of a torch; extremely rare, and in very beautiful preservation:

size 3. weight $96\frac{3}{10}$ grs. 1

size 8. weight $122\frac{1}{10}$ grs. 1

Crotona; obv. ΨPO. Tripod in relief, and a stork; rev. ΨPOTON, Tripod incuse; a very fine specimen of this very rare variation in the usual type. Not in Mionnet.

size 8. weight $122\frac{2}{10}$ grs. 1

Another; Mt. Supp. p. 338, No. 974; very good condition:

size 8. weight $125\frac{3}{10}$ grs. 1

Crotona; Mt. Supp. p. 340, No. 988; but with a yoke, or uncertain object like a B in the field; see Hunter, tab. 22, fig. 10; most beautiful work; very rare, and in excellent preservation:

size 6. wt. $120\frac{2}{10}$ grs.

Another; Mt. p. 340, No. 988; the head side in still finer condition than that of the preceding coin, and of most beautiful workmanship; on the reverse, the head of Hercules is not visible, nor the latter part of the inscription; but otherwise the coin is most beautiful and perfect, except a small hole, which fortunately has not done great injury:

size 5. weight $120\frac{1}{10}$ grs. 1

Crotona; Mt. p. 191, No. 870; but the inscription is KPOTO, and on the head ornament are alternate winged half griffins and flowers; this most rare and admirable coin is in a perfect state of preservation, both on the obverse and reverse:

size 5. weight $122\frac{6}{10}$ grs. 1

Another; from the same die, but not so well preserved:

size 5. 1

Crotona; Mt. p. 190, No. 864; rev. Hercules strangling the serpents; beautiful work, and rare; in perfect preservation on both sides, and well struck:

size 5. wt. $118\frac{5}{10}$ grs. 1

Another; but of a different style of work, see Hunter, tab. 22, fig. 8; a very beautiful and highly preserved coin, and more rare than the preceding:

size 5. wt. $120\frac{7}{10}$ grs. 1

Another; of the same style of work as lot 152, but not so exquisitely preserved, although a very fine coin:

size 5. 1

Crotona; obv. BOI. an Eagle with both its wings raised, standing, to the right, on a branch of laurel; rev. ΨPOTΩΝ. (sic.)
a Tripod of the form of that in Mionnet, No. 850, p. 189, from which is pendant a knotted fillet, behind it is a branch of laurel; in very good condition, and very rare:

size 6. weight 118 grs.

* * This variation in the well known type appears to be hitherto unpublished.

Crotona; Mt. p. 189, No. 850, and Hunter, tab. 22, fig. 6; well preserved: size 5½. weight 122½ grs. 2

** Mionnet omits to notice the curious and rare circumstance, that on these coins the eagle is standing on part of a Doric architrave.

156 Another; also very well preserved: size 5.

Crotona; Mionnet, pl. 65, fig. 6; a most beautiful coin in very perfect condition: size 5. weight 116½ grs. 2

157 Another; but the position of the letters KPO and the branch of laurel are reversed; as beautiful and well preserved as the preceding: size 5.

Crotona and Pandosia in alliance; Mt. page 197, No. 927; pl. 60, fig. 1; false: size 7½. weight 190½ grs. 2

158 Locri; Mt. page 195, No. 914; obv. Head of Jupiter bearded and laurel'd, to the right, under the neck ΕΕΒΣ; rev. EΙΡΗΝΗ. ΛΟΚΡΩΝ, Female figure holding a caduceus in her extended right hand, seated on a square altar, on which is sculptured a bucranium; good condition, and of extreme rarity: size 5½. weight 110½ grs. 1

159 Locri; Mt. p. 195, No. 906; in the finest condition: size 5. weight 119½ grs.

Locri; obv. ΛΟΚΡΩΝ. helmeted Head of Minerva to the left; rev. Pegasus to the left: size 5. weight 135½ grs. 2

* * The fabric of this coin is peculiar, and the workmanship coarse.

160 Locri; obv. ΛΟΚΡΩΝ. helmeted Head of Minerva to the right; rev. Pegasus to the left; in a state of perfect preservation: size 5. weight 133½ grs.

Another; but no inscription on the obverse, and ΛΟ. under the pegasus; in perfect preservation:

size 5. weight 133½ grs. 2

161 Rhegium; Mt. page 200, No. 955, but the legend of No. 954; the figure is seated and bearded; excessively rare, and in very fine condition: size 6½. weight 265½ grs. 1

* * This coin is like fig. 27, tab. 3, Combe Num. Vet. in Mus. Brit., except that this coin has a laurel leaf in the exergue under the car.
162 Rhegium; Mionnet, pl. 65, fig. 7, exactly; exceedingly difficult to meet with in such very fine condition:

size 8. weight 262\(\frac{9}{16}\) grs. 1

163 Another; but the style of the lion’s head is quite different, as well as the attitude of the figure on the reverse; the inscription is REFINOS; well preserved and rare: size 7. 1

164 Rhegium; obs. [PH]PINOS. Head of Apollo to the left, with a broad wreath of laurel formed of three rows of leaves, and long hair; the legend runs in front of the head; rev. full faced Head of a Lion; in the most perfect state of preservation, and of the finest workmanship:

size 6. weight 261\(\frac{8}{16}\) grs. 1

* * This beautiful coin is probably unique.

165 Rhegium; PHPINON. Mionnet, p. 200, No. 952; extremely rare with this inscription; beautiful work, and in the most perfect preservation: size 6. weight 268\(\frac{3}{16}\) grs. 1

166 Rhegium; PHPINOS. obs. Head of Apollo to the right, crowned with laurel? (serrated leaves), the hair turned up behind like that of a female; behind the head are two laurel leaves, and in front of the neck is the artist’s name, ΠΠΠΟΚ-ΠΑΘΗΣ, in very minute letters, disposed thus ΚΠΑΘΗ; αναφορά, rev. full faced Head of a Lion; compare Magnan. Brutt. tab. 23, fig. 2; very rare, and in perfect preservation:

size 6. weight 267\(\frac{8}{16}\) grs. 1

* * It is very remarkable that Mionnet gives no description of a Tetradrachm of Rhegium of this type, inscribed PHPINOS.

On this coin, and the four following, the wreath on the androgynous head of Apollo is formed of serrated leaves, not laurel? See the note to lot 262, page 39.

167 Another; precisely similar, except that the artist’s name, ΠΠΠΟΚΠΑΘΗΣ, is disposed thus ΟΠΠΠΙ ΚΠΑΘΗ; in very fair condition, and extremely rare: size 6. weight 265\(\frac{5}{16}\) grs. 1

168 Another; without artist’s name, compare Magnan. Brutt. tab. 23, fig. 2; very rare, and in fine condition:

size 5\(\frac{1}{2}\). weight 266\(\frac{1}{16}\) grs. 1

169 Another; different character of face; very rare, and in fine condition:

size 6. weight 258 grs. 1

170 Another; in excellent preservation, and very rare:

size 5\(\frac{1}{2}\). weight 264\(\frac{7}{16}\) grs. 1

* * The rarity of these coins seems contradicted by their number; but, as before said, there is no mention of this type and size in Mionnet,
with Phrinos, and in the Hunter Collection there is not one. In Combe Vet. Num. in Mus. Brit. there is only mention of one.

It may be here hinted to the young Collector, that his notions of rarity must not be drawn from the coins forming this princely collection: it being its peculiar characteristic, that it will often be found to possess the most rare coins in the greatest variety and abundance, to the utter exclusion, with few exceptions, of common coins, except they have the merit (in itself so rare) of extraordinary beauty of workmanship, or superlative preservation.

It should, moreover, be kept in mind, that this Collection is the result of nearly fifty years' unwearied devotion to the acquisition of the most rare coins, which, during that long period, have been offered for public sale in London.

171 Rhegium; compare Dumersan, pl. 1, fig. 15; but see Hunter, tab. 44, fig. 16; very rare, fine old work, and in a perfect state of preservation: size 2½. weight 65 9/10 grs. 1

172 Another; it requires a judicious cleaning: size 3½.

Rhegium; Hunter, tab. 44, fig. 18; rare, and in very perfect state: size 2½. weight 31 9/10 grs.

Another; with slight difference; in fair condition: size 2½

Rhegium; Phrinos, exactly like lot 165, but size 3; in very fair condition: 4

173 Terina; Hunter, tab. 58, fig. 2; rare, and a most exquisite coin in every respect: size 5. weight 123 9/10 grs. 1

174 Terina; obv. female Head, to the right, the hair arranged like that of Venus, within a wreath; behind, Φ; rev. TEPINAION, winged Female seated on a vase, to the right, holding in one hand a caduceus, and on the other a dove; near the mouth of the vase, a flower is springing up from the earth. This magnificent and rare coin cannot be sufficiently admired, whether for the design, execution, or preservation: size 5½. weight 120 1/10 grs. 1

175 Terina; the type is similar to that engraved plate 2, fig. 3, of Millingen's Ancient Coins of Greek Cities and Kings; rare, and a most exquisite and perfect coin in every respect: size 5½. weight 120 3/10 grs. 1

*.* It is remarkable that the obverse of this coin is from the same dye as the obverse of lot 173, but the reverses are different.

176 Terina; Hunter, tab. 58, fig. 1; a very beautiful coin, in very fine state: size 5.

Terina; obv. female Head, to the left; the hair like that of Diana, within a wreath; rev. TEPINAION, winged Female,
seated, to the left, on a vase, and holding a wreath in her extended right hand; *in perfect condition, and rare:*

\]

178 Another; same type, and equally beautiful:

\[
\text{size } 5. \text{ weight } 117 \text{ grs.}
\]

Terina; *obv. TEPIN. (sic), female Head, to the right; rev. winged female Figure, seated on an altar, to the right, holding a wreath on her knee; fine work, and in very fair preservation:*

These coins may belong rather to Veretum, a city of the Salentines, in Japygia, on account of their resemblance to the coins of Uxentum, a town only fifteen miles distant from Veretum: as suggested by Millingen, page 15, Sylloge of Unedited Coins of Greek Cities, &c. 4to., London, 1837; and also at page 241 of his Considerations sur la Numismatique de l'Ancienne Italie, 8vo., Florence, 1841, a work which cannot be too highly appreciated, as a most valuable and sound critical inquiry into the classification of the coins of Italy.

CITIES OF SICILY, IN SILVER.

* * * Among the various rare and beautiful coins of Sicily in this princely Collection, are many which possess peculiarities of type, of which the rarity cannot be positively determined, for want of time for reference. Hence, many peculiarities specified as rare, or very rare, may be found to be, in fact, unique.

248 Abacaenum; Hunter, tab. 1, fig. 4, Mionnet, p. 357, No. 4; extremely rare, and well preserved:

size 2. weight $12^{14}_{10}$ grs.

GOLD COIN OF AGRIGENTUM.

Agrigentum; Mionnet, Supp. page 360, No. 17, and Torremuzza, tab. 4, fig. 1; perfect condition (false):

size 3. weight $38^{14}_{10}$ grs. 2

* * * There is no doubt that this coin is false. The weight is wrong, and the style of the work and of the design afford further proof against it. It is one of the oldest fabrications extant; a gold coin, evidently from the same die, having been first published by Goltzius in 1576, and by Paruta in 1612.

This magnificent coin is in most perfect preservation, and of extraordinary rarity:

size 6\(\frac{1}{2}\). weight 133\(\frac{1}{10}\) grs. 1
257 Camarina; Mt. Supp. p. 375, No. 125; Torremuzza, tab. 17, fig. 5; but on this coin there is the unpublished? peculiarity of the name, ΕΞΑΚΕΣΤΙΔΑΣ, in very minute letters, on the band above the two vases, forming the exergue of the coin; very beautiful work, very good condition, and of extreme rarity:
size 7. weight 264\(\frac{4}{10}\) grs. 1
Mionnet describes the charioteer as Guerrier casqué, but it is a female wearing a helmet. (Minerva,) as proved by the smaller coins.

258 Another; from the same die, both on obverse and reverse, but not quite in such good state as the preceding, and the female charioteer rather blurred, but still a very fine coin:
size 7. weight 264 grs. 1
259 Another; Mionnet, p. 223, No. 121, and Hunter, tab. 14, fig. 7; but the inscription not retrograde, and with the same female charioteer wearing a helmet, not an old male figure, as engraved: see Torremuzza, tab. 17, fig. 2; very rare, and very fair preservation:
size 7. weight 267\(\frac{3}{10}\) grs. 1
The head of Hercules on this coin is in older style than on the preceding, and bearded.

260 Camarina; Mt. p. 222, No. 112; Torremuzza, pl. 18, fig. 8; fine:
size 2. weight 12 grs.
Catana; Mt. p. 226, No. 154; Torremuzza, pl. 21, fig. 15; very fine:
size 2. weight 11\(\frac{1}{10}\) grs. 2
261 Camarina; same as in the preceding lot.
Catana; obv. Head of Silenus to the left; rev. K.A. Thunderbolt and two bucklers; this minute coin is in a perfect state
of preservation, and presumed to be unique, and unpublished:

\[ \text{size } \frac{1}{4}. \text{ weight } 2\frac{1}{16} \text{ grs.} \]

262 Catana; Mionnet, Supp. p. 378, No. 149; Hunter, tab. 15, fig. 21; Torremuzza, auctarium I. tab. 3, fig. 1; obv. Androgynous Head of Apollo, full faced, crowned with a wreath formed of serrated leaves, (not laurel?) and his hair falling down on each side like that of a female; in the field to the left is a bow, and the word XOIPEIN. in minute letters, probably the name of the artist; to the right is a lyre of peculiar form, partially hidden by the hair; under the neck, in minute letters, ΑΠΟΔΑΩΝ.; rev. in the exergue ΚΑΤΑΝΑΙΩΝ.; a Quadriga at full speed to the right, driven by a female; above is a floating winged female, about to crown the charioteer; in the field is a fluted Ionic column; in the exergue, a shrimp; fine work, of the utmost rarity, and in very excellent condition:

\[ \text{size } 7\frac{1}{2}. \text{ wt. } 264\frac{5}{16} \text{ grs.} \]

* * This coin, by its superior condition, corrects the reading of Combe XOIPEIN. His description of the head of Apollo as caput muliebre has been already corrected by Torremuzza, (Auct. ad. sic. Numism. p. 8.) and by Eckhel, who merely give the coin on Combe's authority. If on that in the Hunter Cabinet there really be no lyre in the field, to the right of the head of Apollo, this coin, in that curious particular, is probably unique, as well as the specimen in the Hunter Collection.

The androgynous Apollo, above described, recurs often on the tetradrachms of Rhegium, (see note to lot 166, p. 25) on some of which, as on this coin, the leaves ornamenting the head of the god are also serrated like the arbutus. This has led Combe to describe the head as coronâ querccâ ornatis. See Hunter, page 87, No. 1.

263 Catana; Mionnet, p. 226, No. 150; Hunter, tab. 15, fig. 22; Torremuzza, tab. 20, fig. 1; a very fine coin, in the highest state of preservation, and of extreme rarity:

\[ \text{size 7. wt. } 267\frac{3}{16} \text{ grs.} \]

* * Combe reads the artist's name ΗΡΑΚΛΕΙΑΙ; Torremuzza, as well as Mionnet, read ΗΡΑΚΛΕΙΔΑΣ. The latter is probably the true reading. On this coin it certainly appears like ΗΡΑΚΛΕΙΑΙ, but the letters are rather blurred from slight fractures in the die. On this coin the leaves on the head of Apollo are not serrated.

264 Catana; obv. ΚΑ[ΤΑΝΑΙΟΣ.] Head of Apollo to the right, with laurel wreath in front, the hair adjusted behind like that of a female; behind the head is a fish; rev. Biga to the right, with a male charioteer holding a wand; above, a floating winged female figure is about to crown the horses; in the exergue is a small shrimp (squilla fluviatilis); compare
Torremuzza, tab. 21, fig. 2; exquisite old work, and very fine condition: size 7. weight 266$\frac{3}{10}$ grs. 1

265 Another; obv. KATANAION. but nothing behind the head; a very fair coin, but inferior work and condition to the preceding: size 7. weight 268$\frac{8}{10}$ grs. 1

266 Catana; obv. KATANAION. Head of Apollo to the left, the hair short and without any ornament, or laurel, but like that of a female; rev. a Quadriga, to the left, at full speed, a floating winged female figure above is about to crown the male charioteer; extremely rare type, very fine work, and very good condition: size 6. weight 264 grs. 1

267 Catana; obv. KATANAION. Head of Apollo to the right, the hair short, but with a triple wreath of laurel in front; rev. in the exergue, KATANAION. a Quadriga at full speed to the left, a floating winged female figure above is about to crown the male charioteer; extremely rare type, very fine work, and very good condition: size 6$\frac{1}{2}$. wt. 263$\frac{3}{10}$ grs. 1

268 Catana; Mionnet, p. 226, No. 155; but the head to the right:

* Catana; Mt. Supp. p. 378, No. 150; Hunter, tab. 16, fig. 1; rare, and in very fine preservation: size 4. wt. 65$\frac{8}{10}$ grs.

* The fine preservation of this latter coin corrects Combe's accurate description. The artist had in fact omitted the second N in ΑΜΕΝΑΝΟΣ, and the final N in ΚΑΤΑΝΑΙΩΝ; but this coin shews that he rectified his mistakes as well as he could, by inserting the omitted letters.

Enna; obv. ΑΜΑΜΑΤΗΡ. Head of Ceres, ornamented with wreath of corn, to the right; rev. ENNAIΩN. Bull's head, seen nearly full face; above it, between the horns, is a grain of barley; and below it, a blade of bearded wheat; in the exergue, a torch: compare Torremuzza, tab. 28, fig. 7; fine work, very good condition, and unpublished in silver; but not free from doubt as to its authenticity:

size 5. weight 129$\frac{8}{10}$ grs. 3

GOLD COINS OF GELAS.

269 Gelas; ΣΩΣΙΠΟΛΙΣ. Mionnet, Supp. p. 387, No. 196; Torr. tab. 31, fig. 1; fine condition, and of extreme rarity:

size 1$\frac{1}{2}$. weight 13$\frac{1}{10}$ grs. 1

* The other coin with ΣΩΣΙΠΟΛΙΣ, published by Torremuzza, auct. 2, tab. 2, fig. 1; Mionnet, Supp. p. 387, No. 197, occasions a suspicion as to the authenticity of this.
270 Gelas; _obv. ΤΕΔΕΑΣ_. the forepart of a Bull with a human face, to the left; underneath is a grain of barley; _rev._ Horseman to the right, holding a lance: compare Mionnet, p. 236, No. 226, and Torremuzza, tab. 31, fig. 2; _fine preservation, and of extreme rarity, but not of certain authenticity_:  

size $2\frac{1}{2}$. weight $16 \frac{7}{10}$ grs.  

CITIES OF SICILY, IN SILVER. (Continued.)

271 Gelas; _Torremuzza_, auct. I, tab. 4, fig. 2; but the bull with the human face is to the right; see Hunter, tab. 28, fig. 6; _very fine condition_:  

size $8\frac{1}{2}$. weight $269 \frac{6}{10}$ grs. 1

* * This coin shews in a very remarkable degree, on the edge, the peculiarity of the Sicilian style of minting.

272 Another; older style. ΤΕΔΕΑΣ (retrograde); _very fine_:  

size 7. weight $262 \frac{4}{10}$ grs. 1

273 Another; very similar, CEΔΕΑΣ.; _very sharp and fine, particularly the reverse_:  

size 7. weight $267 \frac{5}{10}$ grs. 1

274 Another; _Torremuzza_, tab. 31, fig. 12; Hunter, tab. 28, fig. 5; but with the long beard; _older style than either of the preceding, obverse and reverse well preserved_:  

size 6. weight $270 \frac{7}{10}$ grs.

Gelas; _Mionnet, Supp._ p. 389, No. 213; _Torremuzza_, tab. 31, fig. 4; Hunter, tab. 28, fig. 13; but the bearded head ornamented with corn; _of excessive rarity, but middling condition_:  

size $1\frac{2}{3}$. 2

* * It was, no doubt, the bad condition of the coin in the Hunter Cabinet, which occasioned Combe to describe the bearded male head as _laureated_. See the reverse of the beautiful brass coin of this town, lot 538.

275 Himera; _Mt._ p. 241, No. 267; _Torr._ tab. 35, fig. 5; but with a grain of barley in the field on the obverse; _of excessive rarity; obverse in very fair condition; reverse middling_:  

size 7. weight $264$ grs. 1

* * Combe, in describing the obverse of a coin very similar to this, tab. 30, fig. 18, says _aram igniferam_, and Mionnet also says, p. 241, No. 267, _autel allumé_, but on this coin it appears like a stela.

276 Himera; _obv. V_ Cock to the right; _rev._ Four incuse triangles, and four in relief, forming a square; _Torr._ auct. 1, tab. 4, fig. 2; compare _Mt._ pl. 39, fig. 10; _very fine condition, and rare_:  

size 5. weight $88 \frac{5}{10}$ grs.

Himera; with two letters on both sides, _Mionnet, Supp._ page 155.
392, No. 230; Torremuzza, auct. 2, tab. 3, fig. 3; rare, and in very fine condition: size 5. weight 89 \( \frac{1}{2} \) grs. 2

* The remote antiquity of these early coins of Himera may be safely inferred, from their being among the few Sicilian coins which are adjusted to the Αeginetan Talent, like those of Zancle. These two are Didrachms of that talent. In each of the two following lots is a later coin, with a crab on the reverse, which probably may indicate an alliance between Himera and Agrigentum. These later coins, being Didrachms of the Attic talent, show that some early and important political change had taken place, and occasioned an alteration in the public standard of the money of Himera. The Tetradrachm, lot 275, though an old coin, is also of the Attic standard.

277 Himera; with the letter V, Mionnet, p. 240, No. 259, and compare Torremuzza, auct. 2, tab. 3, fig. 3; in very fair preservation: size 4\( \frac{1}{2} \). weight 89 \( \frac{1}{2} \) grs.

Himera; (rev. Crab) Mt. p. 240, No. 261; Torr. tab. 36, fig. 1; very good condition, and rarer than the preceding: size 5. weight 130 \( \frac{1}{2} \) grs. 2

* * The first coin being adjusted to the Αeginetan Talent, and the latter to the Attic.

278 Himera; compare Mt. Supp. p. 392, No. 230; but the cock on the obverse is turned to the right, and there are two pellets in the field; in very fine preservation:

size 4. weight 88 \( \frac{1}{2} \) grs.

Himera; (rev. Crab) Mt. p. 240, No. 261; Torr. tab. 36, fig. 1; very fine condition, and more rare than the preceding: size 4\( \frac{1}{2} \). weight 132 \( \frac{1}{2} \) grs. 2

* * This coin is an Attic Didrachm, and the preceding an Αeginetan Drachm.

279 Himera; compare Mt. p. 240, No. 264, and Torr. tab. 35, fig. 9 and 10; compare also Mt. Supp. p. 393, No. 235, and Hunter, tab. 30, fig. 20; obv. [IME]PAION. naked old Faun riding on a goat to the right, holding a rhyton to his mouth; rev. NIKA. winged and draped Victory advancing to the left, with a palm branch in her extended right hand; in the field, an uncertain object, appearing like a wavy line, query a vine? of most extreme rarity; not in the French collection; fair condition, though rubbed: size 3.

* * The rarity of this coin, and the want of condition when found, has probably been the cause of the erroneous descriptions above quoted.

Himera; Mt. p. 240, No. 265; Torr. tab. 35, fig. 11:

size 2.
Uncertain;  _obv._ Head of Diana to the right, (compare Mion-net, _Supp._ vol. 6, pl. 3, fig. 2);  _rev._ ΝΗΥΠΙΔΑΥΣ? ΙΜΕ- ΠΑΙΟΣ? naked Male Figure, the lower part draped, seated on a rock, seen almost in front, a long staff in his right hand:

size 3 3/4.  3

*** This uncertain coin seems to be unpublished.  Its rubbed and middling condition is much to be regretted, as well as an unpleasant sandy appearance on both sides.  It has however interest, as a cast, till the coin be known from which it was taken.

WITH THE NAME OF THERMÆ.

280 Thermae;  _obv._ ΘΕΠΜΙΤΑΝ. Female Head to the right, with a raised tiara ornamented with three half griffins, and long flowing hair, (like Juno on the coins of Argos); behind the head is a dolphin;  _rev._ Hercules, youthful and naked, holding his club in his right hand, sitting on a rock, which is partly covered with the lion’s skin; in the field behind him is his bow and quiver; unpublished, and presumed to be unique; fine work, and very well preserved, except that the back part of the head of Juno has suffered somewhat from oxide:

size 6.  weight 129 3/16 grs.  1

*** The type is almost the same as on the small coins published by Hunter, tab. 59, fig. 8, and Torremuzza, tab. 90, fig. 4;  Mionnet, p. 242, No. 279.

281 Leontini;  _obv._ ΛΕΟΝΤΙΝΩΝ. Lion’s Head in profile, to the right, surrounded by four grains of barley;  _rev._ Triga, in slow motion, driven by a draped and bearded male figure; above is a floating winged female about to crown the horses; compare Torremuzza, tab. 39, fig. 10; fine old work, and very rare in such beautiful condition:

size 6 1/2.  wt. 271 3/16 grs.  1

*** It is very remarkable that Mionnet should have described only one coin of this type, (as a biga) and that has a truncated inscription—see No. 330, p. 247.  In the Hunter collection there are only two.

282 Another; but the letters surround the four grains of barley, in the midst of which is the lion’s head, in profile, to the right, as usual; perfect preservation on both sides, and a very fine coin as to workmanship:  size 6 1/2.  weight 268 3/16 grs.  1

283 Another; but the letters are within the four grains of barley; rare, and in fine condition:

size 6 1/2.  1
284. Leontini; _obv._ VEONTINON. Head of Apollo to the right, with the hair of female character, and wreath of laurel; around are placed three laurel leaves, and a lion to the right underneath; _rev._ Female conducting a trigra to the right; above, a winged female is about to crown her; in the exergue, is a lion running to the right; see Havercamp, tab. 95, fig. 1; excessively rare, and in very fine condition:

size 7. weight 267$\frac{3}{10}$ grs. 1

285. Another; from the same die on the obverse, but not on the reverse; not so well struck, or so well preserved as the preceding:

size 7. 1

286. Leontini; _obv._ Head of Apollo, hair of female character, to the left, with laurel wreath; _rev._ VEONTINON. Lion’s head, in profile, to the right, surrounded by three grains of barley, and a fish underneath, in place of the fourth grain; fine and very rare type:

size 6$\frac{3}{5}$. 1

287. Leontini; Mionnet, p. 246, No. 318; different character of head to the right, and finer work than usual; fine condition, and very rare:

size 7$\frac{1}{2}$. weight 264$\frac{3}{10}$ grs. 1

288. Another; with a tripod behind the lion’s head in place of the fourth grain of barley; see Torr. tab. 39, fig. 5; extremely rare, and in good condition:

size 6. 1

289. Another; but without the tripod; very sharp and well preserved, especially on the reverse: size 7. wt. 270$\frac{1}{10}$ grs. 1

290. Another; very well preserved: size 6. wt. 264$\frac{9}{10}$ grs. 1

Leontini; Torr. tab. 39, fig. 1; in very fine condition, but false:

size 7. weight 255$\frac{9}{10}$ grs. 2

** This coin is curious, as a very fine specimen of one of the oldest fabrications extant, having been published by Golzius in 1576, and by Paruta in 1612. It may be presumed that the prototype of this singular fancy, was a coin similar to that engraved in Mionnet, vol. vii. pl. 66, fig. 7.

291. Leontini; _Mt._ p. 246, No. 315; Torr. tab. 40, fig. 13; beautifully preserved:

size 2. weight 13$\frac{1}{10}$ grs.

Leontini; AEONTINO. (sic) retrograde; _Mt._ p. 247, No. 331;
Torr. tab. 40, fig. 2; extremely well preserved, and rare of this size (Didrachm):

size 5. weight 134$\frac{1}{10}$ grs. 2

292. Another; (Didrachm) like the preceding, and well preserved.

Leontini; _Mt._ p. 246, No. 316; Torr. tab. 40, fig. 10; on the altar K retrograde; beautifully preserved, and rare.

size 2. weight 12$\frac{3}{10}$ grs.
Zancle; compare with Mionnet, pl. 47, fig. 5, and Hunter, tab. 37, fig. 2; in very fine condition, and very rare, but the absence of certain peculiarities in the type of the reverse, which are always observable on these coins, gives rise to suspicion that this not genuine: size $5\frac{1}{2}$. wt. $88\frac{9}{16}$ grs. 3

293 Messana; Torremuzza, tab. 46, fig. 4; under the hare is the head of Pan to the right; very fine, and very rare:

size 7. weight $265\frac{1}{16}$ grs. 1

294 Another; Torr. tab. 46, fig. 15; under the hare is an eagle devouring a serpent, to the left; extremely rare and fine:

size $6\frac{1}{2}$. weight $263\frac{5}{16}$ grs. 1

(Continued at page 54.)

GOLD COINS OF THE CARTHAGINIANS, ATTRIBUTED TO PANORMUS.

* * * The greater part, if not the whole, of these coins belong to Carthage, and would be more properly classed there. It is not so evident that the gold coins of the Carthaginians were struck in Sicily, as it is that a large proportion of those of silver are of Sicilian mintage.

295 Panormus; Mionnet, page 265, No. 463; Pellerin Recueil, pl. 88, fig. 4; extremely rare, and in good preservation:

size $5\frac{1}{4}$. weight $165\frac{3}{16}$ grs. 1

296 Another; in better preservation, but a little battered at the edge:

size $5\frac{1}{2}$. weight $164\frac{4}{16}$ grs. 1

* * * These coins appear to be Tridrachms of the Alexandrian talent, and to have been struck at Carthage.

297 Panormus; Mt. p. 265, No. 455; Pell. Rec. pl. 88, fig. 5; exquisite preservation, and fine work:

size $4\frac{1}{4}$. weight $145\frac{6}{16}$ grs. 1

298 Another; as well preserved, but a very slight blow on the hind legs of the horse:

size 4. weight $142\frac{6}{16}$ grs. 1

299 Another; but the ears of corn rather more separated, and the horse stands on a dotted line or base, supported at one end by the minute head of a goat, and at the other by an eye; in the field, near the feet of the horse, are three minute pellets; fine work, and beautiful condition:

size $4\frac{1}{4}$. weight $145\frac{2}{16}$ grs. 1

* * * This peculiarity renders this coin very interesting, and probably unique.
300 Another; but without those peculiarities; the head larger, and not surrounded by a circle of dots; fine work, and condition:
size 4. weight $117\frac{1}{10}$ grs. 1

The weight of this coin is remarkable, being the Didrachm of the Tyrian or Phoenician talent, and probably struck at Carthage.

CITIES OF SICILY, IN SILVER. (Continued from page 45.)

LOT

363 Messana; Torremuzza, tab. 47, fig. 6; on the obv. a sprig of laurel in the exergue, and the Victory elegantly dancing on the reins and pole of the biga; very rare, and well preserved: size 6½. weight 265½ grs. 1

364 Another; Torr. tab. 46, fig. 1; Mt. p. 255, No. 384; MEXIANION, in exergue, blade of corn under the hare, and Eagle above; well preserved, and rare: size 6½. 1

365 Another; Mionnet, p. 255, No. 383; but with the inscription retrograde, and the head of Pan to the left, under the hare; very good condition, and very rare: size 6½. 1

366 Another; Mt. p. 254, No. 378; but the car is drawn by one horse; in very good condition: size 7. wt. 264½ gvs. 1

367 Morgantia; compare Mt. Supp. p. 406, No. 307; Hunter, tab. 38, fig. 12; and Torr. tab. 51, fig. 2; obr. MOPPANTINΩΝ, Minerva with triple crested helmet, seen full face; rev. MOPPANTINΩΝ, winged and draped Female, seated to the left, holding a wreath in her extended right hand; underneath is a dolphin, to the right; very fine work, and very good condition, but a little blurred by black oxide; of extreme rarity: size 2. weight 14½ gvs.

* * * On this coin, the figure is decidedly not seated on the prow of a vessel; neither is it apparent on what she is seated. Certain wavy lines under the figure, seem to indicate a rock, or the sea shore; the sea itself being symbolized by the dolphin underneath. Combe's coin is probably the same, but not well preserved.
Motya; Torremuzza, tab. 52, fig. 1; Mionnet, Supp. p. 407, No. 316; fine condition, but false:

size 6. weight 149 grs. 2

* * * This is another of the older fabrications.

368 Naxus; compare Mt. p. 262, No. 438, and Hunter, tab. 39, fig. 15, but the legend of this coin is not retrograde; very fine condition, and of extreme rarity, but not free from suspicion:

size 4½. weight 89 grs. 1

369 Naxus; Torr. Auct. 2, tab. 4, fig. 1; Combe, Mus. Brit. tab. 4, fig. 8; a remarkably fine and undoubted coin, in the highest preservation, and of extreme rarity:

size 7½. weight 265½ grs. 1

370 Another; from the same die, obverse and reverse, and in the same extraordinary preservation:

size 7½. wt. 268½ grs. 1 2/10

* * * The erroneous notion, to be found in the works of some of the older authors, that no instance ever occurred of two genuine Greek coins from the same die, is corrected by modern experience and observation. This cabinet alone furnishes abundant proof to the contrary.

371 Naxus; Mt. vol. vii. pl. 66, fig. 3; Supp. p. 408, No. 319: but the Silenus, or rather the old faun, is sitting near a plant of ivy instead of a cep de vigne, and holding a thyrsus instead of une palme; compare Torr. tab. 53, fig. 1; a most beautiful coin, in the highest condition, and of the utmost rarity:

size 7. weight 260½ grs. 1

372 Another; the head from the same die as the preceding coin, but not the reverse, although it is exactly of the same type; in the same beautiful state as the preceding coin:

size 7. weight 267½ grs. 1 1/10

373 Another; in the same beautiful condition, but not free from suspicion:

size 7½. weight 254½ grs. 1

374 Naxus; Torr. tab. 53, fig. 6; not in Mt. obv. NAΣΙΩΝ, Head of Apollo laureate, to the right, the hair like that of a female; behind, is a laurel leaf and berry; rev. an old faun sitting, looking to the left towards a diota in his right hand, in his left is a thyrsus; in the field, to the left, is an ivy plant, and to the right, a priapic terminus; of most extreme rarity; fine old work, and in fine preservation:

size 5. weight 129½ grs. 1

375 Naxus; not in Torr. or Mt.; obv. approaching to Torr. Auct. 2, tab. 4, fig. 1; rev. NAXION, somewhat similar also,
but the old faun in a different position; fine old work, splendid condition, and of the utmost rarity:

size 4. weight $65\frac{9}{10}$ grs. 1

•• This Drachm, in style and age, corresponds precisely to the Tetradrachms forming lots 369 and 370.

376 Another; from the same die on both sides; not quite so well preserved, but a very fine coin: size 4. wt. 67 grs. 1

377 Naxus; compare Mt. Supp. p. 409, No. 329; Torr. tab. 53, fig. 5; obv. ΑΣΧΙΝΟΣ.; rev. ΝΑΞΙΩΝ.; of excessive rarity, and in excellent condition, but with a thin coating of black oxide:

size $2\frac{1}{2}$. weight $31\frac{3}{10}$ grs. 1

GOLD COINS OF THE CARTHAGINIANS, ATTRIBUTED TO PANORMUS. (Continued from page 46.)

378 Panormus; obv. same head as on lot 297; rev. Horse standing, to the right, before a palm tree; fine work, very well preserved, and of extreme rarity:

size $2\frac{1}{2}$. weight $71\frac{5}{10}$ grs. 1

•• This coin, evidently the half size of the coins forming lots 297, 298, and 299, is presumed to be unpublished.

379 Panormus; obv. same style of head as lot 295; rev. Horse trotting to the right; presumed to be a very rare variation in the type of these coins: size 3. weight $43\frac{5}{10}$ grs.

Panormus; obv. Horse's head, to the right; rev. Palm Tree, with dates; fine:

size $\frac{3}{2}$. weight $13\frac{1}{10}$ grs. 2

380 Panormus; Mt. p. 265, No. 456; Hunter, tab 14, fig. 20; fine preservation:

size $1\frac{3}{2}$. weight $26\frac{5}{10}$ grs.

Panormus; Mt. p. 265, No. 461; as it came from the die:

size $\frac{3}{2}$. weight $12\frac{6}{10}$ grs.

Panormus? obv. Head of Minerva, to the right, with helmet; rev. ΠΑ. (in monog.) Owl to the right; see Hunter, tab. 41, fig. 1; in good preservation, and very rare:

size $\frac{1}{2}$. weight $8\frac{1}{10}$ grs.

Panormus; two false; Torremuzza, tab. 55, fig. 1:

weight $19\frac{5}{10}$ grs. and 21 grs. 5

DODECADRACHM, OR LARGE MEDALLION, OF THE CARTHAGINIANS, IN SILVER.

•• This coin, which is a Dodecadrachm, should not be confused with the smaller medallions, or Decadrachms, of Carthage, of the usual size,
and weighing about 575 to 580 grains troy, with the pegasus, and four Punic letters, on the reverse: engraved in Mionnet, vol. vii. pl. 66, fig. 4; and Pellerin, Recueil, pl. 88, fig. 6.

381 Carthage; obv. a Female Head, ornamented with ears of corn, to the left, like Mionnet, vol. vii. pl. 66, fig. 4; rev. no Punic letters; a Horse galloping to the left, in very low relief; not in Mionnet; fine work, in perfect preservation; of the very highest degree of rarity, if not unique, and presumed to be unpublished:

size 11. weight \(701\frac{3}{10}\) grs.

** This beautiful and remarkable coin was most probably struck at Carthage. It is the heaviest hitherto known in the Greek series, being a Dodecadrachm of the Tyrian, or Phoenician talent. The Drachm of this very ancient talent therefore weighed 58 to 59 grains; and the Tetradrachms (with dates) of Aradus (a Phoenician city and island), weighing 235 grains, among those of many other cities of Asia and Africa, furnish us perhaps with the latest examples of the same Drachm and talent.

There is in the British Museum a most rare Hexadrachm of Berenice, wife of Ptolemy III., from the cabinet of Mr. Burgon, which, though a little rubbed, weighs \(326\frac{1}{4}\) grains. Its full weight would have been 330 to 333 grains, being a Hexadrachm of the Egyptian or Alexandrian talent, of which the Drachm weighed \(54\frac{1}{2}\) to \(55\frac{1}{2}\) grains. The existence of this Hexadrachm, proves, not only the probable existence of Dodecadrachs, but the two coins taken together, render it extremely probable that the old Tyrian or Phoenician talent, merged during the sway of the Ptolemies, into the talent of Egypt.

** SILVER COINS OF THE CARTHAGINIANS, ASCRIBED TO DIONYSIUS II.**

** It is well known that many of the following coins, ascribed to Dionysius, and to Panormus, by the early writers, belong in fact to Carthage, and would be more properly classed there. It may be presumed, however, that those of very fine work, and of the Sicilian style of mintage, were struck at Panormus, and other cities of Sicily, which were occupied by the Carthaginians. A knowledge of the Punic inscriptions, can alone lead to the correct classification of these coins. It is deeply to be regretted that the learned Gesenius was not aided by a competent numismatist, in his researches into this subject; as his valuable work, entitled *Scripturae Linguae Phoenicae Monumenta, &c.* Lipsiae, 1837, 4to. appears to be the nearest approximation to an explanation of the Punic inscriptions on this most interesting class of coins. See *Journal des Savans*, 1838; an article by M. Etienne Quatremeré on this learned work.

382 Panormus, ascribed to Dionysius II.; *Torremuzza, Auct. 2*, tab. 9, fig. 2; obv. Horse galloping to the right, a winged
female is floating above, and about to crown the animal with a wreath; rev. Palm Tree with dates; most beautiful work, in perfect condition, and of the utmost degree of rarity:

\[ \text{size } 6\frac{1}{2}, \text{ weight } 260\frac{1}{10} \text{ grs.} \]

383 Another, of this class; Mt. Supp. page 455, No. 20; Torr. Auct. 2, tab. 9, fig. 1; fine work, perfect condition, and extreme rarity:

\[ \text{size } 6\frac{1}{2}, \text{ weight } 265\frac{5}{10} \text{ grs.} \]

384 Another, like the last; but the type of the obverse is exactly reversed, the half horse being to the right; coarser work, and not in such condition as the last, though a very fair coin, and of extreme rarity:

\[ \text{size } 7, \text{ weight } 267\frac{5}{10} \text{ grs.} \]

SILVER COINS OF THE CARTHAGINIANS, ASCRIBED TO PANORMUS.

*:* The use of the word Another, in describing these coins, implies not only the same type, but the same Punic letters, except when specified to the contrary.

385 Panormus; Mionnet, p. 267, No. 481; Combe, Brit. Mus. p. 73, No. 33; rather second rate workmanship, very fine preservation, and extremely rare:

\[ \text{size } 8, \text{ weight } 266\frac{3}{10} \text{ grs.} \]

386 Another; very well preserved:

\[ \text{size } 6\frac{1}{2}, \text{ weight } 260\frac{8}{10} \text{ grs.} \]

387 Another; but the hair without the wreath of corn, and a broad band in front; rev. the car to the left, and a caduceus in front of the horses; the same Punic letters in the exergue, under the car; inferior work, but very fine condition, and of extreme rarity:

\[ \text{size } 7, \text{ weight } 260\frac{5}{10} \text{ grs.} \]

388 Another; Mt. p. 268, No. 484; very beautiful work, especially on the reverse; perfect condition, and extreme rarity:

\[ \text{size } 6\frac{1}{2}, \text{ weight } 253\frac{8}{10} \text{ grs.} \]

389 Panormus; obr. Female Head, with wreath of corn, to the left, surrounded by four dolphins; rev. Horse galloping, to left, passing a palm tree bearing dates; not in Mionnet; very beautiful work, of excessive rarity, and in perfect preservation:

\[ \text{size } 7, \text{ weight } 262\frac{7}{10} \text{ grs.} \]

390 Panormus; obr. same head, to the right, but without dolphins; in front is a candelabrum; rev. Horse trotting, to the right, passing a palm tree bearing dates; near his head is a floating winged female figure, about to crown him; in the field, in
front, is a caduceus, and two Punic letters near the horse's feet; presumed to be unpublished and unique; fine work and condition:  
size 6½. weight 267½ grs. 1

391 Another; but the head to the left, and no accessory symbol; rev. Horse trotting to the left, passing a palm tree bearing dates; very rare, good work and condition:  
size 6. weight 262½ grs. 1

392 Another; the ends of four Punic letters are visible behind the head; very rare, good work and condition:  
size 6. weight 260½ grs. 1

393 Another; a dolphin behind the head, and the hair disposed quite differently, but with the blade of corn; rev. the same, but the horse standing to the right, and in the field a crescent behind; rather inferior work, fine condition, and very rare:  
size 6½. weight 265½ grs. 1

(Continued at page 69.)

GOLD COINS OF SYRACUSE.

394 Syracuse; Mionnet, Supp. p. 426, No. 473; Torremuzza, tab. 68, fig. 4; Hunter, tab. 52, fig. 4; but instead of a lyre, there is a bow behind the Diana, and also behind the Apollo; a most rare and elegant coin, in perfect preservation:  
size 4½. weight 105½ grs. 1

* * * It appears from Mionnet that this coin does not exist in the French collection. There is only one in that of Hunter.

395 Another; but having a tripod behind the Apollo, and also behind the Diana:  
size 4½. weight 109½ grs. 1

* * * This appears to be an unpublished variety of this extremely rare and most elegant coin. The perfect condition of this, is fully equal to that of the preceding, if it does not surpass it.

396 Syracuse; Mt. vol. vii. pl. 67, fig. 2; but behind the head is a grain of barley, and also under the Hercules is a grain of barley:  
size 3. weight 89½ grs. 1

* * * This most happy effort of Greek art, is in remarkably high relief, and in most perfect preservation. Its rarity as a coin need not be pointed out.

397 Syracuse; Mt. p. 289, No. 690; but no Σ under; behind the head of Apollo, is an ear of wheat; a perfect gem; of most beautiful workmanship, and as it came from the die:  
size 3. weight 66½ grs. 1
398 Another; but nothing behind the head of Apollo; not quite so desirable a coin as the preceding, but very fine, and in the highest condition: size 3. weight 66 grs. 1

399 Syracuse; Mt. p. 290, No. 703; Hunter, tab. 52, fig. 5; a most elegant coin, in the highest condition, and extremely rare. The horse on the reverse is a most happy effort of Greek art: size 2. weight 44\text{\frac{5}{10}} grs. 1

**Mionnet seems to have had a very imperfect notion of the rarity and value of this most scarce type.**

400 Syracuse; Mt. p. 291, No. 714; Torr. tab. 68, fig. 18; this most beautiful coin is as it came from the die; its rarity is greater than that of the preceding coin: size 2\text{\frac{1}{2}}. weight 41\text{\frac{3}{10}} grs. 1

**It does not exist in the French collection, according to Mionnet, and is not in the Hunter collection.**

401 Syracuse; same type as lots 397 and 398, but without ΣΥΠΑ-KΟΞΙΩΝ, and having the letters EY in a monogram in the exergue; the workmanship, particularly of the head of Apollo, is of the very highest order, and the preservation of this gem of Greek art is perfect; in this state it is of extreme rarity: size 2\text{\frac{1}{2}}. weight 44 grs. 1

**The letters EY, in a monogram, are probably the initial letters of the artist’s name; and this coin may have been a rival production to those forming lots 397 and 398. The letters Ση, and the monogram AP, which may be observed on other gold coins of Syracuse, of this collection, are also most probably the initials of artists. This usage seems not intended, or calculated, to transmit their names to posterity, but indicates a great spirit of rivalry and emulation among them, which resulted in the production of these most surprising and elegant specimens of ancient art. The silver coins of Syracuse are also very remarkable for the great variety of artists’ names which they furnish.**

402 Syracuse; [ΞΕΥ]Σ ΕΛΕΥ[ΘΕΡΙ]ΟΣ, Mt. p. 290, No. 707; Hunter, tab. 52, fig. 6; in the field of the reverse, is AP. in a monogram, and three pellets; very rare, beautiful work; and in very good preservation: size 2. wt. 33\text{\frac{1}{10}} grs. 1

403 Another; from the same die, obv. and rev.; not quite in such good preservation: size 2. weight 33\text{\frac{2}{10}} grs. 1

(Continued at page 73.)
SILVER DECADRACHMS OF SYRACUSE, COMMONLY CALLED SYRACUSAN MEDALLIONS.

Any collection possessing three or four of these magnificent specimens of ancient Greek art, at its best period, is generally esteemed rich. To prevent, therefore, a false notion of the degree of rarity of these coins, which might arise from seeing so many together, we beg to refer the young collector to the remark which follows lot 170, at page 26.

404 Syracuse; (a Medallion,) ΣΥΡΑΚΟΣΙΩΝ, Mionnet, p. 298, No. 771; the hair in a net, but without the K on the diadem; on the reverse, under the prize armour, is the word ΑΘΛΑ; compare Torremuzza, tab. 72, fig. 1; a magnificent specimen of this very rare type, and highly preserved:

size 10. weight $664\frac{5}{10}$ grs. 1

405 Another; ΣΥΡΑΚΟΣΙΩΝ. (sic.) with K. on the diadem, and ΚΙΜΩΝ. on the dolphin under the neck, but not shewing the word ΑΘΛΑ; Hunter, tab. 52, fig. 9; but Combe appears not to have perceived the artist's name on the dolphin. The preservation is superior to that of the last, and the character of the head quite different:

size 10. wt. $663\frac{5}{10}$ grs. 1

* * * A most splendid coin, and very probably a rival production to the preceding.

406 Another; without K. on the diadem; of a very beautiful character, but quite different from the preceding: ΣΥΡΑΚΟΣΙΩΝ. quite on the edge of the coin, but very legible; a very beautiful specimen of this rare type; the reverse clean, and shewing all the car and charioteer:

size 10. wt. $663\frac{5}{10}$ grs. 1

* * * The die broke in striking this coin, and has left a large flaw under the neck, but the effect of it is far from disagreeable.

407 Syracuse; ΣΥΡΑΚΟΣΙΩΝ[N.] same type as Mt. vol. vii. pl. 67, fig. 3, and Torr. Auct. 2, tab. 6, fig. 2, except the scallop shell; a most beautiful and elegant expression of face, the reverse clean, and shewing all the type; in admirable preservation, and very rare:

size 10. weight $662\frac{5}{10}$ grs.

408 Another; ΣΥΡΑΚΟΣΙΩΝ[, under the head, ΕΥΑΪΝΕ.; Torr. Auct. 1, tab. 7, fig. 2; very fine expression of face, different from the last. A spread coin, shewing the whole type on both sides; the reverse very beautiful and clean; the preservation on both sides extremely good:

size 11. weight $667\frac{3}{10}$ grs. 1
Another; [ΔΥΡΑΚΟΣΙΩΝ.] with the scallop shell behind the neck; Miomnet, pl. 67, fig. 3; the obverse very fine, and beautifully preserved; the reverse in good condition:

size 11. weight 667\frac{3}{10} grs. 1

Another; [ΔΥΡΑΚΟΣΙΩΝ.] and under the head [ΕΥΑΙΝΕ.]; a very beautiful coin, in fine condition on both sides, shewing the car, charioteer, and horses, in great perfection:

size 10\frac{1}{2}. weight 665\frac{5}{10} grs. 1

Another; [ΔΥΡΑΚΟΣΙΩΝ.] and with the scallop shell behind the neck; Miunnet, pi. G7, fig. 3; the obverse very fine, and the beautiful preserved; the reverse in good condition: size 10\frac{3}{4}. weight 667 grs. 1

Another; [ΔΥΡΑΚΟΣΙΩΝ.] from the same die on the obverse; in very excellent condition, and shewing the horses and car very well on the reverse, but only part of the charioteer:

size 10. weight 665\frac{7}{10} grs. 5

Another; [ΔΥΡΑΚΟΣΙΩΝ.], the word ΕΥΑΙΝΕ. under the neck not visible; a fine spread coin, the face having a very beautiful expression, and well preserved on both sides, shewing the whole of both the types: size 10\frac{3}{4}. weight 666 grs. 1

The reverse of this coin is from the same die as that of lot 411, but not the obverse.

Another; [ΔΥΡΑΚΟΣΙΩΝ.] and under the head [ΕΥΑΙΝΕ.]; very well preserved on both sides, but a little encrusted with black oxide, which may be carefully removed:

size 10\frac{1}{2}. weight 664\frac{5}{10} grs. 1

This coin is from the same die, on both sides, as the preceding.

Another; [ΔΥΡΑΚΟΣΙΩΝ.] with a scallop shell behind the neck; a very good specimen of this very rare coin, and well preserved, but the reverse somewhat blurred:

size 10. weight 667\frac{3}{10} grs. 1

Another; [ΔΥΡΑΚΟΣΙΩΝ.] but only shewing two dolphins; clean and well preserved, and a most agreeable expression of the face; reverse very well preserved, but the head of the fourth horse not visible: size 9\frac{1}{2}. weight 661\frac{1}{10} grs. 1

SYRACUSAN MEDALLIONS IN SILVER.

(Continued from page 62.)

514 Syracuse; (a Medallion) ΣΥΡΑΚΟΣΙΩΝ (sic.) Mionnet, page 298, No. 771; with the hair in a net, K. on the diadem, and ΚΙΜΩΝ. on the dolphin under the neck; see Hunter, tab. 52, fig. 9; but Combe appears not to have perceived the artist's name on the dolphin; a very clean and well preserved specimen of this most rare type. The two dolphins in front of the head, on the obverse, and on the reverse, the charioteer, are only partially visible: size 9½. weight 669.6 grs. 1

* This coin, obverse and reverse, is from the same die as lot 405, but not so much spread.

515 Another; ΣΥΡΑΚΟΣΙΩΝ. without K. on the diadem, but with ΚΙΜΩΝ. on the dolphin under the neck; the expression of the face quite different from the preceding; a very beautiful specimen of this rare coin, but the die of the reverse is blurred in the field: size 9½. weight 665.4 grs. 1

516 Syracuse; ΣΥΡΑΚΟΣΙΩΝ, the same type as Mionnet, vol. vii. pl. 67, fig. 3; but with a star behind the head, and a pellet in front; very well preserved on both sides, and shows the whole of the types; a very fine specimen:

size 10. weight 666.5 grs. 1

517 Another; [ΣΥΡΑΚΟΣΙΩΝ], from the same die, obv. and rev., as the preceding, but not quite so fine a coin, or so much spread:

size 9½. weight 667.1 grs. 1

518 Another; [ΣΥΡΑΚΟΣΙΩΝ], with the scallop shell behind the neck; beautiful expression of face, and fair condition; but the two dolphins in front of the head, and in part the charioteer and the armour are not visible; also the reverse rather blurred:

size 9. weight 667 grs. 1

519 Another; [ΣΥΡΑΚΟΣΙΩΝ], with Δ in front of the neck, an EYAIINE, visible under it; the obverse in good condition, except a slight blow on the cheek; and the reverse extremely good, particularly the horses: size 10. wt. 663.9 grs. 1

520 Another; [ΣΥΡΑΚΟΣΙΩΝ], from the same die on both sides, the obverse better than the preceding specimen, but the reverse not quite so good:

size 10. weight 667 grs. 1

521 Another; but without the legend, ΣΥΡΑΚΟΣΙΩΝ, and with a scallop shell behind the head; a different expression of face
from any of the preceding; very well preserved on the obverse, and the reverse in fair condition:

- **As the legend constantly occurs on these coins, this specimen, of which the die appears never to have had a legend, offers a very uncommon variation in the type.**

522 Another; \(\Sigma V P A K O [\Sigma I O N]\), with a scallop shell behind the head; a slight double striking on the chin, but a fine spread coin; the obverse in very good condition, the reverse unfortunately blurred:

- **The reverse very fair, showing the car, the charioteer, and the cuirass, greaves, and helmet, extremely well:**

523 Another; \(\Sigma V P A K O [\Sigma I O N]\), a pellet in front of the neck; in fair condition, obverse and reverse, but somewhat scratched and ill used:

524 Another; \(\Sigma V P A K O [\Sigma I O N]\), a spread coin, well preserved, and the expression of face very beautiful, but the obverse has a thin coating of black oxide, and the die partially blurred; it may be much improved by judicious cleaning.

This most important suite of beautiful and rare coins, has been thus minutely and accurately described for the sake of distant collectors, who may not be enabled to have the satisfaction of a personal inspection.

* * This most interesting and chased Medallion (in Bronze, not Silver), on the Marriage of the King and Queen, is seven inches in diameter, and in a silver rim. TETRADRACHMS OF SYRACUSE, IN SILVER.

592 Syracuse; Mionnet, p. 297, No. 762, pl. 67, fig. 4; and Torremuzza, Auct. 2, tab. 6, fig. 3; APEΘΘΣΑ. full face, with
KIMΩN. on the diadem in front, &c.; a beautiful spread coin, somewhat rubbed, but in very fine condition, of the most elegant and admirable workmanship, and one of the rarest coins in the Sicilian series:  
size 8\frac{1}{2}. weight 263 grs. 1

This appears to be the identical coin engraved by Torremuzza, as above quoted.

593 Syracuse;  Mt. p. 297, No. 765; Torr. tab. 74, fig. 8; but with an ear of wheat in the exergue instead of a dolphin:

size 7\frac{1}{2}. weight 241\frac{7}{10} grs. 1

This most beautiful and interesting type is more rare than the preceding, but has the disadvantage of a partial coating of black oxide, and has suffered from having been in circulation, and from not having been well struck, yet its condition is very passable, especially considering that its scarcity is such as to preclude the hope of ever seeing a better.

594 Syracuse;  Mt. p. 47, fig. 1; Hunter, tab. 52, fig. 11; SYPA- ῩΟΣΙΩΝ, with the quadratum incusum; in very perfect condition, curious old work, and of extreme rarity:

size 7. weight 269\frac{2}{10} grs. 1

Mionnet does not seem to have been aware of the high degree of rarity to which this coin is entitled.

595 Syracuse;  Torr. Auct. 2, tab. 7, fig. 3; same type as the old Medallion of Syracuse engraved in Hunter, tab. 52, fig. 10; very rare, and in fine condition, except a little black oxide on the obverse:

size 7\frac{1}{2}. weight 265 grs. 1

596 Syracuse;  obr. SYPAKΟΣΙΩΝ. the type somewhat resembling Dumersan, pl. 1, fig. 21; rev. see Torremuzza, Auct. 2, tab. 6, fig. 6; a wheel and some broken harness are among the feet of the horses; very beautiful work, good condition, and appears to be an unpublished and very rare type:

size 6\frac{3}{4}. weight 266\frac{3}{10} grs. 1

597 Syracuse;  Torr. Auct. 2, tab. 7, fig. 2; old work, in very fine condition, and very rare type:

size 7\frac{1}{2}. weight 262\frac{8}{10} grs. 1

598 Syracuse;  Torr. tab. 74, fig. 4; very fine work, in extremely fine condition, and rare:

size 6. weight 197\frac{8}{10} grs. 1

599 Syracuse;  Torr. Auct. 1, tab. 7, fig. 3; fine work, very fine condition, and very rare type:

size 6\frac{1}{2}. wt. 267 grs. 1

600 Syracuse;  Hunter, tab. 52, fig. 15; very fine work, in very beautiful condition:

size 6\frac{1}{2}. weight 266\frac{1}{10} grs. 1
601 Syracuse; * Torr. Auct. 2, tab. 6, fig. 6; on the obverse is the head of an old faun upon the neck; beautiful work, fine condition, and most rare type: size 7. weight 264.1/10 grs. 1

** This appears to be the identical coin engraved by Torremuzza. The reverse is from the same die as lot 596, but the obverse is quite different. This coin shows the broken wheel among the feet of the horses, but not the broken harness, as seen in lot 596, because it is off the coin. On this coin, however, all the charioteer is visible. The type of this reverse cannot be all seen and appreciated without both coins.

602 Syracuse; ΣΥΡΑΫΩΣΙΟΝ. compare Mionnet, pl. 61, fig. 7; but the hair is turned up on this rare coin; beautiful condition, and fine old work: size 61/2. weight 266.9/10 grs. 1

603 Syracuse; Hunter, pl. 53, fig. 5; fine work, very good condition, and very rare type: size 7. weight 264 grs. 1

604 Syracuse; nearly like Hunter, tab. 53, fig. 14; fine condition, and fine old work: size 6. weight 265.9/10 grs. 1

605 Syracuse; Mionnet, pl. 67, fig. 5; Torremuzza, tab. 73, fig. 16; NIK. in monogram under the neck; in most perfect preservation, and of the same beautiful style of work as the Medallions of Syracuse: size 7. weight 264.9/10 grs. 1

606 Another; the obverse from the same die as the preceding, but not the reverse; equally beautiful, and well preserved: size 7. weight 265.1/10 grs. 1

607 Syracuse; obv. compare Hunter, pl. 53, fig. 3: rev. a Quadriga to the left, and ear of wheat in exergue; very fine work, and condition; rare type, but the reverse a little injured by oxide and double striking: size 61/2. weight 267.1/10 grs. 1

608 Syracuse; like Hunter, pl. 53, fig. 14, except in the disposition of the letters; very clean and well preserved, and fine old work: size 61/2. weight 270.3/10 grs. 1

** The weight of this coin is remarkable. It is the heaviest of all the Tetradrachms of Syracuse in this collection, and gives above 67 1/2 grains to the Attic drachm. In the Hunter Collection only one Tetradrachm surpasses this in weight, No. 41, at p. 292, weighs 271 1/2 grains. It is to be noted, that the Siculo-Attic drachm is often heavier than the real Athenian drachm, as indicated by the coins.

609 Syracuse; Hunter, tab. 53, fig. 3; EYAINETO. in a tablet over the horses; extremely rare, very fine condition, and beautiful work: size 61/2. weight 264 grs. 1

** This is no doubt the same artist whose name appears on some of the Syracusean Medallions.

611 Another; with a crack on the edge of the coin; from the same die, obverse and reverse, in the same perfection, and of the same beauty:
   size 6½, weight 262½ grs. 1

612 Syracuse; compare with Torr. tab. 72, fig. 7; but there is no diadem in front, and EYMHNOY. is under the neck; on the reverse, under the horses, is a stork, and in the exergue, a dolphin following another fish; extremely rare type and fine work; the obverse in fine condition, but the reverse somewhat rubbed:
   size 7, weight 259½ grs. 1

613 Syracuse: Hunter, tab. 52, fig. 16; but ΠΑΡΜΕ. not visible under the neck; beautiful work, very rare type, and in fine condition:
   size 6½, weight 267½ grs. 1

   size 6½, weight 264½ grs. 1

(Kings of Syracuse in Silver, continued at page 100.)

Anther; with a rose behind the head, and Α. under the horses, going to the left; very fine condition, but the die very slightly blurred on the obverse:

**There is on this individual coin a difference in the style of work and arrangement of the hair, which seems to indicate a coinage somewhat earlier than that of the usual style, as shewn in the following specimens.

This is a page from the book "An Historical and Critical Dictionary of Ancient Coins," published in 1877. The page describes various ancient coins, detailing their dimensions (size), weight, and condition (e.g., "perfect condition"). The coins are described with specific attributes such as the head being from the same die as another coin but not the reverse, or having a specific element like a bucraunum or a palm branch behind the head. The coins are also noted to have different monograms and are described as having fine work and condition. The page includes a section on Roman small brass coins, mentioning Nero and Tiberius, among others, with various rev. (reverse) marks and conditions noted.
&c.; three varieties; all very fine. Spiutriati, 2. Domitian, 6; all varied, and very fine.

Peace standing, holding an olive branch in her right, and the hasta pura in her left, hand, pax. avggg.; in the field, s.p., with c. or g. in the exergue; well preserved.

This is by far the most rare and interesting brass coin of our Anglo-Roman Emperor. It is most certainly worth a very high price, especially as no other specimen of this type is known in this country. It was formerly in the collection of Mr. Millingen.

After several ineffectual attempts to crush the power of Carausius, Diocletian and Maximian found it advisable, necessary, and most prudent, to acknowledge him as their colleague in the empire. The event is commemorated by the device, appropriate emblems, and legend of this coin.

648 Carausius, 4; rev. two Hands joined, concord. mil.; in the exergue, c.; rev. a Ram, leg. i.n.i.n. (sic.); in the exergue, s.m.c.; unpublished; rev. moneta. avg.; no exergue; rev. Emperor on horseback, [ad]ventvs. avg.; unpublished: all are well preserved.

The best information to be procured on the coins of the Romans relating to Britain is most certainly contained in Akerman’s work, (edition of 1844) bearing the preceding title, with plates, &c.
651 Delmatius, 1. Fausta, 4. Const. Maximus, 11, of which, three, VRBS. ROMA., with different exergues; four, CONSTANTINOPOLIS; others, P.LON.&c. (London mints). Constantius II., 5. Crispus, 7. 28

KINGS OF SYRACUSE, IN SILVER.

(Continued from page 88).

729 Agathocles; [ΑΓΑΘΟΚΛΕΙΟΣ. Mionnet, pl. 68, fig. 3; in most perfect condition, and may be ranked among the most happy efforts of ancient Greek art:

size 7½. weight 263 grs. 1

730 Another: but with ΑΓΑΘΟΚΛΕΙΟΣ. in the exergue, and ΑΝ. in monogram in the field; most beautiful work, and perfect preservation:

size 7. weight 264 grs. 1

* * This coin appears like a rival production to the preceding.

size 6. weight 266⅓ grs. 1

732 Another; with ΑΓΑΘΟΚΛΕΙΟΣ. beside the Victory; by the same artist as lot 729; beautiful work, and fine condition:

733 Another; like lot 731; very fine work, and fine condition:

size 6½. weight 263⅓ grs. 1

734 Another; with ΑΓΑΘΟΚΛΕΙΟΣ. beside the Victory: very fine condition, but the work of inferior style:

size 7. weight 264⅓ grs. 1

PENTADRACHM? OR SMALL MEDALLION, OF HIERONYMUS, IN SILVER.

735 Hieronymus; Mionnet, p. 337, No. 91: Torrnuzza, Auct. 1, tab. 9, fig. 3; but above the thunderbolt, ΑΦ.; somewhat rubbed, and has been in circulation, but yet in good and satisfactory condition, especially when it is considered that its extraordinary rarity, almost precludes the hope of finding another:

size 8½. weight 292 grs. 1

* * It is to be kept in mind, in appreciating the rarity of this medallion, and of the larger one of Hiero, lot 630, that during a period of nearly fifty years the late proprietor of these two coins could never better them, although possessing very ample means, and urged by a strong passion in favour of the regal series of Greek coins.

KINGS OF SYRACUSE, IN SILVER. (Continued)

736 Hieronymus; precisely the same type as lot 735, and ΑΦ. above the thunderbolt, but smaller; extremely rare, and in very fine condition:

size 5½. weight 129½ grs. 1
Another; with K. (retrograde) behind the head, and KI. above the thunderbolt; *the obverse better preserved than the last, but the reverse not so good:*

size 6. weight $126\frac{9}{10}$ grs. 1

---

Philistis, Queen of Syracuse; *Mt.* pl. 68, fig. 8; with a palm branch and pendant tænia behind the head, the quadriga in slow motion, and A. near the horses' feet; *very fine work, rare, and in very perfect and beautiful condition:*

size $7\frac{1}{2}$. weight $217\frac{8}{10}$ grs. 1

* * This coin shows the whole of the head and veil, which is very uncommon.

---

Another; *but not shewing all the type in such perfection, although very fine:*

size 7. weight $217\frac{8}{10}$ grs. 1

---

Another; with a thrysus or sceptre? behind the head, the horses galloping, and E. under their feet; *fine work, and most perfect condition:*

size $6\frac{1}{2}$. weight $208\frac{8}{10}$ grs. 1

---

Another; with a star behind the head, and the horses walking, and K. before them; *very fine, and in perfect preservation:*

size $7\frac{1}{2}$. weight 219 grs. 1

---

Another; see *Mionnet*, pl. 68, fig. 8; the horses in gentle motion; *perfect preservation, but of dark colour from tarnish:*

size $6\frac{1}{2}$. weight $208\frac{8}{10}$ grs. 1

---

Another; a blade of wheat behind the head; *rev. the horses in violent motion, with KI. before them, and an ear of wheat under their fore feet; in the field, above the car, is a crescent; very fine work, and in perfect condition, but the face double struck:*

size $7\frac{3}{4}$. weight 208 grs.

Philistis; *Torremuzza*, tab. 106, fig. 8; *rev. ΒΑΣΙΛΕΥΣΑΣ. [Δ]Ι[Σ]ΤΙ[ΑΩΣ], a Biga in gentle motion, K. before the horses; beautiful work, and in very good preservation:*

size 4. weight $60\frac{8}{10}$ grs. 2

* * This size is of extraordinary rarity, and it is curious to remark, that it appears not to have been adjusted to the same standard as the large coins.

---

Philistis; the horses in gentle motion, same type as lot 738, but without A. under the fore feet, *good work and condition:*

size 7. weight $216\frac{8}{10}$ grs. 2

Another; the horses in violent motion; same type as lot 740, *good work and condition:*

size $6\frac{3}{4}$. 
Another; same type as lot 742; fine work, fair condition: size $6\frac{1}{2}$.

Another; the head well preserved, but the reverse blurred by oxide: size $7\frac{3}{2}$. 2

size $3\frac{1}{2}$. weight $82\frac{3}{10}$ grs.

Another; with Ω. under the eagle extremely fine:

size $4\frac{1}{2}$. weight $101\frac{2}{10}$ grs. 2

CITIES OF THRACE, IN SILVER.

Abdera; compare Mionnet, Supp. pl. 5, fig. 1, for the obverse, but with a cray fish under the griffin to the left, and without letters; rev. in place of the square divided into four parts; there is on this coin, a male head to the left, in the inner square, and ΕΠ. ΣΟΙΠΑΔΟΣ in the outer square; extremely rare, very fine condition, and unpublished:

size 7. weight $224\frac{9}{10}$ grs. 1

Abdera; compare Mt. pl. 54, fig. 8; obr. ΑΒΔΗΠΙΤΕΩΝ. in two lines, Head of Apollo to the right; rev. ΕΠ. • • • ΚΕ-ΞΙΟΣ. Griffin to the left; in very fine condition:

size 6. weight $176\frac{1}{10}$ grs. 1

Abdera; type of Mt. p. 366, No. 17, but ΕΠ. ΔΙΟΦΑΝΤΟΥ; well preserved:

size 6. weight $157\frac{3}{10}$ grs.

Abdera, Mt. Supp. vol. 2, pl. 5, fig. 2; but the griffin sitting, with one paw raised up; well preserved:

size $2\frac{1}{2}$. weight $29\frac{3}{10}$ grs. 2

Abdera; type of Mt. p. 366, No. 16, but ΕΠ. ΕΥΡΗΣΙΠΠΙΟΥ; good condition:

size 6. weight $149\frac{9}{10}$ grs.

Abdera; type of Mt. p. 366, No. 18, but ΕΠ. • • ΚΕ • • Ω • MO:

size 3. weight $38\frac{1}{10}$ grs.

Another; type of Mt. p. 366, No. 22, but the griffin is on a
club, and ΑΥΚΟ. underneath; *very rare variety, in good condition:

size 2\pr. weight 26\frac{\alpha}{10} grs. 3

753 Αενεας; *obv. helmeted Head of Αενεας, with slight beard, to the left, within a dotted circle; *rev. ΑΙΝΕΑΣ: in a quadrangular area, surrounding an interior square divided into four parts; *extremely rare, and in very good condition:

size 3. weight 34\frac{\alpha}{10} grs.

* * See Millingen, Syllotge of Unedited Coins, p. 41, pl. 2, fig. 18, for the proof of this new attribution; and for the type see also Mionnet, Supp. pl. 9, fig. 7.

Αενεας; *obv. the same helmeted Head, but in more archaic style, and turned to the right; the crest of the helmet projects beyond the dotted circle surrounding the type; the beard is longer, pointed, and slightly curved upwards; the hair is long, covering the back of the neck, and done in the dotted style; the eye entire, as on ancient coins of Athens: the bottom of the neck is dotted, as if wearing a necklace; *rev. an indented square, divided into four parts, in the style of Thrace and Macedon; *extremely rare, and in fine preservation:

size 3. weight 39\frac{\alpha}{10} grs. 2

* * This very curious coin is of the same denomination as the preceding, the former having evidently lost a little weight by friction. This coin being of an anterior period, the two together mutually illustrate each other, and confirm the new attribution of Millingen. There exist, in cabinets, sub-divisions of this archaic type, which should be all classed to this Town. Some persons erroneously consider them to be of Acanthus, and confuse them with those really of that city, with the helmeted head of Minerva, *rev. indented square. But the head of the Goddess may be distinguished from that of Αενεας by her round ear-ring, even when the slight beard on the head of Αενεας is not perceptible.

754 Αέννος; with wreath before the goat, ΑΙΝΙΟΝ.; *Mionnet, p. 369, No. 47; *Pellerin, Rec. tab. 33, fig. 10; *fine work, and good condition, although somewhat rubbed; *very rare:

size 6. weight 236 grs. 1

755 Another; with branch before the goat; *fine work; *fair condition, although rubbed; *very rare:

size 6. weight 226 grs. 1

756 Another; with star before the goat; *very rare, and *fair condition, although rubbed:

size 6. weight 232\frac{\alpha}{10} grs. 1

757 Another; with amphora before the goat, and an astragalus under the animal; *very rare; *fair condition, although rubbed:

size 6. weight 232\frac{\alpha}{10} grs. 1
758 Another; with an eagle before the goat; see Combe, Brit. Muse. tab. 4, fig. 15; but injured by black oxide, although very little rubbed; very rare:

* size 6. weight $230 \frac{3}{10}$ grs.

Ænus; Mionnet, p. 369, No. 49; AINION.; see Dumersan, Coll. Allier, pl. 3, fig. 3; very rare type, and in very good condition:

* size $3\frac{1}{2}$. weight $55 \frac{5}{10}$ grs.

Ænus; AIN. Mionnet, p. 369, No. 43; compare Dumersan, Coll. Allier, tab. 3, fig. 4; but the head of Mercury to the right, and a club before the goat; rare, and fine:

* size $1\frac{1}{2}$. weight $19 \frac{4}{10}$ grs. 3

( *Greek Cities, in Silver, continued at page 116.)*

LYSIMACHUS, KING OF THRACE, IN GOLD.

759 Lysimachus; size and type of Mionnet, pl. 69, fig. 7, and Supp. pl. 8, fig. 7; but with a Gl. and an uncertain symbol in the field; in very fine condition, (false):

* size $8\frac{1}{2}$. weight $539 \frac{5}{10}$ grs. 1

* This coin is a very good specimen of the work of the earliest falsifiers, being about three centuries old. Others are to be found in the earliest extant cabinets, as the Florentine, the Pembroke, &c.

DIDRACHMS OF LYSIMACHUS, IN GOLD.

760 Lysimachus; usual type, Mionnet, p. 438, No. 4; but in the field, near the feet of Minerva, a lion’s head in profile, to the left; very beautiful work, and in the state in which it came from the die:

* size $4\frac{1}{2}$. weight $132 \frac{2}{10}$ grs. 1

* This type is probably not the earliest struck by Lysimachus. His first coinage of gold, like his earliest coinage of silver, seems to have been a continuation, or rather an adoption of the type of Alexander the Great. See a most rare specimen published by Mionnet, pl. 69, fig. 6.

761 Another; with a monogram in the field, under the extended hand of Minerva; fine work, and in most exquisite preservation:

* size $4\frac{1}{2}$. weight $131 \frac{6}{10}$ grs. 1

762 Another; with a monogram on the throne of Minerva; beautiful work, and in the highest preservation:

* size $4\frac{1}{2}$. weight $131 \frac{3}{10}$ grs. 1

763 Another; with a monogram under the extended hand of Minerva, beautiful work, and fine condition:

* size 4. weight $131 \frac{5}{10}$ grs. 1
Another; with AP. in monogram over a bee in the field, near the feet of Minerva, and EM. in monogram in the exergue; fine work; and fine preservation: size 4. wt. 132 g. 1

Another; with a trident and two dolphins in the exergue, a monogram in the field, under the extended hand of Minerva, and BY. on the throne; the work good, but not quite so fine; the preservation is perfect: size 4½. wt. 130½ g. 1

* * * This coin was evidently struck at Byzantium.

Another; with a lion's head in profile, and a monogram under the extended hand of Minerva, and a monogram also in the exergue; good work, and very fine preservation, but has been clipped behind the head: size 4½. 1

* * * In confirmation of the attribution of this coin to Potidea, see Millingen, Sylloge of Unedited Coins, pl. 2, fig. 22, with the letters ΣΩ, page 47.

THIRACIAN CHERSONESUS, AND ISLAND OF THASUS, IN SILVER.

857 Cherronesus, in the Thracian Chersonesus; compare Pellerin, Rec. pl. 110, fig. 46, and Dumersan, Coll. Allier, tab. 4, fig. 4; Μιοννέτ, Supp. p. 525, No. 14; but on the reverse, K, a pellet, and a star; very fine:
size 2 1/3. weight 37 3/10 grs.
* * * For the proof on which this attribution rests, see Dumersan, Collect. Allier, tab. 4, fig. 4 and 5. It appears very satisfactory, as these coins are constantly found in that neighbourhood, and have been a stumbling block to Numismatists for the last two centuries.

Thasus; rev. Hercules standing; type of Mt. p. 435, No. 30, but only M. in the field; very good work, and fine condition:
size 8 1/3. weight 260 7/10 grs.
858 Cherronesus; like the preceding; but an amphora, a pellet, and a monogram, on the reverse; as it came from the die:
size 2 1/3. weight 37 1/10 grs.
Thasus; like the preceding; good work and condition:
size 8 1/2. weight 260 3/10 grs.
859 Thasus; two, like the preceding; one fine work and condition; the other rude: size 8. 2

860 Thasus; like fig. 3. of the plate of Coins of Thasus, Mionnet, Supp. p. 545; in the field is the letter Α. very clear, not Α.; very fine work, and very good condition. This style of work, on these coins, is of the utmost rarity:

size 5\(\frac{1}{2}\). weight 133\(\frac{9}{10}\) grs.

Another; but of a style of work also uncommon, from its rudeness; very well preserved: size 5. wt. 142\(\frac{4}{10}\) grs. 2

861 Another; different style; Hunter, tab. 33, fig. 1; fair condition:

size 5\(\frac{1}{2}\).

Thasus; (ver. Hercules, with bow and arrow, on one knee, in a square); type of Mt. Supp. pl. 8, fig. 6, but a head in the field, instead of grapes; fine condition, and fine old work:

size 3. weight 57\(\frac{4}{10}\) grs.

Thasus; Hunter, tab. 33, fig. 2; bearded old Faun kneeling on one knee; fine:

size 1\(\frac{1}{2}\). weight 57\(\frac{3}{10}\) grs. 3

(Greek Cities, in Silver, continued at page 121.)

TETRADRACHMS OF LYSIMACHUS, KING OF THRACE, IN SILVER.

862 Lysimachus; obv. Head of Hercules, covered with the skin of the lion's head, to the right; rev. ΒΑΣΙΛΕΩΣ ΛΥΣΙΜΑΧΟΥ. Jupiter Aetophorus sitting, to the left; in the field, the fore half a lion, and a crescent; under the throne, the representation called a pentagon; in perfect condition, very good work, and of the utmost degree of rarity:

size 7\(\frac{1}{2}\). weight 263\(\frac{5}{10}\) grs. 1

* * * The tetradrachms and drachms of this type are probably specimens of the first coinage of Lysimachus, being evidently adopted in continuance of the silver coinage of Alexander the Great. These tetradrachms are of the utmost rarity. The drachms are more common. Both denominations are always adjusted to the Attic Talent, like the coins of Alexander.

863 Another; but with the same legend differently disposed, the word ΛΥΣΙΜΑΧΟΥ. being now in the exergue; in the field, the fore half of a lion under a monogram within a wreath; and under the throne another monogram; different style of work from the last; of the utmost rarity, and in very good condition:

size 7\(\frac{1}{2}\). weight 260\(\frac{8}{10}\) grs. 1
TETRADRACHMS OF LYSIMACHUS, IN SILVER.

USUAL TYPE.

These coins of Lysimachus have been selected during so many years by their late possessor with much numismatic taste and feeling. They are all different, and the variations in the type offer many most interesting subjects of inquiry.

864 Lysimachus; usual type; obv. Portrait, with ram's horn; rev. Minerva sitting; Mionnet, Supp. pl. 8, fig. 7; but with the same monogram as on the preceding, within a wreath, in the field before the Minerva: size 8½, weight 265 grs.

865 Another; with monogram above the arm of Minerva, and a meander in front of her beyond the legend; the portrait of Alexander much older. The form of the front of the throne (being straight) is very peculiar and unusual; beautiful work, and high condition: size 7¼, weight 266½ grs.

866 Another; with a torch in the field, in front of Minerva, and a star on the throne, the front of which is covered with the drapery of Minerva, whose figure is very beautiful, and highly preserved, as well as the obverse:

size 8. weight 261¾ grs.

867 Another; with a monogram under the hand of Minerva, another behind her beyond the legend, and another in the exergue; fine work, and perfect preservation on both sides:

size 8. weight 264½ grs.

868 Another; with a monogram under the hand, and crescent in the exergue; the point of the spear, at the feet of Minerva, very well defined; fine work and condition on both sides:

size 8. weight 263½ grs.

869 Another; with different style of portrait, and a peculiarity in the horn; on the reverse, the front of the throne is straight; with a most singular and uncommon monogram under the hand, and a meander in front of Minerva beyond the legend; fine condition, and fine work on both sides:

size 8½. weight 265½ grs.
Another: with a monogram under the hand of Minerva; fine work; and beautiful condition on both sides:

size 8½. weight 264 grs. 1

Another: different character of head, and style of work; with a lion's head, in profile, under the hand of Minerva, and a monogram on the throne; the spear has no point; highly preserved, particularly the reverse:

size 9. weight 262½ grs. 1

Another; with a monogram under the hand of Minerva, and ΔΩ on the throne; in very good preservation on both sides:

size 8. weight 260 grs. 1

* * * This coin proves the reading of the monogram, on the preceding, to be ΔΩ.

Another; fine character of head; with an elephant and a lion's head, in profile, under the hand of Minerva; ΩΕ (in monogram) upon the throne; fine condition, and work:

size 8½. weight 259½ grs. 1

Another; with a caduceus under the hand of Minerva, and a bee in the field, behind her, beyond the legend; fine character of head, and well preserved on both sides:

size 9. weight 263½ grs. 1

* * * This coin was formerly in the Modena Cabinet, and bears the small golden stamp of the spread eagle.

Another; fine character of head, with a monogram under the hand of Minerva, and a terminus in front, beyond the legend; in very good condition, and a fine spread coin:

size 9. weight 260½ grs. 1

(Tetradrachms of Lysimachus, Continued at page 130).

DRACHMS OF LYSIMACHUS, IN SILVER.

Lysimachus; same type as the preceding (a Drachm); fine and rare:

size 4. weight 63½ grs.

Lysimachus; but type of Alexander the Great, (a Drachm) in the field of the reverse is a crescent under a half lion; under the throne is the representation called a pentagon; fine and rare:

size 4. weight 67½ grs. 2

* * * The weight of this coin is remarkable, as it is very rare to find an Attic Drachm so heavy.
KINGS OF PAEONIA, IN SILVER.

877 Audoleon; usual type, Mionnet, p. 450, No. 2, but with the full face inclining to the left; of very uncommon style of work and fabric, and as it came from the die; probably unique:

\[ \text{size 6. weight } 199\frac{3}{10} \text{ grs.} \]

878 Another; but with the full face (as usual) inclining to the right; under the horse AY. in monogram; very rare, and in extremely fine condition:

\[ \text{size 6. weight } 193\frac{4}{10} \text{ grs.} \]

879 Another; with same monogram under the horse; in very fine condition, and rare:

\[ \text{size 6. weight } 195\frac{6}{10} \text{ grs.} \]

880 Audoleon; same type, and monogram under the horse; very fine, and of extreme rarity:

\[ \text{size 3. weight } 46\frac{4}{10} \text{ grs.} \]

** This type appears to be unpublished, it being usually only a half horse.

881 Patraus; Mionnet, p. 451, No. 9; but with a helmet in the field; good work, in most beautiful condition, and rare:

\[ \text{size 6} \frac{1}{2}. \text{ weight } 196\frac{8}{10} \text{ grs.} \]

** This coin is remarkably distinguished for the unusually ornamented dress and trappings of the horse and rider, as well as of the fallen enemy.

882 Another; but not having the legend retrograde, and without the peculiarities of the preceding coin; in the field, a monogram; fine condition:

\[ \text{size 6. weight } 193\frac{4}{10} \text{ grs.} \]

883 Alexander; obv. Female Head, with flowing hair and wreath of laurel, seen nearly full faced, inclining to the right, with earrings and necklace, and the hair ornamented with pearls in front; by the side of the head is an uncertain object; rev. αλεξανδρος[P]ΟΥ. Horseman in armour, and with a lance, as on the preceding coin; under the horse is a double axe; good work, and fine condition; presumed to be unique and unpublished:

\[ \text{size 6. weight } 183\frac{4}{10} \text{ grs.} \]

** The type and style of work, as well as the weight and the style of minting, of this remarkable coin, lead to the opinion that it belongs to a King of this dynasty, named Alexander; but which must however be proved by future research. The object called uncertain in the above description, is a sort of sceptre, ending with a ball, from which issue sprigs of palm. See the note following lot 1021.

* * It is rather the ends of the fillet, which float behind the head of the youth like long hair; see the note at the end of lot 1021.

1015 Another; older character of Jupiter, with a thunderbolt placed perpendicularly under the horse, and N. in the exergue; a very fine coin, particularly the reverse, and very well preserved:

size 6½. weight $217\frac{5}{10}$ grs. 1

* * On this coin, the ends of the fillet fall down on the neck of the youth.
1016 Another; with a diota under the horse; a very fine and well preserved coin: size 6\text{\tiny{\textfrac{3}{4}}}. weight 221\text{\tiny{\textfrac{3}{10}}} grs. 1

1017 Another; but with the Head of Jupiter to the left, and $\Theta$ under the horse; very good work and condition on the obverse, but the reverse fine: size 6. wt. 219\text{\tiny{\textfrac{7}{10}}} grs. 1

* * * These coins are extremely rare, with the head of Jupiter to the left. There is only one in this collection, and according to Mommsen, the French collection does not possess one.

1018 Another; but, as usual, with the head of Jupiter to the right; under the horse is a thunderbolt, placed horizontally, and an N. in the exergue; very fair condition:

size 7. weight 218\text{\tiny{\textfrac{2}{10}}} grs.

Philip II.; obv. same as the last; rev. ΦΙΑΠΠΙΩΥ. Horseman with the chlamys, panula, and causia, and right arm uplifted, trotting to the left; between the fore legs of the horse is a bow, and under him, half a winged sea horse; this type is by far more rare than the preceding, and although somewhat rubbed, is in very good condition:

size 6. weight 219\text{\tiny{\textfrac{6}{10}}} grs. 2

1019 Another; but with M. between the fore legs of the horse, and a trident under him; rubbed, but in fair condition:

size 6\text{\tiny{\textfrac{3}{4}}}.

Philip II.; obv. as usual, Head of Jupiter to the right; rev. as usual, naked Youth, with palm, to the right, but with a thunderbolt placed horizontally under the horse, and $\Sigma$ between the fore legs; in very fair condition: size 7. 2

1020 Another; with the same symbol and $\Xi$, under the horse, and between the fore legs, ME. in monogram; in extremely good condition: size 6\text{\tiny{\textfrac{1}{4}}}. weight 217\text{\tiny{\textfrac{5}{10}}} grs.

* * * On this coin the floating ends of the fillet are tied in a knot behind the head.

Philip II? obv. Male Head to the right, with short hair, and very narrow fillet; rev. ΦΙΑΠΠΙΩΥ, Horseman galloping to the left; under the horse is a club; well preserved:

size 3. weight 37 grs. 2

* * * The style of work seems to shew this, and similar, coins, to be posterior to the time of Philip II.; but many of the coins of the Kings of Macedon require a new and comprehensive arrangement.

1021 Another; with a pellet under the horse; well preserved:

size 3. weight 39\text{\tiny{\textfrac{3}{10}}} grs.
Another; with a thunderbolt under the horse; finer work, older style, and thicker; well preserved:

\[
\text{size } 2\frac{1}{2}. \quad \text{weight } 42\frac{5}{10} \text{ grs.}
\]

* * This coin appears to be of the time of Philip II.

Philip II.; type of lot 1014, but with the prow of a galley between the fore legs of the horse; very fair condition:

\[
\text{size } 6\frac{1}{2}. \quad \text{weight } 210\frac{9}{10} \text{ grs.}
\]

* * This coin is remarkable for shewing, very distinctly, that the object which sometimes appears like the long hair of the naked youth, and assumes many other appearances, is clearly seen to be the fillet (of Victory) on his head, with the ends floating behind. This fillet is frequently seen, on other coins, attached to a palm branch, which, on these coins, the youth holds in his hand. On this identical coin the youth holds a sort of sceptre, ending with a ball, from which issue the sprigs of palm. See a repetition of this very rare representation on the unique coin lot 883.

**TETRADRACHMS OF ALEXANDER THE GREAT.**

**IN GOLD.**

1022 Alexander III.; usual type; \textit{obv.} Head of Minerva to the right, with a serpent on her helmet, and wearing ear-rings and necklace, the hair perceptible through the visor of the helmet; \textit{rev. AΛΕΞΑΝΔΡΟΥ}, Victory standing to the left, draped, and with wings expanded, holding a wreath in her extended right hand, and a vexillum with a short handle in her left; in the field, a diota; extremely rare, and in very fine condition: size 5\frac{1}{2}. weight 265\frac{5}{10} \text{ grs.}

1023 Another; but with A. and a thunderbolt perpendicularly placed in the field; extremely rare, a little rubbed, but in very good condition: size 5. weight 264\frac{9}{10} \text{ grs.}

* * The Gold Tetradrachms of Alexander having evidently been in circulation, are most rarely to be found free from a slight rubbing, occasioned by the weight of the coin, and the extreme purity of the gold.

**DIDRACHMS OF ALEXANDER THE GREAT, IN GOLD.**

**With a serpent on the helmet of Minerva.**

1024 Alexander III.; usual type; see \textit{Mionnet}, pl. 70, fig. 3; \textit{obv.} helmeted Head of Minerva, to the right, with a serpent on the helmet; \textit{rev. AΛΕΞΑΝΔΡΟΥ}, winged and draped Victory standing, to the left, with a wreath in her
extended right hand, and holding in her left, a vexillum with long handle; in the field, a torch; fine work, especially the reverse, and as it came from the die:

1025 Another; with a torch in the field, and a monogram on each side the Victory; fine work, and as it came from the die:

* * On this coin the handle of the vexillum is short.

1026 Another; with a trident in the field; extremely fine condition:

1027 Another; with the hair of Minerva in a different style, and a thunderbolt under the neck; on the reverse there is a monogram in the field, and the Victory holds a vexillum, very well defined, with long staff or handle touching the ground, and differently formed in the upper part; the legend unusually minute, and the work fine; in very excellent condition:

* * These peculiarities render this coin extremely rare and curious.

1028 Another; with two half horses joined in the middle, galloping different ways; in the field, a monogram; rare symbol, fine work, and fine condition:

1029 Another; with a ram's head in the field, surmounted with two horns, and two feathers; an Egyptian symbol of Jupiter Ammon and a monogram; very rare symbol, fine work and condition:

1030 Another; with monogram and double axe in the field; as it came from the die, but the die slightly used:

1031 Another; with the letter A, a monogram, and a half horse, with curled wings, in the field; as it came from the die:

1032 Another; with two monograms in the field; as it came from the die, but the die a little used:

** Struck at Chios Insula, on the coins of which the Sphinx always occurs.

DIDRACHMS OF ALEXANDER THE GREAT, IN GOLD,

With the title of ΒΑΣΙΛΕΩΣ, and a Serpent on the Helmet.

(Continued from page 156).

1247 Alexander III.; usual type; see Mionnet, pl. 70, fig. 3, with M. behind the head of Minerva, her hair visible through
the visor of the helmet; on the reverse ΑΥ. in the field to the left, and more movement than usual in the Victory; fine work, and very fine condition: size 4. wt. 132 3/10 grs. 1

Another; with the head of an old faun in the field to the left, and a monogram to the right; very rare symbol, fine work and condition: size 4. weight 131 6/10 grs.

Another; with MI. in the field to the left, and a monogram to the right; good work, and fine condition: size 4. weight 132 2/10 grs. 1

Another; with AP. in monogram in the field, and more movement than usual in the Victory; fine work, and very fine condition: size 4. weight 132 4/10 grs. 1

Another; with monogram in the field to the left, and MI. to the right; the letters BA. (of Bacoκεως) much larger than the rest; the vexillum looking much like a trident, and with long staff; fine work, and very good condition: size 4. weight 132 5/10 grs. 1

*Mionnet, in his Corps d'Ouvrage, falls into the mistake of calling the vexillum a trident.

Another; with a torch in the field to the left, and A. to the right; good work, but rather rubbed: size 4. weight 131 8/10 grs.

HEMIDRACHMS, IN GOLD, with a Serpent on the Helmet.

Alexander III.; obv. helmeted Head of Minerva to the right; rev. ΑΑΕΕΑΝΑΠΟΥ., a bow and club in the field; above is a diota; very well preserved: size 1 1/2. weight 32 8/10 grs.

Another; with the letters differently disposed, and a thunder-bolt in the field above: fair condition: size 1 3/4. weight 32 5/6 grs.

Alexander III.; Drachm, in Gold, with a Griffin on the helmet; obv. helmeted Head of Minerva to the right; rev. ΑΑΕΕΑΝΑΠΟΥ., a winged Victory, as usual, but turned to the right; in the field to the right, is a wheel, and the letter Α.; fine work and condition, and of the utmost degree of rarity, if true: size 2 1/4. weight 53 4/10 grs. 4

* The variation in the position of the legend, and of the Victory, adds considerably to the rarity of this coin, if its authenticity could be relied on. According to Mionnet there appears not to be a gold drachm of Alexander in the French cabinet.
KINGS OF MACEDON, IN SILVER. (Continued).

1253 Demetrius I.; *Mionnet*, p. 579, No. 841; type of pl. 70, fig. 10; with a monogram on each side the Neptune, within the legend; very fine work, and in good condition:

- Size 8. Weight $264\frac{7}{10}$ grs. 1

1254 Another; with the relative position of ΒΑΣΙΛΕΩΣ and ΔΗΜΗΤΡΙΟΥ transposed; and a monogram on each side, beyond the legend; fine work, rubbed, but in fair condition:

- Size 8½. Weight 260 grs. 1

1255 Another; but with the position of the legend as usual; a monogram on each side the Neptune, within the legend; extremely fine work; the Neptune very good, and on the whole a very fair specimen, but a little injured by oxide:

- Size 8½. 1

1256 Another; with only one monogram beyond the legend in front of Neptune, and having a different style of portrait; good work, and very fair condition:

- Size 7½. Weight $256\frac{5}{10}$ grs.

Another; with the portrait in as good a style of work and condition as any of the preceding, if not superior, but the reverse nearly destroyed by oxide:

- Size 8½. 2

2257 Antigonus I. (Gonatas); *Mionnet*, p. 581, No. 851; an extremely fine specimen, in the highest condition:

- Size 9. Weight $263\frac{9}{10}$ grs. 1

1258 Another; with a helmet before, and HP. (in monogram) behind the Minerva; in extremely good condition:

- Size 9. Weight $265\frac{9}{10}$ grs. 1

1259 Philip V.; *Mt.*, p. 584, No. 890; but without any symbol or monogram on the reverse; an extremely fine specimen, in the highest possible condition, and of extreme scarcity:

- Size 9½. Weight 262 grs. 2

* * * Mionnet describes this coin as presenting us with a portrait of Philip, but it is evidently the head of the hero Perseus, whose helmet, or head covering, is formed of the skin of an eagle, as that of Hercules is formed of the skin of the lion of Nemea.

1260 Another; but the head of the hero Perseus on the Macedonian buckler is to the right; on the reverse, the wreath has acorns intermingled with the oak leaves, and ME. in a monogram; an extremely fine and perfect coin, of the utmost rarity, especially with the head to the right:

- Size 9. Weight $263\frac{9}{10}$ grs. 1
1261 Philip V.; (with his portrait); Mt. p. 585, No. 892; but with three different monograms, and a trident, outside the wreath; slightly rubbed, but a very perfect specimen, and of extreme rarity: size $6\frac{1}{4}$. weight 129 grs. 1

*Mionnet seems unaware of the true rarity of this coin.

1262 Philip V.; (with his portrait); same type, but with three different monograms; in most perfect condition, and extremely rare: size $4\frac{3}{4}$. weight $62\frac{3}{10}$ grs.

Philip V.; (with his portrait); same type, but with three different monograms; rather rubbed, but a very excellent specimen of this size, which is still more rare than either of the two preceding, and which, according to Mionnet, does not exist in the French collection:

size $2\frac{3}{4}$. weight $28\frac{1}{10}$ grs. 1

1263 Perseus; (with the artist's name, ΞΩΙΑΟΥ.); Mt. Supp. p. 257, No. 689; see pl. 11, fig. 4; acorns are intermingled with the oak leaves in the wreath surrounding the eagle; and there is a star in the field, outside; extremely fine style of portrait, on a large spread coin, in the highest state of preservation, and of the utmost rarity:

size $9\frac{1}{2}$. weight $259\frac{6}{10}$ grs. 1

1264 Another; same type, but without ΞΩΙΑΟΥ., and the wreath of oak has no acorns; in the field are three monograms, and a plough beyond the wreath; extremely fine work; in the highest possible condition, and a most noble specimen of this most rare coin: size $9\frac{1}{2}$. weight $260\frac{9}{10}$ grs. 1

1265 Another; with ΣΑ. (in monogram) between the legs of the eagle, and two others in the field; a star beyond the wreath; in the same perfect state, and the same beautiful style of portrait; extremely rare: size $9\frac{1}{2}$. wt. $261\frac{5}{10}$ grs. 1

1266 Another; with ΔΙ. (in monogram) between the legs of the eagle, and two others in the field; a star beyond the wreath; equal to the last in work and condition, as well as rarity: size 9. weight $264\frac{5}{10}$ grs. 1

1267 Another; with ΕΥ. (in monogram) between the legs of the eagle, and ΕΟ. (in monogram) in front, and another above; a plough in the field beyond the wreath; same fine work and condition, as nearly as possible:

size $9\frac{1}{2}$. weight $260\frac{9}{10}$ grs. 1
1268 Another; with ΔΩ. (in monogram) between the legs of the eagle, and AY. (in monogram) in front; another monogram above; a plough in the field beyond the wreath; good work, and very well preserved:

size 9. weight $233\frac{1}{16}$ grs. 1

* * * The weight of this coin is difficult to account for, except it be an ancient forgery.

1269 Another; with Φ between the legs of the eagle, and two monograms in the field; a plough beyond the wreath; in very good condition, and a very fair coin:

size $9\frac{3}{4}$. weight $247\frac{7}{10}$ grs. 1

DIDRACHMS OF PHILIP ARIDÆUS, IN GOLD,

* * The attribution of this coin to Phere, in Bœotia, by Sestini, as quoted by Mionnet, Supp. vol. 3, p. 517, No. 83, does not appear admissible. It is more probably a Thessalian coin, and the difficulty occasioned by the letters TA. must remain for future solution.

\[\Box\Box\]
DRACHMS OF PYRRHUS, KING OF EPIRUS, IN GOLD.

1373 Pyrrhus; type of Mionnet, No. 12, p. 63; and type of pl. 71, fig. 7; but with a thunderbolt behind the head of Diana; and in the field of the reverse, Π, a crescent, and a thunderbolt; **exquisite workmanship, in the highest possible condition, and of the greatest rarity:**

- size 3\(\frac{1}{2}\)  
- weight 65\(\frac{5}{10}\) grs.  

1374 Another; with a Bunch of Grapes behind the head of Diana; and in the field of the reverse, a crescent and a thunderbolt; **the same exquisite style of art, and perfection in the preservation, as well as rarity:**

- size 3\(\frac{1}{2}\)  
- weight 66\(\frac{1}{10}\) grs.  

On this coin, a small portion of the drapery of Diana appears at the bottom of the neck, and shews that though the head is in profile, the body of the statue from which this bust was taken was seen nearly in front.

1375 Another; but without any drapery at the bottom of the neck, and with a bee behind the head of Diana; in the field of the reverse, Π, a thunderbolt, a cross, and a crescent, with the ends closed, making it a circle; **very perfect condition, very beautiful work, well struck, and completely rivalling the antique; but the symbols, and the style of the letters, as well as other minute particulars, give rise to suspicion:**

- size 3\(\frac{3}{4}\)  
- weight 66 grs.  

This coin is so beautifully executed that the obverse appears antique, and the reverse modern.

1376 Another; see Mt. p. 63, No. 14, exactly; **very fine work, and very good condition, but false:**

- size 4\(\frac{1}{2}\)

size 4. weight 40.2 grs.

Solium is a new town in numismatic geography. It is mentioned by Thucydides, book 2, as belonging to the Corinthians, which accounts very satisfactorily for the type of the pegasus. Stephanus, quoting Thucydides, calls the town Solium; and both writers spell the name with Ο instead of Ω. Other similar errors of the copyists occur in Thucydides, which are corrected by the coins. There is a similar coin of this town in the British Museum, from the cabinet of Mr. Burgon. Coins being the best commentators on coins, it appears probable that, that of Pyrrhus in copper, with ΦΙΑΣ, furnishes us with a clue to the name of the deified personage represented on this coin of Solium, as well as on those of Ambracia. The veiled female Head, laureate, on the coins of Pyrrhus, Ambracia, and Solium, appear to be identical.

Thyrreum; Pegasus type; well preserved; three different:

size 5.
Uncertain; Pegasus type, without letters or symbols under
the Pegasus; five different; well preserved, some rare:
size 5. 9

COINS OF ΑΕΤΟΛΙΑ, IN SILVER.

1395 ΑΕτολία; type of Μιοννετ, Supp. pl. 15, fig. 3, and p. 87,
No. 2; but with a monogram, and ΣΕ. in the field;
extremely rare, and in very fine condition:
size 7. weight 269^/10 grs. 1

** Mionnet says: "Homme à droit," &c.; but it is rather a female
habited in a short tunic or hunting dress, like Diana; and probably
represents ΑΕτολία, the province personified. See Millingen, Recueil,
&c. p. 39, where this type is fully explained. There is little doubt
that the representation on this coin is copied from the statue and
trophy which the ΑΕτολίαns dedicated at Delphi; see Pausanias,
Phocia, cap. 18, et seq. The crow and tripod on the gold coin of
ΑΕτολία, engraved in Mionnet, Supp., plate 15, fig. 1, seems further
to connect this type with Apollo, or Delphi.

1396 ΑΕτολία; Μιοννετ, p. 87, No. 5; middling condition, but
very rare:
size 7.

ΑΕτολία; type of Mt. No. 6, p. 87; but EY. and AP. (in
monogram) on the reverse; fair condition: size 3. 2

1397 ΑΕτολία; like Mt. Supp. p. 477, No. 12; but with ΦΙ. behind
the Diana? whose head is ornamented with a wreath of
laurel and turned to the right; on the reverse the figure is a
female, not covered with an aegis, but wearing a short tunic
and covered with a mantle wrapped round the left arm;
the left hand resting on a parazonium. The head of the
female is seen full face, and is ornamented with a wreath
the leaves of which project on each side of the face. In
the field is a trophy, and above it a large Δ.; a very beau-
tiful and clean coin in the highest state of preservation,
and of the utmost degree of rarity:
size 4^3/4. weight 82^8/10 grs. 1

COINS OF ΛΟΧΡΙΣ AND ΦΟΧΙΣ, IN SILVER.

between the feet of the warrior; a very beautiful coin,
particularly the reverse, and extremely rare:

size 6. weight 189\frac{1}{10} grs. 1

size 5\frac{3}{4}. weight 186\frac{4}{10} grs. 1

1401 Another; with a winged griffin inside the buckler, and a trumpet between the feet of the warrior; rubbed, but in fair condition; extremely rare:

size 6. weight 180\frac{7}{10} grs.

size 2. weight 12\frac{3}{10} grs.

Another; ΟΙΟΝ.; Mt. p. 91, No. 12; fair condition:

size 2.

Locri-opuntii; two; ΟΙΟΝΤΙΩΝ.; Mt. p. 93, No. 24; one

well preserved:

size 3.

1403 Delphi; compare Mt. Supp. p. 497, No. 27. For the type, see pl. 5, fig. 4, De Bosset, Méd. de Céphalonie, &c., Lond. 1815, 4to.; obv. Negro’s Head to the left; rev. ΔΑ. Goat’s Head, seen in front, in an indented square; of most extreme rarity, and in perfect preservation:

size 1. weight 9\frac{3}{10} grs. 1

** Having the letters ΔΑ. this coin is probably unique.

Delphi; Mt. Supp. p. 497, No. 30; De Bosset, pl. 5, fig. 1; ΔΑΑΑ.; of extreme rarity, and in very good condition:

size 2. weight 18\frac{3}{10} grs.

Another; with the dolphins differently disposed; fair condition: size 2. 4

* * Opportunities of obtaining the two former very rare types, of such a rare town as Delphi, very seldom occur.

CITIES OF BŒOTIA, IN SILVER.

1404 Bœotia, in genere; obv. Boeotian Buckler; rev. BOI. between the spokes of a wheel; extremely rare:

size 4. weight 187½ grs.

Bœotia; obv. Buckler; rev. BOIΩ, Vase, and a bunch of Grapes, in the field above; in fine condition:

size 5½. weight 190½ grs.

Bœotia; usual type; rubbed:

size 2½. 4

1405 Bœotia; obv. Boeotian Buckler, with T. on one side, and A. (of archaic form) on the other, within the hollows on each side of the buckler; rev. a Wheel, but without any letters; a very thick and old coin, in very good condition:

size 4. weight 184 grs.

* * This coin cannot with safety be classed to Tanagra, as it is possible that the objects, like letters, within the hollows of the buckler, may be something placed there for the defence of the wearer.

Bœotia; obv. Buckler; rev. four deep triangular indentations; well preserved, old and thick coin:

size 2¼. weight 93½ grs.

* * This coin, also, appears to have an object like the letter π, on each side, within the hollow; possibly it is intended to prevent the passage of a spear, or sword, through that part of the buckler.

Another; smaller; well preserved:

size 1¾. weight 41½ grs.

* * This coin, also, appears to have an object like the letter T, within the hollow on each side of the buckler.

Bœotia; obv. Buckler; rev. ΑΡΚΑ, Vase, the handles entwined with ivy leaves; well preserved:

size 5½. 4

1406 Bœotia; obv. Buckler; rev. BOIΩ, Vase with two handles; and a bow in the field above it; exquisite preservation:

size 7, elongated. weight 188½ grs.
Boeotia; * obv. Buckler; rev. four deep triangular indentations; well preserved: size 3. weight 93 3/16 grs. 2

1407 Another; well preserved: size 3. weight 92 grs.

Boeotia; * obv. Buckler; rev. BOI22. Vase with two handles, and a bunch of grapes in the field above; in perfect condition: size 6 1/4. weight 190 3/16 grs. 2

1408 Boeotia; type of Hunter, tab. 13, fig. 11; rev. Victory standing; * Mionnet, No. 60, p. 103; but with monogram, and a trident in the field; as it came from the die, but the die rather used; rare: size 4. weight 75 1/16 grs.

Boeotia; type of Hunter, tab. 13, fig. 10; rev. Neptune standing; type of Mt. Supp. No. 27, p. 505; in the field, a monogram and uncertain symbol; very rare, and in most perfect condition: size 4. weight 78 3/16 grs. 2

* * * It is most difficult to procure a specimen of this type in a tolerable state of preservation.

1409 Coronea; * obv. Buckler; rev. KO. Head of Medusa, full face, within a circular indentation; well preserved, and of extreme rarity: size 1 1/2. weight 13 9/16 grs.

Coronea, or Copae; * obv. Buckler; rev. 9. in an indented square; well preserved and rare:

size 1/2. weight 13 9/16 grs. 2

1410 Coronea; * Mt. p. 113, No. 15; extremely rare, and in very good condition: size 6. weight 260 5/16 grs. 1

* * * This coin is frequently confused with those of Neapolis in Macedonia.

1411 Dionysia; * obv. Buckler; rev. AI. Vase with two handles within a circular indentation; well preserved, and presumed to be unpublished of this weight:

size 5 1/2. weight 186 3/16 grs. 1

* * * It is to M. Dumersan that numismatists are indebted for this new classification; see his Descrip. Méd. Ant. Cab, Allier de Hauteroche, p. 45, where he quotes Ortelius, Thesaurus Geographicus, 4to., 1611, and Diodor. Sic. lib. IV. This attribution appears by far preferable to the forced reading of AI. for AIH, or AEl, in classing these coins to the town of Delium, according to the suggestion of Sestini.

1412 Another; AI.; * Mionnet, Supp. p. 512, No. 56, pl. 16, fig. 5; extremely rare, and well preserved:

size 4. weight 83 3/16 grs.

Another; but smaller; very rare:

size 2 1/2. weight 83 3/16 grs. 2

* * * There is some little doubt as to the letters being AI. on this last coin, in consequence of the silver having become oxidized, and the
letters brittle; but this type being found with its regular subdivisions, seems to confirm, very satisfactorily, the attribution of these coins to a town in Boeotia beginning with Δ., and not to regard the letters as the initials of the name of a magistrate, as generally done.

1413 Orchomenus;  EpxO.;  Mt. Supp. p. 516, No. 78, and pl. 16, fig. 9; Hunter, tab. 13, fig. 12; in the finest condition, and of the utmost rarity:  

\[
\text{size } 5\frac{1}{2}. \quad \text{weight } 189\frac{5}{16} \text{ grs. } 1
\]

* * * Combe, page 68, in describing a similar coin in the Hunter collection, considered the letters as indicative of the name of a magistrate; but modern discoveries leave no doubt of the correctness of this attribution.

1414 Orchomenus; see Pellerin, Rec. pl. 103, fig. 3, and Mt. vol. 3, p. 36, No. 29; generally ascribed to Eresus, in Lesbos, or Eretria, in Eubæa; very rare, and in very good condition:  

\[
\text{size } 3. \quad \text{weight } 41\frac{1}{16} \text{ grs. }
\]

* * * This coin may be classed with certainty to Orchomenus, in Boeotia. Its rarity, in silver, has prevented very numerous observations as to the place where it is found, and has therefore tended to impede its correct classification; but the constant finding in Boeotia of coins in copper, with various modifications of the same type and legends, and often with EP. instead of the monogram, (like Hunter, tab. 26, fig. 22), proves, not only how the monogram is to be read, but, at the same time, leads to the certain classification of all these coins to Orchomenus. In the Orchomenian inscriptions in the British Museum, the name of this town is always written, EpxOmeniN.

Orchomenus; ovb. Horse galloping to the right; rev. ER. (retrograde) three grains of Wheat, placed side by side; extremely rare, but in bad condition:  

\[
\text{size } 1\frac{1}{4}.
\]

Mycælessus;  Mt. p. 106, No. 78; MY.; very rare, and very well preserved:  

\[
\text{size } 2. \quad \text{wt. } 13\frac{1}{16} \text{ grs. } 3
\]

1415 Another; very well preserved: size 1\frac{1}{2}. weight 12 grs.

Phæ;  Mt. p. 107, No. 81; very rare, and very well preserved:  

\[
\text{size } 1\frac{1}{2}. \quad \text{weight } 13\frac{1}{16} \text{ grs. }
\]

Plataæ;  Mt. p. 107, No. 82; extremely rare, and well preserved, but somewhat rubbed: size 3. wt. 39\frac{3}{16} \text{ grs.}

Tanagra; T.A., usual type; well preserved:  

\[
\text{size } 1. \quad \text{3}
\]

1416 Tanagra; ovb. Buckler; rev. T.A., Half Horse to the right, with bridle, in an indented square; extremely rare, old work, and very well preserved:  

\[
\text{size } 4\frac{3}{4}. \quad \text{weight } 189\frac{1}{16} \text{ grs. } 1
\]
1417 Another; with TAN.; the horse has a wreath of laurel round the bottom of the neck; very old work, and extremely good condition: size 5½. weight 185\(\frac{7}{10}\) grs. 1

Coins of this rare town become extremely rare with the additional letter N.

1418 Another; with TA., but the half horse in the indented square is to the left; and the buckler is ornamented with bars on the edge; of extreme rarity, and in very good condition:

size 4\(\frac{3}{4}\). weight 188\(\frac{3}{10}\) grs. 1

It will be perceived that this, and most of the preceding coins of Boeotia, are adjusted to the talent of Ægina. This coin is a didrachm.

GOLD COINS OF THEBES.

1419 Thebes; obv. bearded Head of Bacchus, with a wreath of ivy, to the right; rev. ÒE. the infant Hercules seated, and looking to the left, strangling the serpents, in an indented square; extremely fine old work, in fine condition, shewing the whole of both types, and so rare that only two or three are known to exist: size 2. wt. 47 grs. 1

The style of work on this most rare and interesting coin, is referable to a period considerably anterior to Philip of Macedon. The position of the Infant Hercules differs from that on the silver coins. The gold is of pale colour. This is the identical coin published by Millingen, Greek Cities and Kings, 4to., London, 1831, page 58; see plate 4, fig. 11. It is a Hemidrachm of the Æginetan standard, which was in use in Boeotia in early times. It has lost, at least, a grain in weight, which would make it give a drachm of 95\(\frac{7}{8}\) grs.

1420 Thebes; obv. bearded Head of Bacchus, with a wreath of ivy, to the right; rev. ÒE., the infant Hercules turned to the right, strangling the serpents; more recent work, but appears anterior to Philip; in a very perfect state of preservation, shewing both types; very fine work, and so rare as to be the second known to exist: the gold is of pale colour: size 1\(\frac{1}{4}\). weight 15\(\frac{5}{10}\) grs. 1

The position of the Infant Hercules resembles Hunter, tab. 45, fig. 1, but the whole type is seen on this coin. If we might venture to give the same denominations to the gold sub-divisions of the Drachm, which the corresponding sub-divisions of the silver coins bear, this would be an obolus of the Æginetan standard, and gives a drachm of 91\(\frac{1}{6}\) grains.

GOLD DIDRACHMS OR STATERS OF ATHENS.

1496 Thespiae; ΘΕΣΠΙΚΟΝ., Mt. Supp. pl. 17, fig. 7; slightly rubbed on the hair, but in very excellent condition: 

size 6. weight 181\textsubscript{7}/10 grs. 1

* * This is one of the most rare coins in the whole Greek series.

1497 Uncertain of Bœotia; obv. Buckler; rev. a Diota in an indented square. For the precise form of this Diota, see the cup, fig. 1, pl. 14, vol. 3, Mionnet, Supp.; or rather the reverse of fig. 10, pl. 4, Cadalvène Réc. de Méd. Grècques. Above the diota is a leaf of laurel, and on each side of the foot is a letter, probably either ΑΑ? or ΛΛ? but difficult to decide without the removal of a thin coat of black oxide, in consequence of the die having broken during the striking; extremely well preserved, old style of work, and a very curious unique coin: 

size 5. weight 180\textsubscript{9}/10 grs. 1

* * It is possible the letters might be AN.? see Athedon, Mus. Ainsl. p. 173; Sestini, Descrip. Num. Vet., Lipsia, 1796.

1498 Athens; Mionnet, p. 111, No. 1; see Hunter, tab. 8, fig. 6; most perfect condition, and the degree of rarity too well known to require comment: 

size 4. weight 132\textsubscript{8}/10 grs. 1

1499 Another; exactly the same type in every respect, but from a different die; precisely the same style of work; and the same perfect condition: size 4. weight 132\textsubscript{7}/10 grs. 1

* * These two coins may be safely regarded as of undoubted authenticity. So much doubt and mistrust as to the existence of genuine gold coins of Athens has been caused by the statements of Eckhel and others, in print, as well as by the works of modern falsifiers, that this remark may, perhaps, be useful to distant collectors. It is now admitted that the learned Eckhel, when speaking of gold staters, in his Doct. Num. Vet. (Prolegomena Generalia, vol. 1, p. xli.), was in error in doubting the existence either of the stater aureus of Athens, or of those of Phocæa and Cyzicus; as well as in saying, at page 206, vol. 2, when speaking of the gold coins of Athens: "Hujus metalli numum nullum habemus certum." It is rather singular that he did not adopt means to verify the fact, for he was well aware of the existence of the gold coin of Athens in the Hunter cabinet, when he wrote; and, also, that good authorities held opinions contrary to his own, as to the staters of Phocæa and Cyzicus.
CITIES OF ATTICA, IN SILVER.

SILVER DECADRACHM (OR MEDALLION) OF ATHENS.

1500 Athens; obv. Head of Minerva, to the right, with Helmet as on the Tetradrachms; rev. AΘE. (retrograde) an Owl standing, seen in front, with wings extended, in an indented square; in the upper angle of which was a sprig of olive, (two leaves and a berry) only a small portion of which is visible on the coin; in perfect condition, the die slightly flawed, and of a rather rude archaic style of work:

size 9\(\frac{1}{4}\) inches. weight 664 grs. 1

** This coin gives, therefore, an Attic drachm of 66\(\frac{1}{4}\) grains, and is the second hitherto discovered. The other (from the cabinet of Mr. Burgon) is in the British Museum. This coin is the identical specimen engraved in the Voyages dans la Grèce, 2nde Livraison, by the late Chevalier Brönested, Paris, 1830, folio, p. 188 and p. 300. It is there noticed as an octodrachm, but the weight is decisive as to its being a decadrachm. Not only was this denomination of Athenian money unknown till of late years, but its name (δικά-δραχμα) has hitherto eluded the vigilance of the lexicographers. It will be found to occur, however, in the treatise, commonly called the Second Book of the Economics of Aristotle: Τῶ δὲ σῖτου πωλομένων ἐν τῇ Χάρδαξ ΑΘΕνίων, κ. ν. λ. (Εκ. § xxxiv.) In explanation of this circumstance, it is needful to observe that the passage exhibits a different reading in all the early editions of Aristotle. Even down to that printed at Oxford, in 1810, we read δικα δραχμα. The genuine text (as far as the writer is aware) was first restored in the very careful edition of the Politics and Economics, published by Goettling, in 1830; and that, too, strange to say, on the authority of all the four MSS. which the learned editor collated for his work. Thus, while a very important coin has been added to Greek Numismatology, a lost word has also been restored to Greek nomenclature.

N.B. The celebrity of this coin appears to have induced some forger to make a false die. An impression from which having been found in a drawer of one of the cabinets, it has been thought proper to allow it to accompany the true coin with the same feeling with which, it may be presumed, its late proprietor kept it.

1501 Athens; obv. Minerva; rev. AΘΕ., Owl, in an indented square; compare Combe Brit. Mus. tab. 6, fig. 10; one of the earliest or primitive tetradrachms, in very good condition:

size 5\(\frac{1}{2}\) inches. weight 261\(\frac{3}{10}\) grs.

** The eye of Minerva is large and round, like that of a horse. These primitive tetradrachms of this renowned city, may be safely referred to a period between 600 B.C. and 700 B.C.
Another; but more recent style; Hunter, tab. 8, fig. 7; Mionnet, pl. 54, fig. 1; a fine specimen of the common coin of this celebrated people, probably anterior to the period of Pericles: size 6. weight $262\frac{1}{16}$ grs.

Athens; Drachm, Hemidrachm, two Oboli, and two Hemi-oboli; all in fair condition: 8

1502 Athens; eight coins; a similar lot, but the primitive tetradrachm somewhat different from the preceding, and of very curious style and design, the eye of Minerva large and round like that of a horse:

size 5. weight $264\frac{5}{16}$ grs. 8

** In this lot also, the tetradrachm, of more recent style, is a fine specimen of the common coinage of Athens, probably anterior to the period of Pericles, and weighs $265\frac{5}{16}$ grains.

1503 Athens; a primitive Tetradrachm, still different from either of the two preceding; the eye better managed, but yet the letters AΦE. are retrograde; rubbed, but in fair preservation, and rare:

size 6. weight 251 grs.

Athens; Another, more recent style:

size 6.

** This coin weighs only $233\frac{4}{6}$ grains, which shews it to be an ancient forgery. Such falsifications very seldom occur. It is well known that the silver coinage of Athens was celebrated in Antiquity for its purity and integrity.

Athens; a Drachm; type of Hunter, tab. 10, fig. 12; AΘE. MIKI. ΘΕΟΦΡΑ.; in the field, a quadriga at full speed to the right; on the vase, M.; fine condition, and rare:

size 4$\frac{1}{6}$. weight $58\frac{6}{16}$ grs. 3

** This is the only drachm of Athens of this type in the collection. The rarity of this type and size escapes notice. It is worth remarking, that as this coin is of precisely the same age as the following tetradrachm (having the same magistrates' names), and shews no signs of having lost much in weight, it is very singular that it should be so light. The weight of the following tetradrachm would give a drachm of $64\frac{3}{6}$ grains.

1504 Athens; usual type; obv. Head of Minerva; rev. Owl on an amphora; AΘE. MIKI. ΘΕΟΦΡΑ.; in the field, a quadriga, to the right, at full speed, conducted by a winged figure; on the diota, a letter obliterated; under it ME.; very fine:

Another; ΔΙΟΝΥΣ. ΔΙΟΝΥΣΙ. ΖΕΥΣI.; on the amphora, Z.; under it, ΔΙ.; in the field, to the right, the rising Sun represented (as probably it was on some public monument) by the heads and necks of the horses of the quadriga rising from the sea, seen in front, and above them the upper half of the figure of Helios? conducting the quadriga, his head surrounded with rays; fine:

size 8. weight $243\frac{6}{10}$ grs.

* * Were it not that the weight betrays the ancient fraud, two cracks
on this coin shew it to be merely cased (or thickly plated) with silver.

Another; ΛΥΣΑΝ. ΓΛΛΥΚΟΣ. ΔΑΜΩΝ.; on the amphora, H.; under it, ΣΩ.; in the field, to the left, a tettix; in extremely good condition: size 8. wt. 260\(^{\circ}\)\(^{\circ}\)\(^{\circ}\)\(^{\circ}\)\(^{\circ}\)\(^{\circ}\)\(^{\circ}\)\(^{\circ}\)\(^{\circ}\)\(^{\circ}\) grs. 2

1517 Another; Mt. p. 147, No. 31, but with ATH.; fine preservation, and very rare: size 4\(\frac{1}{2}\). weight 87\(^{\circ}\)\(^{\circ}\)\(^{\circ}\) grs.

CITIES OF MESSENIA, LACONIA, ARGOLIS, AND ARCADIA, IN SILVER.

1616 Messenia; *obv.* compare Mionnet, *Supp.* pl. 6, obverse of the coin of Pheneus, fig. 5, but on this coin the ear of wheat is beautifully defined in front of the hair; *rev. ΜΕΣΣΑΝΙΩΝ.* disposed around the figure of Jupiter Ithomates, which is in the same attitude as on the coin Mt. *Supp.* pl. 6, fig. 2; *in perfect condition, and the style of work extremely beautiful:*

\[
\text{size } 5\frac{1}{2}, \quad \text{weight } 188\frac{3}{10} \text{ grs.}
\]

* * * This coin, as to age and style of work, is probably unique. Its age may be referred to precisely the same period as the coins of Arcadia and Pheneus, engraved in *Mionnet, Supp.* pl. 6, fig. 4 and 5; being anterior to the highly interesting coin of Messenia, published by Millingen, *Cities and Kings,* pl. 4, fig. 20; from the collection of W. R. Hamilton, Esq., with the epithet, ΙΟΩΜ, in conjunction with a representation of the same Jupiter. It is only by means of the last mentioned important coin with the epithet, that the type of the coin above described can be, with certainty, referred to Jupiter Ithomates, and a correct notion formed of the style and attitude of the statue. See Pausanias Messenics, beginning of Chap. 33.

1617 Messenia; *see Mt. Supp.* pl. 73, fig. 4; *in extremely fine condition:*

\[
\text{size } 3\frac{1}{4}.

\text{size } 3.
\]

AP[ΤΕΙΩΝ.], Diomede* s, to the right, carrying off the palladium; behind him, in the field, is a swan, with wings raised; *very fine work, not well struck, and a little rubbed, but on the whole in very fair condition, considering the extreme rarity of the coin:*

\[
\text{size } 4.3
\]

* * * This coin, according to Mionnet, appears not to exist in the French collection.

1628 Cydonia; KYΔΩΝ, same type, with a dog before the Hero stringing his bow; Mt. p. 272, No. 113; fair condition, rare size: size 6½, weight 145.3 g. * There is a fracture in the die above the dog, which resembles the upper part of a torch.

Gortyna; no legend; Mt. p. 279, No. 169; compare Combe Brit. Mus. tab. 8, fig. 10; fair condition, rare size: size 6½, weight 177.15 g. 2

1630 Another; no legend; compare Combe Brit. Mus. tab. 8, fig. 10; very rare, and very fine condition: size 7, weight 178.45 g. * There is a variation in the position of the female on the obverse of this coin, which renders it remarkable.

Hierapytna; rev. ΚΕΠΑΙΤΗ. ΝΕΩΝ. (sic.) Mt. p. 284, No. 209, but the type of the reverse is in a wreath of laurel; very rare, and very well preserved: size 4, wt. 55.6.3 g. 2

1631 Another; ΣΑΜΑΓΩΡΑΣ, Mionnet, Supp. p. 322, No. 177; see Hunter, tab. 30, fig. 15; very rare, and extremely well preserved: size 5½, weight 110.5 g. Gortyna; compare Hunter, tab. 28, fig. 22, or Pell. Réc. pl. 97, fig. 7, but no legend; very good condition: size 6½, weight 175 g. 2

1632 Itanus; type of Mionnet, Supp. pl. 10, fig. 3, but of size 6; a very fine coin; of extreme rarity of this size, in such excellent condition: size 6, weight 173 g. 1

1633 Gortyna; for type compare lot 1631, but this coin has had a retrograde legend, of which the letters NY. only remain owing to wearing of the die; nearly perfect condition, but the die worn on both sides: size 8, wt. 181.7.1 g. Itanus; see Mt. Supp. pl. 10, fig. 3; fine condition, and rare: size 3½, weight 83.6 g. 3

Itanus; same type as *Mt. Supp.* pl. 10, fig. 3, but more recent, and the reverse from a round die, dotted; the legend off the coin; *fair condition, and rare:*

size 4. weight 78.4 grs.

Phaestus; compare *Pellerin, Réc.* pl. 101, fig. 63; *Mt.* p. 290, No. 249; *fair condition:* size 6. wt. 184.1 grs. 3

1635 Phaestus; ΦΑΙΣΤΙΩΝ.; see *Hunter*, tab. 42, fig. 20; Hercules reposing, seated with his club; and his bow and quiver suspended on a broken fluted stela or column near him; *rev.* Bull, to the right, in the act of tossing, within a wreath of laurel; a *very remarkable and rare type, very good work, and in perfect condition:*

size 6. weight 183.5 grs. 1

(retrograde), a Bull to the left standing, with its legs tied, and one of them lifted up; its head approaches the ground as if drinking. The bull is standing on an uncertain object, indicated by an exergue line, from which proceed (at right angles) a series of short lines placed close to each other, and extending to the edge of the die; *rather rubbed, but in satisfactory condition, and of great rarity with this very remarkable inscription; the style of work is old, and extremely good:*

size 6. weight 179.5 grs.

* * This coin is very curious, inasmuch as it appears not only to correct the reading of that in the French cabinet, Mt. p. 290, No. 248, and
Pell. Réé., tab. 101, fig. 62; but (if we may trust the plate) seems to have been struck from the identical dies, which produced Nos. 62 and 63 of Pell. tab. 101; the obverse being identical with that of fig. 63, and the reverse of fig. 62. It might be supposed, that the uncertain representation on which the bull stands was the remains of an older type, and the coin restruck; but a careful examination of the coin seems to render such an admission very difficult. It remains, therefore, to be explained, especially by other coins of the same type.

Phalasarna; Pell. Réé. pl. 101, fig. 66; Mt. p. 291, No. 263; extremely rare and in very good condition:
size 5. weight $83\frac{4}{10}$ grs. 2

* * Mionnet has not appreciated the great rarity of this coin.

* * Mionnet has not appreciated the rarity of this coin.

Præsus; Mionnet, p. 295, No. 293; Pellerin, Réé. pl. 100, fig. 51; obr. Jupiter sitting; rev. ΠΠΑΙ, Bull in the attitude of tossing; fair condition, and extremely rare:

size 7. weight $183\frac{8}{10}$ grs. 1

* * This coin is struck upon a coin of Gortyna, like that published by Millingen, Sylloge, pl. 3, fig. 34. Mionnet does not appreciate its great rarity.
1644 Tylissus; see Mionnet, Supp. pl. 11, fig. 4; in excellent condition, but the die of the reverse is worn. This is one of the rarest cities in Crete:

size 6½. weight $179 \frac{5}{16}$ grs. 1

ISLANDS OF THE ΑΕΓΕΑN, IN SILVER.

1645 Eretria, in Euboea; see Mionnet, vol. 7, pl. 50, fig. 8, and Hunter, tab. 28, fig. 20; the obverse a little injured by scraping off the oxide, but the reverse perfect; extremely rare of this size:

size 5. weight $121 \frac{3}{16}$ grs. 1

* * * This coin has been often published, but has never been attributed to its real site by any author, except Cadalvène—see his Recueil de Médailles Grecques inédites, Paris, 4to. 1828, p. 216.

1646 Euboea; Mt. p. 301, No. 4; rare, and in very good condition:

size 10. 14

This coin, though dubious, is certainly cast upon an original, and is remarkable as affording the opportunity of recording a type and date; presumed to be unpublished.

KINGS OF PONTUS AND THE CIMMERIAN BOSPHORUS, IN GOLD.

1649 Mithradates VI. Eupator; BAΣΙΛΕΩΣ. ΜΙΘΡΑΔΑΤΟΥY.
ΕΥΠΑΤΟΡΟΣ.; Mt. p. 360, type of No. 6; in the field, to the left of the stag, is a crescent and star; to the right, Δ. and the monogram No. 718, Mt. pl. ix.; under the inscription, the monogram No. 717, Mt. pl. ix.; the rarity of this beautiful coin needs no comment; the preservation is perfect, and the portrait extremely fine:
size 5. weight 130½ grs. 1

This coin, therefore, combines the monograms on both No. 6 and No. 7, page 360 of Mionnet.
1650 Another; but instead of the Δ. and monogram No. 718, there is the date ΘΣ. (209) and the letters ΧΑ. or ΑΧ. in monogram; see Mt. Supp. p. 466, No. 8, and Dumersan, Cab. Allier, pl. 8, fig. 7; in most excellent condition, but has been in circulation: size 5. weight 127 grs. 1

* * This coin, having a date, is even more rare than the preceding.

TETRADRACHMS OF MITHRADATES VI. IN SILVER.

* * Of these rare coins, according to Mionnet, the French Cabinet only possesses ten. Their dates do not range later than on the following coins, namely, from the years 208 to 225, both inclusive.

1651 Mithradates VI. Eupator; ΒΑΣΙΛΕΩΣ ΜΙΘΡΑΔΑΤΟΥ. ΕΥΠΑΤΟΡΟΣ; type of Mionnet, pl. 74, fig. 7; see Combe, Brit. Mus. tab. 9, fig. 5; date ΒΚΣ. (222); a monogram on each side the stag, and under the inscription is Θ; of extreme rarity, in most perfect condition, and a very beautiful and clean coin: size 9\frac{1}{2}. weight 259 grs. 1

1652 Another; with a monogram on each side the stag, and Δ. under the inscription; date ΓΚΣ. (223); of the same rarity, beauty, and perfect condition as the preceding:

size 9\frac{1}{2}. weight 257\frac{5}{16} grs. 1

1653 Another; with one monogram to the left of the stag, and the date ΕΚΣ. (225) to the right; under the inscription Α.; of the same rarity and beauty, and in perfect condition:

size 8\frac{3}{4}. weight 260 grs. 1

1654 Another; with the date ΔΙΣ. (214), and a monogram behind the stag, and Θ under the inscription; a fine well preserved coin, but slightly rubbed on the prominent parts of the hair:

size 9. weight 258\frac{3}{16} grs. 1

1655 Another; with two monograms behind the stag, and the date ΔΚΣ. (224) in front of it, under the star and crescent; under the inscription Γ; well preserved, and a fine coin, although it has been in circulation, and is consequently somewhat rubbed:

size 9\frac{1}{4}. weight 251\frac{7}{16} grs. 1

1656 Another; with Δ. and a monogram behind the stag, and the star and crescent before it, but no date; a fine well preserved coin, but it appears to have been in circulation:

size 9\frac{1}{4}. weight 239\frac{5}{16} grs. 1

* * How far the absence of a date on this fine coin, and its defective weight, may be supposed to invalidate its claim to authenticity, is left to individual opinion.
The following have a Pegasus on the reverse.

1657 Mithradates VI. Eupator; having a Pegasus on the reverse instead of the stag; see Mionnet, Supp. p. 467, No. 13; date Η.Σ. (208); injured by black oxide on the obverse, but in fair condition: size 8½. weight 225½ grs. 1

This type, with the pegasus, is much more rare than the preceding. According to Mionnet there are but three in the French collection.

1658 Another; Mt. Supp. p. 467, No. 11, with the date Ε.Σ. (205), and Ν behind the pegasus; somewhat rubbed, but in good condition: size 9. weight 257½ grs. 2

The authenticity of this coin appears to be dubious.

Another; but with the type of the Stag on the reverse, and with date Θ.Σ. (219); see Mt. p. 361, No. 13; false:

size 8½. weight 268½ grs. 3

(Coins of Kings of the Bosphorus, in Gold, continued at p. 256.)

** GOLD STATERS OF CYZICUS, USUALLY CALLED DISTATERS, OR DOUBLE STATERS.**

It is now admitted that the learned Eckhel, (Doct. Num. Vet. vol. 2, page 451,) speaking of the silver staters of Cyzicus, and quoting Suidas, (in Κυζικον στατερας) was in error in adding, "pari fama fuerunt stateres Cyziceni aurei, sed verisimiliter imaginarii tantum; de quibus actum alibi." (proleg. gen. cap. ix. p. xli.) The young Collector may therefore feel assured that these coins are specimens of the Κυζικον στατερας of which Xenophon (book v.) promised his soldiers one to each man per month. That they are Staters, and not Distaters, may be proved as follows:—Demosthenes (in phorm.) speaks of the same coin, and identifies it to us, by informing us that its current value was reckoned at twenty-eight Attic Drachmas. We learn from various other sources, that the stater aureus of Athens, as well as that of Philip, and of Alexander, &c. &c. (weighing 133 grains troy) passed current at twenty Attic Drachmas, and we know them to be of pure gold. The cyzicene stater is of pale gold, or electrum, and weighs about 248 grains troy. This pale gold or electrum is about 16 carats fine, i.e. consists of about one-fourth part of silver and three-fourths pure gold. If, therefore, from 248 grains we deduct the weight of the fourth part (of silver) we obtain 186 grains of pure gold in the Cyzicene stater, and we shall then find that if 133 grains of pure gold be worth 20 Attic Drachmas, 186 grains will be worth 23 Attic Drachmas, shewing that the ancients estimated the value of these coins very accurately. There seems to be no need of taking the value of the silver (62 grains) into account, as the expense of extracting it, or separating it from the gold, would probably (in ancient times) have absorbed its value.

1774 Cyzicus; obv. draped and winged Female Figure in motion, to the left, with her head turned back, and holding up a pelamis, or tunny fish in her extended right hand; her hair hangs down in long straight dotted tresses, and is ornamented in front of the head like that of Diana; rev. quad. incus.; in most archaic style, and in extremely fine condition:

\[
\text{size } 4\frac{1}{2}, \text{ weight } 247\frac{3}{10} \text{ grs.} \]

** The general rarity of all these coins is so well known, that it does not
appear needful to discuss the particular rarity of each. Many will be found to be unpublished, and several are presumed to be unique. To the latter important class, the above described coin, and several of the following, will be perceived to belong. Also, it may be here remarked, that so little is known of the Mythology connected with the city of Cyzicus, or of the local traditions anterior to the period to which these very interesting coins belong, that no attempt is here made to assign names to the representations which are found upon them. These are each worthy of separate dissertations, after due study and research.

EL. size 4\( \frac{3}{4} \) grs. 2

** This is the identical coin described by Mionnet, from the Allier cabinet; see Dumersan, pl. 10, fig. 4; but a certain sandy appearance, and the defective weight of this coin, lead to the opinion that it is a cast, notwithstanding the various examinations to which it must have been subjected.

1886 Another; ΕΙΦ. (515); see Mt. Supp. p. 527, No. 232; Elagabalus laureate, with the paludamentum; extremely fine condition:

very pale EL. size 4\(\frac{1}{4}\). weight 116\(\frac{1}{10}\) grs. 1

\*\* This coin and the preceding bear very interesting dates.

1895 Another; ΕΚΦ. (526); see Mionnet, Supp. p. 531, No. 249; extremely good condition:

very pale EL. size 4. weight 111\(\frac{3}{10}\) grs. 1

\*\* This is the identical coin described by Mionnet, from the Allier cabinet; see Dumersan, pl. 10, fig. 8.

1896 Another; CKΦ. (526); see Mt. Supp. p. 531, No. 250; in very good condition:

very pale EL. size 4\(\frac{1}{2}\). weight 117\(\frac{2}{10}\) grs. 1

1897 Another; ZΚΦ. (527); see Mt. Supp. p. 531, No. 251; but a trident before the bust of Cotys; in very good condition:

1898 Sauromates V.; [BA]CIAEwC. CAY[ROMA]TOY.; rev. EKΦ. (526); see Mt. Supp., p. 533, No. 256; unfortunately in very bad condition, but the name and date quite certain; rubbed:
very pale EL. (or silver). size 4. wt. 102 6/10 grs.

This is the identical coin published by Mionnet, from the Allier collection; see Dumersan, plate 10, fig. 7. It has been published as of silver, but it is very difficult to decide whether it be silver or pale electrum. The date on this coin and on the four preceding are very interesting.

Another; rev. Bust of Sev. Alexander, laureate, with two pellets before; ZΚΦ. (527); see Mionnet, Supp., p. 533, No. 257; but there is on this coin a wreath before the bust of Sauromates; in perfect condition:
very pale EL. (or silver). size 4. wt. 115 1/10 grs.

1899 Ininthimeyus; BACI[ΔEwC]. ININΘIMHYOY.; rev. ΕΛΦ. (535); see Mt. Supp., p. 536, No. 264; in very fair condition: Silver (or potin?) size 4 1/2. wt. 92 2/10 grs.

See Mionnet's note (a) as to the representation on the reverse of this rare coin. It is about the time of the Emperor Gordian. This is the identical coin from the Allier cabinet, described by Mionnet; see Dumersan, pl. 10, fig. 9.

Rhescuporis VII.? obv. BACΙΛΕwC. ΡΗΣΚΟΥΠΟΡΙΔΟY. rev. ΑΕΦ (561); Bust of Gallienus? laureate, before it I. (or a sceptre?); compare a copper coin in Mt. Supp., p. 541, No. 284; fair condition: not in Mionnet:
Silver (or potin?) size 4 1/2. rubbed weight 103 grs.

From the Allier collection; see Dumersan, p. 66.

Another; obv. BACΙΛΕwC. ΡΗ[ΣΚΟΥΠΟΡ]ΙΔΟ. (sic.) rev. ΒΕΦ. (562); very fair condition; not in Mionnet:
Silver (or potin?) size 4 1/2. weight 111 6/10 grs.

In Mionnet there is nothing in silver or potin of this king, of a later date than 549.

KINGS OF THE BOSPHORUS, IN COPPER.

The correct classification or attribution of coins belonging to this interesting series, which have not dates, is still to be regarded as extremely unsettled and worthy of study. The following coins become, therefore, of importance, in consequence of their unusual state of preservation, as well as their rarity. The greater part of them, like the preceding, of
gold and electrum, are from the collection of the late Chevalier Allier de Hauteroche, and have been published and engraved by M. Dumersan; Descrip. des Méd. Ant. du Cabinet Allier, Paris, 4to. 1829. As they are for the most part newly discovered coins of the utmost rarity, and many unique, no attempt is made to distinguish the relative scarcity of each, except by reference, either to Mionnet, or to the interesting record of the Allier collection preserved by M. Dumersan, in the work so often quoted.

1900 Rhescuporis I.; see Mionnet, Supp. p. 487, No. 33; Dumersan, pl. 8, fig. 18. This is the identical coin described and engraved; in fine condition: size $6\frac{1}{2}$.

Rhescuporis I.; different type; not in Mionnet; compare p. 489, Supp. No. 41; see Dumersan, pl. 8, fig. 16. This is the identical coin; perfect condition, but the legend rather off the edge: size $6\frac{1}{2}$.

* * On this class of coins the letters IB. (12) ΔK. (24) and MH. (48) often occur. It is presumed that these numerals can only be regarded as indicative of the current value of the coins. It will be noticed, (notwithstanding certain irregularities) that the larger pieces are those on which MH. occurs, and the smaller or thinner, those with IB.

Rhescuporis I.; TIBEPIOE. IOYAOE. BAEIAEYE. PHE. KOYnOPE.; for the obv. of this coin compare Mt. Supp. p. 487, the reverse of No. 34; and for the rev. compare the reverse of No. 36, p. 488; but see Dumersan, pl. 8, fig. 17, where this identical coin is engraved; in very good condition: size 8.

* * It was probably a mere motive of adulation or compliment, which induced some of these Kings to take the names of the Roman Emperors.

Another; see Mt. Supp. p. 488, No. 38; obv. the same as the preceding; rev. MH. within a wreath; middling condition: size 7.

1901 Rhescuporis I? obv. his Portrait; rev. MH., Victory with a wreath and palm branch; rather barbarous style of work; very middling condition: size 6.

* * From the Allier collection; see Dumersan, p. 64.

Rhescuporis II.; Mionnet, Supp. p. 492, No. 58; rev. Tiberius, TIBEPIOU. KAIΣAPΟΣ.; perfect condition: size $5\frac{3}{4}$.
Another; rather different style of mintage, see Dumersan, pl. 8, fig. 24. This is the identical coin there engraved; in *very good condition*: size 5.

Another; *rev.* Caligula; ΓΑΙΟΥ. ΚΑΙϹ[ἈΠΟϹ]. [ΤΕΡΜΑ.] ΝΙΚΟΥ.; see Mt. Supp. p. 493, No. 63; *very fair condition*: size 5.

Mithradates; ΒΑϹΙΑ[ϹωϹ.] [Μ]ΙΘΡΑΔΑΤΟΥ.; see Mt. Supp. p. 494, No. 66; *not in the French cabinet; very fair condition, though broken*: size 6. 5

* * From the Allier collection.

1902 Геφερиес, (Queen of Mithradates?) [Β]ΑϹΙΑΙϹϹΗϹ. ΤΗϹΙΑΙΗΥ[ΡΕΩϹ.] showing distinctly the beginning of the name; see Mt. Supp. p. 496, No. 69, and Dumersan, pl. 8, fig. 15. This is the identical coin there engraved.

Another; shewing distinctly the ending of the name [ΤΗϹΙΑΙΗΥΠΕΡϹΗϹ.]; *both in very fair condition, from the Allier cabinet*: size 6. 2

* * It was the union of these two identical coins in the Allier cabinet, which enabled their learned owner to discover the name of this unknown Queen, and to correct the first faulty notions that her name was Paepyrus or Papiris. Even so late as the publication of Sestini's 2nd edit. of his Classes Generales, (1821) we find at page 62, ΒΑϹΙΑΙϹΗϹ ΠΕΠΑΙΡΙϹΗϹ vel. ΠΕΠΑΙΡΕϹΗϹ. at which period she was considered to be the Queen of Sauromates I.; see the very curious notes on this matter in Mt. Supp. vol. iv. p. 494 (b and c); see also the note of Dumersan, following his description of these identical coins, at page 64; see further, another note by Dumersan on this subject, at page 66.

1903 Cotys I.; [ΤΟΥ]Α ΠΟΥΡΤΟΥ. ΤΕΙ[ΜΑΙ?]; for the type compare with Mionnet, Supp. p. 499, No. 86; *very fair condition*: size 5½.

* * This coin has the letters ΚΔ. (24) before alluded to, and is from the Allier cabinet.

Cotys I.; IB. in front of his Head with diadem, and monogram behind: *rev.* Head of Britannicus, ΚΑΙϹΑΙϹΗϹ. ΒΡΙΤΑΝΝΙΚΟΥ.; *not in Mionnet; probably unique and unpublished; very fair condition*: size 4½.

Cotys I.; see Mt. Supp. p. 499, No. 89; *obv.* Claudius; *rev.* Agrippina; see Dumersan, pl. 9, fig. 6; *in very good condition*: size 6. 3

* * This is the identical coin described by Mionnet, and engraved as above noted.
1904 Another; from the same collection; very good condition:

size 6.

** Probably found later, since it corrects the reading ΞΕΑΝ. which the engraver has indicated, and shews clearly that the legend begins ΤΟΤΑΙΑΝ. ΑΠΠΙΗ. [ΙΝΑΝ.] ΑΟΙ ΞΕΑΝ. ΑΠΠΙΗ.ΙΝΑΝ. Cotys I.; see Mt. Supp. p. 500, No. 91; obv. Nero; rev. Poppaea; see Dumersan, pl. 9, fig. 7; rubbed, but in fair condition; a new and curious coin in this series:

size 6½.

Sauromates II. or III. [ΒΑΣΙΛΕ]ΙΟC. ΚΑΥΠΟΜΑΤΟΥ. his Bust to the right, with diadem and paludamentum; rev. MH., Victory with crown and palm; very fine condition, and very good work: .

size 7. 3

** From the Allier cabinet; see Dumersan, p. 65.

1905 Rhescuporis III. obv. ΒΑΣΙΛΕ]ΙΟC. ΥΙΚΟΥΠΟΡΙΔΟC., his Bust to the right, with diadem and paludamentum; rev. the King on horseback, with a star under the horse; in very good condition: .

size 6.

** From the Allier cabinet; see Dumersan, p. 66.

Sauromates III? obv. same as before; rev. Female, with a round object in her extended right hand, and a spear in her left, seated between a bearded bust (of Severus), a star, the letter B., and an uncertain square object, divided into four square parts, with a pellet in each; very good condition:

size 6½.

** From the Allier cabinet; see Dumersan, p. 65. If the bust be of Severus, this will be probably a coin of Sauromates IV.

Another; very interesting, from having the bust (of Severus) and the letter B. separately impressed, by means of a punch, or countermark, precisely where the same objects occur in the type of the preceding coin, proving this to be the earlier of the two, and indicative of a projected change in the type; very well preserved:

size 7.

** From the Allier cabinet; see Dumersan, p. 65. This class of countermarks seems likely to explain the motive of certain variations in the types of coins, and it is to be regretted that similar examples should be of such very rare occurrence. There is one in the British Museum (from the cabinet of Mr. Burgon) on which the countermark of an owl is stamped upon a particular portion of the
serpent on a coin of Pergamus, with ΛΣΚΑΙΗΠΟΥ. ΖΥΘΡΩΣ. indicative of a change in the type itself, which subsequently took place as shown by a later coin from the same cabinet.

Sauromates III. or IV.; obv. ΒΑΚΙΑΣΩ ΚΑΥΡΟΜΑΤΟΥ. Bust, bearded, and to the right, with broad diadem and the paludamentum: a different portrait; rev. the King on horseback, with a spear; behind the king is a star, and between the fore legs of the horse B.; fine condition: size 8.

* From the Allier collection: see Dumersan, page 65.

Another; with different portrait; rev. an Eagle to the left, with wings extended, looking back, with a wreath in its beak; in the field PMΔ. (query 144); in very fair condition:

size 6. 5

* From the Allier cabinet; see Dumersan, p. 65.

1906 Sauromates III.; see Mt. Supp. p. 505, No. 112; in fine condition:

size 7.

Rhaemetalces; see Mt. Supp. p. 510, No. 138; in very good condition:

size 6.

Eupator; see Mt. Supp. p. 514, No. 158; with ΚΔ. (24); in very good condition:

size 6.

* From the Allier cabinet; see Dumersan, p. 65.

Thothorses; ΒΑΚΙΑΣΩ ΚΑΥΡΟΜΑΤΟΥ. ΘΩΘΟΠΟΥ. rev. Diocletian? ΠΦ. (586); see Mt. Supp. p. 544, No. 290, and Dumersan, pl. 10, fig. 10; very good condition: size 4 1/2.

* From the Allier cabinet. The identical coin engraved.

Rhescuporis VIII?; see Mt. Supp. p. 548, No. 309, and Dumersan, pl. 10, fig. 11; but on the coin (which is well preserved) are the letters ΟΥ ΧΣΚΟΥ, query to be read PHΣΚΟΥ[ΠΟΙΔ]ΟΥ. rev. Bust of Constantine? under which is IX. (610), and ΑΥ.; in perfect condition:

size 4. 5

* This is the identical coin described and engraved, from the Allier collection.

( Greek Cities, in Silver, continued from page 256.)

CITIES OF MYSIA AND TROAS, IN SILVER.

1907 Assus, in Mysia; ΑΣΣΙΟΝ.; obv. Head of Minerva to the right, her helmet ornamented with a laurel wreath in front;
rev. as in Mionnet, p. 522, No. 50; see Combe Brit. Mus. tab. 13, fig. 22, but head of Minerva reversed; very well preserved, and so rare that, according to Mionnet, the French Cabinet does not possess a specimen:

size 2\(\frac{3}{4}\)  weight 40\(\frac{1}{10}\) grs. 1

"* This is an unpublished variety.

(Greek Cities, in Silver, continued at page 277.)

COINS OF CYZICUS IN GOLD.

1908 Cyzicus, in Mysia; obv. Dog or Wolf? to the left, standing on a tunny-fish; rev. quadratum incusum; very rare, and in very good condition: size 1. weight 40\(\frac{5}{10}\) grs. 1

1909 Cyzicus; obv. Half Lion devouring, to the left, behind is a fish; rev. quad. incus.; very rare, and in good condition:

size 1. weight 40\(\frac{1}{10}\) grs. 1

"* These are Cyzicene Hecte. See the note at the end of the Phoccean Hecte, page , explanatory of this new denomination of Greek coins.

STATERS OF CYZICUS, IN GOLD.

(Continued from page 246).

size 4\(\frac{1}{2}\)  weight 246\(\frac{3}{10}\) grs. 1

"* The authenticity of this specimen is left to individual opinion.

1913 Cyzicus; obv. Griffin, walking to the left, with curled wings, (on a tunny-fish? off the coin?) rev. quad. incus.; fine condition:

CITIES OF MYSIA AND TROAS, IN SILVER.

(Continued.)

1999 Lampsacus; usual type; obv. Double Head; rev. ΛΑΜΨ, Head of Minerva to the right, with helmet, but on this coin the double head is resting on a dolphin to the right; in fine condition; an unpublished variety:

size 2. weight $18\frac{4}{10}$ grs.

Parium, in Mysia; obv. Head of Medusa, as usual; rev. ΠΑΠΙ., a cow on an ear of corn, to the left, and looking back; perfect condition: size 3. weight $36\frac{8}{10}$ grs.

Another; without the ear of corn; perfect condition:

size 2\frac{1}{2}. weight $36\frac{1}{10}$ grs.

Another; with an ivy leaf under the cow; rubbed: size 2.

Pergamus, in Mysia; obv. Head of Hercules with lion's skin, to the right; rev. [ΠΕΡ]ΓΑΜ., Palladium, or terminal figure of Pallas armed, seen in front; very rare, and fine:

size 2. weight $18\frac{9}{10}$ grs.

* * The additional letter m proves the coin not to be of Perga in Pamphilia.

Pergamus; a Cistophorus, with BA. and the usual monogram; as it came from the die:

size 6\frac{1}{2}. weight $193\frac{9}{10}$ grs.

Abydus, in Troas; usual type; obv. Medusa; rev. Anchor; two, rubbed:

sizes 2\frac{1}{2} and 3\frac{1}{2}. 8

TETRADRACHMS OF THE KINGS OF PERGAMUS, IN SILVER.

2000 Philetærus (Attalus I?); type of Mionnet, pl. 75, fig. 5, except that this coin has A. on the throne; uncommon portrait, with narrow fillet; fine work, extremely rare, and perfect condition: size 8. weight $262\frac{8}{10}$ grs. 1
2001 Another; but the portrait more as usual, with narrow fillet; a very fine coin, and rare: size 8. wt. 263\(\frac{4}{10}\) grs. 1

2002 Another; with narrow fillet and the eye remarkably small; rare, and very fine condition; size 8. wt. 261\(\frac{9}{10}\) grs. 1

2003 Philetærus (Attalus?); laureate; A. and ivy leaf in the field; buckler and bow behind Minerva; a very fine coin:
size 8. weight 263\(\frac{4}{10}\) grs. 1

2004 Philetærus (Attalus?) with the laurel wreath entwined with the fillet or diadem; quite a different portrait to any of the preceding; buckler and bow behind Minerva, and A. with bunch of grapes in front; very fine condition, and rare portrait:
size 8. weight 259\(\frac{6}{10}\) grs. 1

2005 Philetærus (Eumenes); the laurel wreath entwined with the diadem, and with his monogram; in front is a bee, and behind the Minerva, a bow and a buckler; very well preserved, and very rare: size 8\(\frac{1}{2}\). weight 262\(\frac{9}{10}\) grs. 1

2006 Philetærus; precisely like lot 2001, except that this coin has the laurel wreath entwined with the diadem; in very good condition: size 8. weight 263\(\frac{8}{10}\) grs. 1

* * This coin shows, more distinctly than usual, that the twisted appearance of the laurel-wreath on the heads of some of these kings, is, in fact, the diadem entwined round the laurel-wreath.

2007 Philetærus (Attalus?) portrait and reverse exactly like lot 2003; very well preserved, but the die somewhat used, and not so fine a coin: size 9. weight 261\(\frac{6}{10}\) grs. 1

2008 Philetærus (Attalus?); the portrait somewhat like Eumenes; in the field behind Minerva is a bow, and under her hand is a very unusual monogram, which does not seem to contain either the word Attalus or Eumenes, as P. is distinctly observable; not in Mionnet; in very good condition, looks like a cast, but is perfectly genuine:
size 8\(\frac{1}{2}\). weight 258\(\frac{2}{10}\) grs. 1

     size 8½. weight 258½ grs.
2016 Another; with ΦΙΑΛΩΞΟΞ; very rare, and nearly in the condition in which it was struck:

size 8\frac{3}{4}; weight 234 grs. I

* * This coin does not appear to be an ancient forgery, or plated coin; and the weight is, therefore, difficult to account for.

2017 Another; with ΜΗΤΡΟΦΑΝΗΣ; very rare, and in perfect condition:

size 9; weight 248 grs. I

2018 Another; with same magistrate; very rare, and in very fine condition:

2021 Methymna; obv. type identical with Mionnet, pl. 56, fig. 1; the letters above the boar unfortunately rubbed; rev. like the same plate, but the front of the helmet is ornamented with a projecting half horse, winged, and has the well defined inscription ΜΑΘΥΜΝΑΙΟΣ; archaic style of work; the obverse in very fair condition, the reverse very good:

size 4\frac{3}{4}; weight 128\frac{2}{10} grs. I

* * This is a coin of great rarity with the addition of the inscription on the reverse.

2022 Methymna; Mt. vol 3, p. 38, No. 42; in the field is a dolphin; well preserved, and rare:

size 2\frac{3}{4}; weight 41\frac{6}{10} grs. I

(Continued from page 269.)

2051 Carausius; rev. the Emperor standing (his left hand resting 
on the hasta pura) and shaking hands with Britannia, who 
holds the trident in her left hand; EXPECTATE. VENI; 
an unique and very singular legend; in the exergue, R.S.R. 
(Richborough?); very well preserved, and extra rare 1 

** This coin, of far better silver than Carausius' generally are, is the 
identical one engraved in Akerman, Vol. II. p. 154; and mentioned 
likewise at page 122 of his recent publication, "Coins of the Ro-
mans relating to Britain." A very interesting silver medal of this 
type, in the British Museum, reads, EXPECTATE. VENI. See also 

2052 Carausius; rev. a Female, seated on a low stool, milking a 
cow; VBERVTA. AV. (sic.); in the exergue, R.S.R.; toler-
rably well preserved . . . 1

* * * This medal may be called extra rare. It is not in Mionnet, but in Akerman, No. 32 and 139.

2058 Carausius; rev. Altar with fire, and MVLTIS. XX. IMP.; legend, VOTVM. PUBLICVM.; in exergue, R.S.R.; of good silver, well preserved, and extra rare . . . 1

2060 Carausius; rev. type and legend as the last; not very well preserved, but still very valuable, owing to its rarity and interesting reverse . . . 1

We do not believe that "any" collection possesses eleven medals (in silver) of Carausius.

2107 Hedlinger (himself) and his Wife; pl. ii.—1; rev. two Coats of Arms on two shields, one concave, one convex, allusive to his nuptials; of the greatest rarity, as this die broke in the artist's life-time; very few indeed of these medals exist with this reverse 1

EIGHTEENTH DAY'S SALE.

(Greek Cities, in Copper, continued from page 277.)

GREEK IMPERIAL COINS OF BITHYNIA, MYSIA, AND TROAS, IN COPPER.

LOT 2121 Apamea, in Bithynia; Gallienus; rev. Figure, with rudder and cornucopia; compare Mionnet, vol. 2, p. 415, No. 38; fair condition: size 7.

Bithynia; Hadrian (Medallion); rev. KOINON. BEIΘY-NIAC, an octostyle temple, with a wolf nourishing Romulus and Remus in the pediment; very fine, and clean: size 9½.

Cius; Hadrian; rev. ΑΔΠΙΑΝΩΝ. ΚΙΑΝΩΝ, Minerva standing, with spear and buckler; fair condition: size 5.

Cius; Orbiana; rev. ΚΙΑΝΩΝ., Hero seated on a rock to the right, adjusting his sandals; fine, and very rare: size 6.

* * This is the identical coin published and illustrated by Mr. Akerman in the Gentleman's Magazine for Jan. 1835.

Hadrianopolis; Gordian; rev. tetrastyle Temple; fair condition: size 7. 5

2122 Bithynium; Antinous (Medallion); see Mt. Supp. p. 20, No. 100; obv. H. ΠΑΤΡΙC. ANTINOON. ΘΕΟΝ, Bust of Antinous to the left; rev. BEIΘYNIEΩΝ. ΑΔΠΙΑΝΩΝ., Antinous standing to the right, looking back, habited in a tunic? and chlamys? a pedum in his left hand, and his right (holding a small ill-defined object?) stretched towards a tall reed, with flag-leaves pendant on both sides, near which in the distance, beyond the figure of Antinous, stands a bull; above is a star; of the highest degree of rarity; in very fine preservation, very clean, and of fine yellow brass: size 11. 1

* * This fine and rare medallion bears traces on the edge of having been set in a silver rim or mounting by the ancients. It was struck in the native city of Antinous, which was situated on the banks of the river Sangaris. The elegantly executed type of the reverse has
every appearance of having been copied from a painting. In the symbolical language of antiquity, it may be said to represent Antinous as a Shepherd, by the side of the river Sangaris at night, and probably commemorates some particular event of his life not mentioned in history; see Pausanias, Arcadic, cap. ix. towards the end.

2123 Hadrianopolis, in Bithynia; Antinous, (Medallion); see Mt. vol. 2, p. 434, No. 132; of extreme rarity, but in rather middling condition; looks sandy, but is genuine:

size 11. 1

2124 Nicæa; Messalina; МΕΣΣΑΛΙΝΑ. ΣΕΒΑΣΤΗ. ΝΕΑ. ΗΡΑ.; see Mt. p. 450, No. 213; in very fair condition, and of clean yellow brass:

size 8½.

** This coin has the edge smooth, and an unpleasant sandy look on both sides, but is genuine, and of the utmost rarity.

Nicæa; Domitian; rev. the Farnesian Hercules; see Mion-net, Supp. vol. 5, p. 85, No. 431, and Dumersan, pl. 11, fig. 4; fine, and an extremely rare and interesting reverse:

size 6.

** From the Allier collection; this being the identical coin engraved and published as inedited.

Nicæa, in Bithynia; Commodus; rev. КОММЕΌΙA., three naked Figures (Athletæ?) standing round a vase, (anointing themselves?); compare Mt. vol. 2, p. 457, No. 252; extremely rare, and in very fair condition:

size 8.

Nicæa; Tranquillina; rev. Figure in a hexastyle Temple;

fine:

size 6. 4

2125 Nicomedia; Macrinus; rev. the Staff and Serpent of Æsculapius; very fair condition:

size 4.

Tium; ΑΝΤΙΝΟΩΙ. ΗΡΩΙ., Head of Antinous to the left; rev. [TI]ΑΝΟ[Ι.]; see Mt. Supp. p. 259, No. 1507; head very good, reverse very middling, but of extreme rarity:

size 9.

** In proof of the genuineness of the rare coin forming lot 2123, and the Messalina in lot 2124, observe the peculiar sandy appearance on a small portion of this most undoubted coin. It is a peculiarity in the metal, (yellow brass) used about this period in the coinage of Bithynia and Mysia.

Cyzicus; Faustina jun.; rev. Diana in hunting dress, with bow; rare, and very fine:

size 7.

Cyzicus; Diadumenian; rev. Bull; very good condition:

size 5. 4
2126 Tium; Antinous; as in the preceding lot; much rubbed, and in very bad state on both sides: size 9.

Cyzicus; Faustina jun.? KOPH. COTEIPA. [KYZIKH-
NON.]; rev. Galley; rare, and very fair state: size 9.

Lampsacus; Severus; rev. ΛΑΝΨΑΚΗΝ[ΩΝ.](sic.) Priapric terminal Figure holding thyrsus and vase near an altar, on which is fire burning; very good condition, and extremely rare:

Pergamus; Trajan; tetrastyle Temple on obv. and rev.; see Mt. Supp. p. 434, No. 962; very rare, and very good condition:

Pergamus; Commodus; rev. Æsculapius; very good condition:

Pergamus; Commodus; rev. Æsculapius in a hexastyle temple; very rare, but bad condition on both sides: size 9½.

2127 Pergamus; Ant. Pius, (Medallion); rev. the Apollo of Miletus and Æsculapius standing; very fine, and rare:

** This coin is also of the same metal as that pointed out in the note to the coin of Tium in lot 2125. It has not been cleaned; but if cleaned would look sandy like the Messalina in lot 2124.

Pergamus; Commodus; rev. Æsculapius; very good condition:

Pergamus; Commodus; rev. Æsculapius; very good condition, and extremely rare:

** This coin is also of the same metal before mentioned.

Ilium; M. Aurelius; rev. ΚΑΙΑΜΑΝΔΟΣ. ΗΛΙΟΝ, the Scamander personified as a bearded old man, half draped and recumbent, with a vase under his arm; very fine, and extremely rare: size 5½. 10

* * * This very interesting coin appears not to exist in the French collection.

(Greek Cities, in Copper, continued at page 312.)

STATER OF CLAZOMENE, IN GOLD.

2129 Clazomene; obv. winged Half Boar to the right; rev. quad. incusum; unpublished? and extremely fine: size 4½. weight 217 grs. 1

* * * There is no indication of the tunny fish on this coin; and its weight differs from that of the Cyzicene staters. It is, therefore, to be distinguished from the analogous type, (really of Cyzicus) engraved by Mionnet, Supp. Vol. 5, pl. 2, fig. 2, and may be pretty safely ascribed to Clazomene, especially by the help of the weight of the following coin.

(Greek Cities, in Silver, continued from page 281.)

CITIES OF IONIA, IN SILVER.

2130 Clazomene; obv. winged Half Boar to the right; rev. quad. incus.; extremely rare, and in very good condition: size 4. weight 107 grs.

* * * The weight of this silver coin being half the weight of the gold stater, (which it precisely resembles in type and age) favours extremely the classification of the gold coin to Clazomene. The weight of coins is often a most useful help to the correct classification of the uncertain, though hitherto neglected.

Clazomene; same type; very fine: size 2. wt. 14⅜ grs. 2

2131 Clazomene; obv. full faced Head of Apollo, laureate; rev. ΚΑΛΙΟ[ΜΕΝΙΩΝ.] ΗΠΑΚΑΕΙΔ[ΗΣ,?] Swan to the left, with head turned back and wings expanded; presumed
to be unique, and unpublished of this type; in perfect condition, and fine work, but the obverse a little injured by oxide: size 6½. weight 250 3/10 grs. 1

COIN OF EPHESUS, IN GOLD.

2132 Ephesus; precise type of Mionnet. Supp. vol. 6, pl. 3, fig. 2, with the small stag and bee on each side the base of the statue on the reverse, but without any letters; unpublished, and in perfect condition, probably unique:

size 3. weight 84 3/10 grs. 1

** This coin is of pure gold, and of a comparatively low period. Its weight offers some difficulty as to its denomination. It must however be assimilated to the weight of the silver coin forming lot 2134, and also to the weight of the fine gold coin of Clazomene, in the French cabinet, (Mt. p. 63, No. 8) which weighs 87 3/10 English grains. The gold coins of Ephesus and Smyrna, in the same magnificent collection, do not help the difficulty, being both attic didrachms.

CITIES OF IONIA, IN SILVER. (Continued.)

2133 Ephesus; obv. ΕΦ, Bee; rev. quad incus; extremely rare, and in very good condition: size 4. wt. 117 1/10 grs. Another; fine, and very rare: size 3 1/2. wt. 49 5/10 grs.

Ephesus; obv. ΕΦ, Bee; rev. ΕΦ, two stags’ heads and necks facing; see Hunter, tab. 26, fig. 5; extremely rare, and in very good condition: size 1. wt. 14 3/10 grs. 3

2134 Ephesus; obv. Head of Diana to the right, with the usual ornament in front, and the hair flowing; rev. ΕΦ, Quiver and Bow, with a bee in the field, and EXEANA(ξ); see Mionnet, Supp. vol. 6, p. 115, No. 230; in perfect condition: size 4 1/2. weight 86 2/10 grs. 1

** The first coin discovered of this new type is in the collection of Mr. Huxtable. That above described is presumed to be the second known, and is the identical specimen published by Mionnet, who has singularly erred in his notion of its rarity. A long passage in Polyaenus Strat. (lib. vi. cap. 49 Anaxagoras) gives a peculiar interest to this remarkable coin; since there can exist no reasonable doubt that the Exeanaξ, whose name occurs on it, is the individual mentioned by Polyaenus. The coin, by its style of work and peculiar type, can be readily referred to the precise period of time, (during the reign of Lysimachus, and shortly after the death of Alexander) to which the narrative of Polyaenus applies; and the name is too remarkable, and of too rare occurrence, to permit the supposition that
two persons named Echeanax, should have been contemporaneously mixed up with Ephesian affairs; see (in connexion with the type of this coin) a paper "On the City of Ephesus when called Arsinoe," in the Numismatic Chronicle, Vol. 2, page 171; and the editor's note at page 176, as well as the plate illustrative of the paper.

2135 Ephesus; type of Mt. Supp. vol. 6, pl. 3, fig. 4; but with ΚΑΛΑΙΣΤΡΑΤΟΣ; in very fine condition:

size 5. weight 102 4/10 grs. 1

** This elegant coin presents us with a most happy effort of Asiatic Greek art in the delineation of female beauty, a little anterior to the descent of Alexander the Great into Asia. There is such an appearance of individuality in the features, as almost to lead to the opinion that this Head of Diana hands down to us the real portrait of an Ephesian Lady, instead of an ideal representation of the Goddess; but such an idea, however pleasing, seems inadmissible.

2136 Another; with ΜΙΝΝΟΣ; also a very beautiful coin, in perfect condition, and extremely fine work:

size 5. weight 100 5/10 grs. 1

2137 Another; with ΕΡΜΩΝΑΞ; in perfect condition, and very fine workmanship:

size 5. weight 101 9/10 grs. 1

2138 Another; with ΠΙΥΘΩΓΟΡΑ[Σ]; very sharp on both sides, and very good work:

size 5. weight 101 3/10 grs.

Erythrae; type of Mionnet, pl. 76, fig. 4; ΔΙΟΝΥΣΙΟΣ; fine:

size 3. weight 54 7/10 grs. 2

2139 Ephesus; type of that in the preceding lot; bust of Diana, and ΝΑΥΚΡΑΤΗΣ; very fine on both sides, and very good work:

size 5. weight 100 7/10 grs.

Erythrae; type of that in the preceding lot, but with ΔΙΟ- ΠΕΙΘΗΣ; fine:

size 3. weight 54 9/10 grs. 2

2140 Ephesus; type of Mt. Supp. pl. 3, fig. 5; ΖΗΝΟΔΟΤΟΣ; fine:

size 6. weight 232 4/10 grs.

Ephesus; type of that in the preceding lot; Bust of Diana, and ΣΚΟΠΑΔΗΣ; in very good condition:

size 5. weight 97 5/10 grs. 2

size 6 4/10. weight 221 7/10 grs.

Ephesus; with Bust of Diana, as in the lot preceding; ΔΙΟΝΥΣΙΟΣ; fair condition:

size 5. weight 100 3/10 grs. 2

2142 Ephesus; type of Mt. Supp. pl. 3, fig. 5, with ΗΓΕΔΟΧΟΣ; in fair condition:

size 6. weight 228 7/10 grs.
Ephesus; with Bust of Diana, as in the lot preceding, and EKATAIOΣ.; good work, and fine condition:
size 5. weight 101 \(\frac{9}{10}\) grs. 2

2143 Ephesus; a cistophorus date NP. (year 53); fine:
size 6\(\frac{1}{2}\). weight 195 \(\frac{9}{10}\) grs.

Ephesus; see Mt. p. 86, No. 188; ΝΙΚΟΛΟΟΧΟΣ.; good condition:
size 4.

Ephesus; with Bust of Diana, as in the preceding lot, and ΓΡΥΛΙΣ. (false): size 5. weight 123 \(\frac{8}{10}\) grs. 1

GOLD COIN OF ERYTHRÆ?

2144 Uncertain; obv. Head of Heracles, with lion's skin, to the left, in archaic style; rev. quad incus. divided into four parts, two of the squares deep, and two shallow; very rare, unpublished, and in fine condition:
size 1\(\frac{3}{4}\). weight 38 \(\frac{8}{9}\) grs. 1

* * This coin is of gold, and anterior to the class of electrum coins. By the type it is presumed to belong to Erythrae. It is a Hecta.

CITIES OF IONIA, IN SILVER. (Continued.)

2145 Erythraé; (the Tetradrachm) ΦΑΝΝΟΘΕΜΙΣ.; see Mionnet, Supp. p. 214, No. 905; of extreme rarity, and in perfect condition:
size 6\(\frac{1}{4}\). weight 226 grs. 1

2146 Erythrae; (Drachm) same type; ΑΙΟΠΕΘΘΗΣ.; very fine:
size 3. weight 54 \(\frac{9}{10}\) grs.

Erythrae; see Mionnet, Supp. vol. 7, pl. 6, fig. 1, and vol. 3, p. 568, No. 151; very rare, and in perfect condition:
size 4. weight 109 \(\frac{9}{10}\) grs. 2

* * This coin was formerly classed by Mionnet to Celenderis, but he recognizes it in the Supp. (p. 213, No. 898) to be of Erythrae, in Ionia, to which place it really belongs.

2147 Erythrae; (Drachm) like the first in the preceding lot; ΑΠΕΛΓΑΣ.; very fine: size 3. weight 55 \(\frac{9}{10}\) grs.

Erythrae; type of Mt. pl. 51, fig. 5, but the letters are retrograde, and the flower, or star, has only eight rays; rather rubbed:
size 3\(\frac{1}{2}\). weight 68 \(\frac{7}{10}\) grs. 2

* * This variation in the type is new and very curious.

2148 Another; type as usual; rare, but rather rubbed:
size 3\(\frac{1}{2}\). weight 71 \(\frac{1}{10}\) grs.
Erythrae; (two Drachmai) type as before; ΑΠΙΣΤΕΥΑΣ, and ΠΕΛΑΛΛΑΣ; both fine:

size 3. weights 55\(\frac{6}{10}\) grs. and 55 grs. 3

2149 Erythrae; (Drachm) type as before, with ΜΟΛΙΟΝ. in very small letters, and a monogram; rare, and fine:

size 9. wt. 248 grs. 1

* * * The edge of this fine coin has been filed or smoothed, but it has sustained no real injury.

(Greek Cities, in Silver, continued at page 315.)

GOLD COINS OF MILETUS?

2151 Uncertain; (large elongated Stater of pale Gold); obv. Head of a Lion, with the mouth open and tongue out, to the left; rev. a rude square indentation; unpublished? in perfect condition, and of the greatest rarity:

size 5. weight 247\(\frac{9}{10}\) grs. 1

* * * This appears to be the oldest coin in the collection, and would, indeed, probably be the oldest coin of any collection. It may be referred to the most remote period to which Herodotus intended to allude, when he ascribed to the Lydians the invention of coinage, and shews every indication of its early date. The peculiarity in the form and style of the Lion’s Head, is the motive for ascribing it to Miletus, in preference to Cyzicus, or other places.

2152 Uncertain; the same Lion’s Head to the left, on a round buckler; rev. an indentation nearly square, divided into 
COINS OF ELECTRUM. (Continued from page 283.)

* * * It has not been considered necessary, either here, or at page 282, to specify the separate weight and size of these well known coins. For the satisfaction of the young Numismatist, it may, however, be remarked, that they all closely approximate to 40 grains Troy, and vary in size from No. 1 to No. 1\(\frac{1}{2}\) of the scale of Mionnet, on the first page of this Catalogue. As specimens of beautiful art, they are frequently so fine, as to yield to nothing in the whole Greek series.

2155 Cyzicus? see Mionnet, vol. 7, pl. 55, fig. 8; fine and rare. Smyrna? see Mt. pl. 55, fig. 7; fine and rare. 2

**size 1\frac{3}{4}. weight 39\frac{1}{10} gvs. 1**

* This coin and the following being of gold, are to be distinguished from the class of electrum coins which they appear to have preceded.

2260 Phocæa; *obv.* Head of a Scal, (Phoca* vitulinis*) to the left, with a very minute seal under it; *rev.* quad. incus.; *in the highest condition; inedited? pale gold:

**size 1\frac{4}{4}. weight 40\frac{1}{10} gvs.**

* A most interesting Athenian inscription, preserved in the British Museum, is the authority for considering the two preceding coins as Phocaean *Hectæ*; a denomination of Greek money which is presumed to be now for the first time identified, and applied to the class of coins, to which, on consideration, it will be found to belong. It is, as its name implies, the *sixth* part [of the Stater,] which weighs about 248 grains, and consequently a *Hecta* (when of equal antiquity with its Stater) will weigh about 41\frac{1}{2} grains. The inscription alluded to has been published by Boeckh, (*Corpus Inscriptionum Graecarum*, vol. 1, pars 11, *Inscriptions Attica*, page 236), as follows—§ 19. Φοικαικω στατηζε 11. έκτα ταφαιζε, etc., etc., On which Boeckh remarks, "Phocæòs stateres aurei fuerunt: "Εκτα αλίβε non reperintur nisi in hoc ipso tilulo. § 22. Quae quum sextum stateris partem constituisses videantur, argentæe fuerint." § 22. "Εκτα Φοικαικαί καλα, &c. It is highly probable that Boeckh would not have regarded the *Hecta* as a silver coin had he been aware of the existence of (comparatively) such abundant specimens of gold coins, exactly of the required weight to prove themselves to be *Hecta*, and belonging precisely to the towns of which we have gold Staters, as Cyzicus, Phocæa, Miletus, &c. It may be further remarked, that the period to which the Staters and *Hecta* in question belong, is antecedent to the age of the inscription, which may be referred to 400 years B.C.

Phocæa; *obv.* Head of a Griffin to the left, with mouth open, and resting on four minute pellets under the neck; behind is a very minute seal; *rev.* quad. incus.; *this curious and minute coin is in the highest preservation; inedited?*

**size 1\frac{3}{4}. weight 6\frac{9}{10} gvs. 2**

* This coin is the sixth part of the *Hecta*.

**size 8\frac{3}{4}. wt. 255\frac{9}{10} gvs. 1**

* The estimation of the rarity of the silver tetradrachms of Smyrna in *Mionnet* is quite erroneous. The oldest resident collectors at Smyrna have never seen a specimen. The cabinets of Europe were supplied by a small hoard discovered in Pellerin's time, since which period none have been found. Few coins are more rare than the Tetradrachmus of Smyrna.
Another; with ΞΜΥΡΝΑΙΩΝ, in two lines, and ΧΠΑΚΑΕΙΔΙΗΣ, also in two lines, and a monogram; extremely well preserved, and as rare as the last, but not such fine workmanship, although a very desirable coin:

size 8 1/4, weight 252 4/10 grs.

Smyrna; same obverse, but rev. ΞΜΥΡΝΑΙΩΝ, in two lines, and a curious monogram within the wreath of oak; this type is the most rare of these scarce coins; in very excellent preservation, though slightly rubbed, and a very desirable coin:

betrayed by the difference in the colour of the metal, but it shews
the importance attached to the coin some two centuries ago.

* * This is the identical coin published by Mionnet, as above cited, but it is there somewhat incorrectly described, and the monogram incorrectly engraved, taking in the Σ of ΒΑΣΙΛΕΩΣ.

** The rarity of the aureus of Diadumenian is such, that even the D'Ennery, Trattle, and Nott collections were without it. None have been offered for sale in London these last seven years. There is a most beautiful, and certainly genuine one, in the Lavy Cabinet at Turin. See Museo Num. Lavy, No. 3115. Mr. Miles had one which he valued at £ 50.

The star in the field of the reverse is almost always seen on the medals of this "monster," as Tristan calls him, but never on those of Caracalla; besides he is here (nay generally) styled IMP., and Caracalla very seldom.

South, &c., in whatsoever condition they be, as they are looked upon as the most ancient and efficacious talismans, and are worshipped to this day, being considered to bring good luck, health, and wealth, to the fortunate possessor of one of these sacred pieces. It is not at all unlikely that this specimen is one of those found in 1799, at the taking of Seringapatam (amongst the immense treasures in the palace of Tippoo-Saib), where, as relics, they still enjoy the highest veneration.

This most interesting coin was formerly in the cabinet of John Barker, Esq., British Consul at Aleppo, and is the only one known which gives us a portrait of Laodice. It is the identical coin first engraved by the Chevalier Allier de Hauteroche (Essai sur une Tissière antique, &c., 4to., Paris, 1620), and afterwards published by Millingen, Cities and Kings, pl. 5, fig. 21.

probably unique: size \(8\frac{1}{4}\). weight 258 grs. 1

* * See a paper in the Numismatic Journal, vol. 1, pages 112 and 113,
where a doubt is expressed (contrary to the opinion of Visconti)
whether the seated female figure on the reverse of these coins be
intended for the goddess Ceres. It is presumed that the reverse of
the coin just described tends to prove that the doubt was well
founded, since it can scarcely be thought probable that Ceres was
ever represented as above described.

usual, with the title \(\Sigma\Omega\Theta\Pi\Sigma\), and two monograms in the

2559 Alexander I. (Bala); obv. his Bust; rev. Eagle with palm, standing on the prow of a galley; in the field, a club, and the monogram of Tyre, with another monogram, and the date ΔΞΠ. (year 165); a most beautiful, rare, and perfect coin: 
size 8. weight 219 grs. 1

* This tetradrachm is struck at Tyre and adjusted to the Ptolemaic Talent. Being so well preserved, it gives nearly the full weight of the Egyptian drachma, namely 55 grains Troy.

2560 Another; with date ΓΞΠ. (year 163); also extremely fine and perfect: 
size 7. weight 219\4\10 grs. 1

2561 Another; with date ΔΞΠ. (year 166); rev. Eagle, and in the field, a trident and a monogram; very rare, and extremely fine and perfect: size 7. weight 217\5\10 grs. 1

* Struck at Berytus, and also adjusted to the Ptolemaic Talent.

2562 Alexander I. (Bala); rev. ΘΕΟΠΑΤΟΡΟΣ. EYEΠΕΤΕΙΟΥ, Jupiter sitting, as usual, but holding a thunderbolt in his hand instead of the little winged Victory; in exergue, date ΔΞΠ. (year 165) and ΣΙΔΩ; extremely well preserved, and probably unique with this peculiarity:
size 8. weight 255\7\10 grs. 1

* * Although struck at Sidon, this coin offers the singular peculiarity of being adjusted to the Attic Talent, instead of the Ptolemaic, and no doubt as to its authenticity.

2563 Another; rev. Jupiter sitting, usual type, with date ΔΞΠ. (year 166) and Φ. in the exergue; in the field, ΔΟ. in monogram; fine condition: 
size 8\1\2. weight 257\6\10 grs. 1

2564 Another; with ΓΞΠ. (year 163), a monogram in the exergue, and a cornucopia in the field; well preserved:

size 8. weight 251 6/10 gvs.

2568 Demetrius II.; rev. Eagle with palm branch; in the field, ΣΙΔΩ. and the acrostolium, with the date ΩΞΡ. (year 169) and a monogram; fine condition:

size 7. weight 218 gvs. 1

2569 Demetrius II.; with long beard; rev. ΘΕΟΥ. ΝΙΚΑΤΟΠΟΣ., Jupiter seated; in exergue ΠΙΠ. (year 187); in the field three monograms; a very fine and very rare coin:

size 8 1/2. weight 252 1/10 gvs. 1

* * * These coins with the beard were struck after the return of Demetrius to the throne from his long captivity of nine years in Parthia. This coin is remarkable, as it bears the date of the year during which he was murdered at Tyre.—See Gough, Coins of the Seleucida, page 105 et seq.

2570 Another; with date ΠΙΠ. (year 184) and Ρ under the throne; very rare, high relief, and fine condition, except a hole which does no injury to the type:

size 7 3/4. weight 253 1/10 gvs. 1

2571 Another; same date; in excellent condition, and very rare:

size 7 1/2. weight 254 1/5 gvs. 1

COINS OF THE KINGS OF ΑΕGYPT, IN GOLD.

PENTADRACHMS OF PTOLEMY SOTER.

* * * In displaying before the young Numismatist such a splendid suite of these most rare coins of Ptolemy Soter and his successors, we feel constrained to refer to the remark made at page 26 of the former portion of this Catalogue, the truth of which will have been abundantly perceived during the examination of the many rich suites of this princely cabinet.

It was the quantity and high condition of these precious coins, as well as of those which follow at page 381, which induced the writer to put into order some memoranda of old date, and to prepare the short paper on the Egyptian or Ptolemaic Talent which was read to the Numismatic
Society, 25th April, 1844, and will be printed in the forthcoming number of the Numismatic Chronicle.

2573 Another; with a monogram like Σ, above a buckler, in the field to the left, and I. between the legs of the eagle; as it came from the die, and of the same beauty and rarity:

   size 8. weight 245 grs. 1

* * * This rare coin appears not to have lost a grain in weight: its lightness seems to shew a diminution in the standard weight of the coinage, as evinced by some of the following.

2679 Antiochus IX.; obv. his Portrait without beard; rev. Eagle on a thunderbolt; in the field an uncertain object or monogram? and the date L.ΔΣ. (year 206); not in Mionnet; probably unique and unedited, and in very fine condition:

THE COINS PUBLISHED BY HARWOOD.

N.B. During the preliminary examinations of the cabinets of the late Mr. Thomas previous to commencing this Catalogue, the writer recognized several coins among those of copper, which appeared to be the identical specimens engraved in the well known work of the late Mr. Harwood, entitled "Populorum et Urbium, selecta numismata Græca, ex ære," 4to. London, 1812, with seven copper plates of the coins. This led to a further and closer examination, which ended in the discovery of the whole of the coins engraved in the seven plates, except eight, which it is probable never came into the possession of Mr. Thomas.

As several of these coins published by Mr. Harwood are extremely curious and remarkable, and as others have, for many years, been a stumbling block to numismatists, the writer has ventured to avail himself of the present most favorable opportunity, to offer a few remarks on some of the coins previous to the possible or probable dispersion of them.

2930 The two Coins forming the vignettes at pages 15 and 16; and the eighteen coins forming plate 1, No. 1 to 18, except one coin, No. 16, which was not found.

** On coin No. 3 it may be remarked, that the letters (as engraved) are not at all clear, and it requires cleaning and study to be classed with certainty; see Eckhel, Num. Vet. Aeneodoti, tab. xiii. No. 13. Coin No. 5 is of Cleone, the Κ not having been perceived. The coin No. 6 is of Cius, in Bithynia, or uncertain. The coin No. 10 is of Elis, and reads ΨΔΔΔ. The coin No. 11 is of Alos, in Thessaly. The coin No. 15 is of Elis, and reads ΨΑΑΨ.

2931 The Coins forming plate 2, No. 1 to 21, except No. 15.

** Coins No. 2 and 3 are of Pergamus, in Mysia. Coin No. 9 is of Cnidos, in Caria. No. 11 is of Carystus in Euboea. Coin No. 13 is of Pergamus, in Mysia.

2932 The Coins forming plate 3, No. 1 to 18, except No. 3.

** The coin No. 2 is of Thessaly, and the figure of Minerva mistaken for the prow of a vessel. No. 9 is a coin of the Locri Opuntii. Coin
No. 11 is not of the Island Euboea, but probably of Euboea in Sicily, and is a coin for study. Coin No. 12 is of Cephaloedium, in Sicily.

2933 The Coins forming plate 4, No. 1 to 20, except No. 1, which was probably a coin of Calacte in Sicily, and No. 13. 18

* * * Coin No. 5 is of Larissa, in Thessaly. Coin No. 11 is of Messenia, in the Peloponnesus. No. 18 is a coin of Coreyra.

2934 The whole of the Coins forming plate 5, No. 1 to 18. 18

* * * The coin No. 1 is a coin of Pella, in Macedon. The very curious coin of Petra, Marmarica, No. 2, is to be compared with Mt. Supp. vol. ix. p. 180, No. 1. The coin No. 3 is of the Island Pholegandrus. No. 9 is a coin of Parium, in Mysia. No. 17 is a coin of Athens.

2935 The Coins forming plate 6, except No. 6. 18

* * * The coin No. 3 is a Sicilian coin, and the monogram by no means clear—probably it is a coin of Syracuse. The coin No. 6 is of Corresia, in Ceos Insula: the Τ being a Κ, and the Θ an Ο. Coin No. 7 is of Pella, in Macedonia: the ΤΕΙ being ΠΕΑ. The coin No. 2, Supplement, is a coin of Athens. The coin No 7, Supp. is of Sicyon in Achaia. Coin No. 8, Supp. is of Hispania, similar to that in Mionnet, page 1, No. 4.

2936 The Coins forming plate 7, except No. 2 and No. 10. 22

* * * The very rare and interesting coin No. 1 appears quite satisfactory. Coin No. 8 is of Colophon in Ionia. Coin No. 9 is unsatisfactory as engraved, and requires study. Coin No. 15, ill preserved and uncertain. No. 16 is uncertain, being one of those coins inscribed ΚΕΡΙΙΠΟΡΙΟΣ. No. 18 is a coin of Paros Insula. No. 19 a coin of Andrus, the letters being ΛΝΔΠ. No. 24 is an uncertain coin for study.
